# R Series Intelligent DAQ – Data Acquisition and Control with Onboard Processing

# NI 781xR, NI 783xR, NI PXI-784xR, NI PXI-785xR NEW!

- Onboard FPGA chip, programmable with the LabVIEW FPGA Module
- User-defined triggering, timing, and decision making in hardware with 25 ns resolution
- Up to 8 analog inputs, independent sampling rates up to 750 kHz, 16-bit resolution
- Up to 8 analog outputs, independent update rates up to 1 MHz, 16-bit resolution
- Up to 160 digital lines configurable as inputs, outputs, counters, or custom logic at rates up to 40 MHz
- Direct memory access (DMA) channels for high-speed data streaming
- Implement custom control logic, inline signal processing, and digital communication protocols

#### **Operating Systems**

- Windows XP/2000
- LabVIEW Real-Time

#### **Recommended Software**

- LabVIEW
- LabVIEW FPGA Module
  - LabVIEW code compiler for FPGAs
  - Emulated debugging mode
- LabVIEW Real-Time Module

#### **Driver Software (included)**

• NI-RIO

#### **Calibration Certificate Available**

Table 1. R Series Selection Guide

# **Overview**

Intelligent DAQ is multifunction data acquisition that features userdefined onboard processing as well as complete flexibility of I/O timing and triggering. You can configure all device functionality by creating NI LabVIEW block diagrams with the LabVIEW FPGA Module. Your block diagram executes in hardware, giving you direct, immediate control of all I/O signals on the PXI or PCI device. With R Series and LabVIEW FPGA, you can configure user-defined hardware for a wide variety of applications requiring precise timing and control such as:

- Data acquisition with flexible triggering and onboard processing
- High-speed analog and discrete control loops
- Pulse-width modulation (PWM) and encoder interfacing
- User-defined digital communication protocols
- Custom counters with up to 64-bit resolution
- Hardware-timed decision making at 40 MHz

# **Key Features**

Through programming in LabVIEW FPGA, you can control each of the I/O signal lines independently or synchronize a line with other channels. You can configure the digital I/O lines as custom counter/timers, PWM channels, or communication buses for user-defined protocols. All multifunction R Series devices have dedicated analog-to-digital converters/digital-to-analog converters on every analog I/O channel. This offers specialized functionality such as multirate sampling and individual channel triggering, which are beyond the capabilities of typical data acquisition hardware. You can sample every analog input channel on an R Series device simultaneously at rates up to 750 kHz, and you can program every analog output on an R Series device to update simultaneously at rates up to 1 MHz. You can also store your compiled LabVIEW FPGA application in the onboard flash memory of any R Series device and configure it for automatic loading and/or execution at power up.

# **New Virtex-5 FPGAs**

The new NI PXI-784xR and PXI-785xR modules use new Virtex-5 field-programmable gate arrays (FPGAs) with improved optimization capabilities that provide faster code execution and increased code capacity. These Virtex-5 FPGAs feature a new six-input lookup table (LUT) architecture for substantially improved resource utilization as well as DSP48 slices that make it possible for you to implement more complex digital signal processing at faster rates. Previous-generation Virtex-II FPGAs use four-input LUTs for up to 16 combinations of digital logic values. The new Virtex-5 FPGAs use six-input LUTs for up to 64 combinations, increasing the amount of logic that you can implement per slice. In addition, the slices themselves are placed in closer proximity to each other to reduce the propagation delay of electrons and increase overall execution rates. The single-cycle timed loop structure in LabVIEW FPGA takes full advantage of six-input LUTs for substantially improved resource utilization. This means you can optimize more LabVIEW FPGA code to fit within Virtex-5 FPGAs and perform more operations per clock cycle.

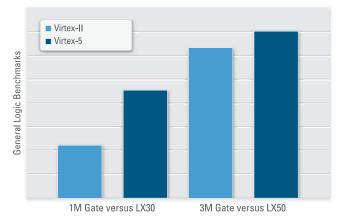

Figure 1. General logic benchmarks show that Virtex-5 FPGAs offer larger sizes when compared to Virtex-II FPGAs.

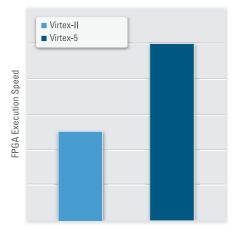

Figure 2. Execution speed benchmarks show that Virtex-5 FPGAs feature faster processing capabilities when compared to Virtex-II FPGAs.

For more information on LabVIEW FPGA benchmarks for Virtex-5 FPGAs, visit ni.com/info and enter lvfpgabenchmarks.

# **Recommended Accessories**

#### **High Performance**

**SHC68-68-RMIO** – High-performance shielded 68-conductor cable terminated with a VHDCI 68-pin male connector at one end and a 68-pin female 0.050 D-type connector at the other end that has been specifically designed for the multifunction I/O connector on R Series intelligent DAQ devices.

1 m	
2 m	

**SHC68-68-RDIO** – High-performance shielded 68-conductor cable terminated with a VHDCI 68-pin male connector at one end and a 68-pin female 0.050 D-type connector at the other end that has been specifically designed for the digital I/O connector on R Series intelligent DAQ devices.

1 m ......191667-01

**SCB-68** – Shielded I/O connector block for rugged, very low-noise signal termination for connecting to 68-pin devices. The SCB-68 also includes two general-purpose breadboard areas.

Dimensions - 19.5 by 15.2 by 4.5 cm (7.7 by 6.0 by 1.8 in.)

### Low Cost

**SH68-C68-S** – General-purpose shielded cable that connects any type of R Series connector to 68-pin connector blocks.

0.5 m	٦	186381-OR5
1 m		
2 m		

#### **Custom Cabling**

**SHC68-NT-S** – Shielded 68-conductor cable terminated with a 68-pin male VHDCI connector at one end and unterminated bare wires at the other. Use this cable, ideal for OEM applications, to create custom cabling solutions for R Series devices.

**NSC68-262650** – Shielded cable terminated with a VHDCI 68-pin male connector at one end and two 26-pin ribbon connectors and one 50-pin ribbon connector on the other; designed to connect the R Series RMIO connector to standard ribbon cable accessories.

**NSC68-5050** – Shielded cable terminated with a VHDCI 68-pin male connector at one end and two 50-pin ribbon connectors on the other; designed to connect R Series RDIO connectors to standard ribbon cable accessories.

#### **Required Software for R Series Intelligent DAQ**

- NI 781xR and 783xR devices require the LabVIEW FPGA Module 7.1 or later and NI-RIO 1.3 or later driver software.
- NI 784xR and 785xR devices require the LabVIEW FPGA Module 8.5.1 or later and NI-RIO 2.4 or later.
- NI 7853R and 7854R devices require the LabVIEW FPGA Module 8.6 or later and NI-RIO 3.0 or later.

#### Low-Cost Signal Conditioning and Channel Expansion

The NI cRIO-9151 R Series expansion chassis connects directly to any digital connector on R Series devices and houses up to four C Series I/O modules for industrial signal conditioning, I/O channel expansion, and direct sensor connectivity.

#### **Environmental**

NI 78xxR devices are intended for indoor use only.

#### **Operating Environment**

NI 781xR NI 7830R, NI 7831R	0 to 55 °C (tested in accordance with IEC-60068-2-1 and IEC-60068-2-2)
40 or 80 MHz timebase	0 to 55 °C (tested in
	accordance with IEC-60068-2-1
	and IEC-60068-2-2)
NI 7833R/7841R/7842R/7851R/7852R/	7853R/7854R
40 MHz timebase	0 to 55 °C (tested in
	accordance with IEC-60068-2-1
	and IEC-60068-2-2)
80 MHz timebase	0 to 55 °C except the
	following: 0 to 45 °C when
	installed in an NI PXI-1000/B or
	NI PXI-101x (tested in
	accordance with IEC-60068-2-1
	and IEC-60068-2-2)
Relative humidity range	10 to 90%, noncondensing
	(tested in accordance with
	IEC-60068-2-56)
Altitude	2,000 m at 25 °C
,	ambient temperature

#### **Storage Environment**

Ambient temperature range	-20 to 70 °C (tested in
	accordance with IEC-60068-2-1
	and IEC-60068-2-2)
Relative humidity range	5 to 95%, noncondensing
	(tested in accordance with
	IEC-60068-2-56)

**Note:** Clean the device with a soft, nonmetallic brush. Make sure that the device is completely dry and free from contaminants before returning it to service.

#### Shock and Vibration (for NI PXI-78xxR Only)

Operational shock	30 g peak, half-sine, 11 ms pulse (tested in accordance with IEC-60068-2-27; test profile developed in accordance with MIL-PRF-28800F)
Random vibration	
Operating	5 to 500 Hz, 0.3 g <sub>rms</sub>
Nonoperating	5 to 500 Hz, 2.4 g <sub>rms</sub>
	(tested in accordance with
	IEC-60068-2-64; nonoperating test
	profile exceeds the requirements
	of MIL-PRF-28800F, Class 3)

#### **Safety and Compliance**

#### Safety

NI 78xxR devices are designed to meet the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

**Note:** For UL and other safety certifications, refer to the product label or visit **ni.com/certification**, search by model number or product line, and click the appropriate link in the Certification column.

#### **Electromagnetic Compatibility**

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326 (IEC 61326): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

#### **CE Compliance**

This product meets the essential requirements of applicable European Directives, as amended for CE marking, as follows:

- 2006/95/EC; Low-Voltage Directive (safety)
- 2004/108/EC; Electromagnetic Compatibility Directive (EMC)

**Note:** Refer to the Declaration of Conformity (DoC) for this product for any additional regulatory compliance information. To obtain the DoC for this product, visit **ni.com/certification**, search by model number or product line, and click the appropriate link in the Certification column.

#### **Environmental Management**

National Instruments is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial not only to the environment but also to NI customers.

For additional environmental information, refer to the NI and the Environment Web page at **ni.com/environment**. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

#### Waste Electrical and Electronic Equipment (WEEE)

**EU Customers:** At the end of their life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers and National Instruments WEEE initiatives, visit **ni.com/environment/weee.htm**.

#### 电子信息产品污染控制管理办法(中国 RoHS)

 中国客户 National Instruments 符合中国电子信息产品中限制使用某些有害物质指 令 (RoHS)。关于 National Instruments 中国 RoHS 合熟性信息,请登录 ni.com/environment/roha\_china。(For information about China RoHS compliance, go to ni.com/environment/roha\_china.)

# **NI Services and Support**

NI has the services and support to meet your needs around the globe and through the application life cycle – from planning and development through deployment and ongoing maintenance. We offer services and service levels to meet customer requirements in research, design, validation, and manufacturing. Visit **ni.com/services**.

# **Training and Certification**

NI training is the fastest, most certain route to productivity with our products. NI training can shorten your learning curve, save development time, and reduce maintenance costs over the application life cycle. We schedule instructor-led courses in cities worldwide, or we can hold a course at your facility. We also offer a professional certification program that identifies individuals who have high levels of skill and knowledge on using NI products. Visit **ni.com/training**.

# **Professional Services**

Our NI Professional Services team is composed of NI applications and systems engineers and a worldwide National Instruments Alliance Partner program of more than 600 independent consultants and

integrators. Services range from start-up assistance to turnkey system integration. Visit **ni.com/alliance**.

# **OEM Support**

We offer design-in consulting and product integration assistance if you want to use our products for OEM applications. For information about special pricing and services for OEM customers, visit **ni.com/oem**.

# **Local Sales and Technical Support**

In offices worldwide, our staff is local to the country, giving you access to engineers who speak your language. NI delivers industry-leading technical support through online knowledge bases, our applications engineers, and access to 14,000 measurement and automation professionals within NI Developer Exchange forums. Find immediate answers to your guestions at **ni.com/support**.

We also offer service programs that provide automatic upgrades to your application development environment and higher levels of technical support. Visit **ni.com/ssp**.

## **Hardware Services**

#### **NI Factory Installation Services**

NI Factory Installation Services (FIS) is the fastest and easiest way to use your PXI or PXI/SCXI combination systems right out of the box. Trained NI technicians install the software and hardware and configure the system to your specifications. NI extends the standard warranty by one year on hardware components (controllers, chassis, modules) purchased with FIS. To use FIS, simply configure your system online with **ni.com/pxiadvisor**.

### **Calibration Services**

NI recognizes the need to maintain properly calibrated devices for high-accuracy measurements. We provide manual calibration procedures, services to recalibrate your products, and automated calibration software specifically designed for use by metrology laboratories. Visit **ni.com/calibration**.

#### **Repair and Extended Warranty**

NI provides complete repair services for our products. Express repair and advance replacement services are also available. We offer extended warranties to help you meet project life-cycle requirements. Visit **ni.com/services**.
