

Thin Film Current Sense Chip Resistors

TCS Surface Mount Resistors Make Sense of Current

► Preview

The trend towards smaller handheld and portable electronics equipment has also increased the need for ultra small current sensing resistors. Devices from the Token Electronics' TCS series use a thin film construction that enables them to achieve precision resistance tolerances, low noise and long-term stability.

The Token TCS Series precision resistors are nichrome thin film chip resistors with a temperature coefficient of resistance of just $\pm 50\text{PPM}/^\circ\text{C}$ and tolerances of $\pm 0.5\%$.

They offer excellent stability at high frequencies and are suitable for operating high voltages with more options in the smaller form sizes of 0402, 0603, 0402, 0805, 1206, 2010, and 2512.

The full range of values is from $50\text{m}\Omega$ to 1Ω . This low ohmic devices are particularly suited to car engine management units to act as current sensing shunt resistors.

The TCS series is fully RoHS compliant and is supplied in tape and reel packaging ready for use with automated assembly processes.

► Features

- Thin Film Process.
- Resistance Values from $50\text{m}\Omega$ to 1Ω .
- Very Tight Tolerance from $\pm 1\%$ to $\pm 0.5\%$.
- RoHS Requirements with Pb-free Terminations.
- Extremely Low TCR from $\pm 200\text{PPM}/^\circ\text{C}$ to $\pm 50\text{PPM}/^\circ\text{C}$.
- High Purity Alumina Substrate for High Power Dissipation.

► Applications

- Voltage Regulation Module (VRM),
- Portable Devices (PDA, Cell phone),
- Disk Driver, Switching Power Supply,
- Over Current Protection in Audio Application,
- DC-DC Converter, Battery Pack, Charger, Adaptor,
- Automotive Engine Control, Power Management Applications
