NOTES: (1) Add suffix "B" for U-bracket format and "C" for enclosed format.

(2) Peak current is 12A on +12V, 9A on +15V and 6A on +24V.

(3) Output #4 is floating. It can be connected externally for positive or negative output.

(4) 200 watts for "C" version with a cover and fan assembly 150 watts for "B" version without moving air (maximum current of output #1 & #2 derated to 70%), or 200 watts with 25 CFM forced air provided by user.

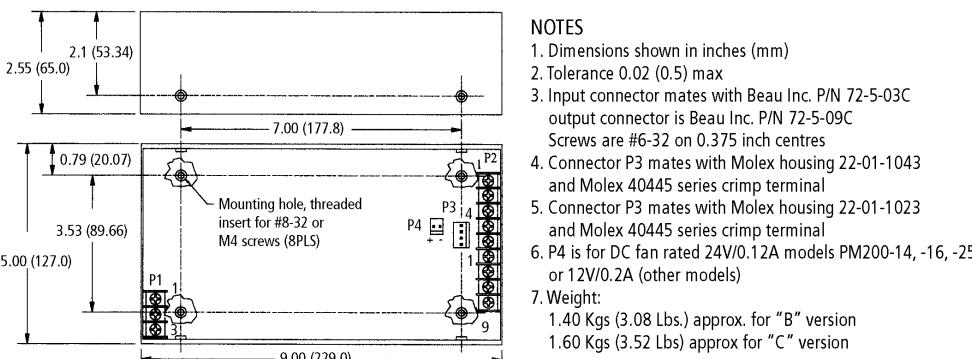

(5) When the remote Sense facility is not used, +Sense must be connected to +V, and -Sense to Return, on P2 connector.

(6) All models may be operated at no-load. At no-load, output voltage tolerance increases to 10%.
