

DESCRIPTION:

The KW2-801 series is large dual digit display in 0.80 inch (20.30mm) height with right DP's designed for accurate readable displays need to be viewed over a distance.

This series is suitable for use in instruments, digital readout displays.

All devices are available as either common anode or common cathode.

REMARKS : 1. The average luminous intensity is obtained by summing the luminous intensity of each segment and dividing by the total number of segments.
 2. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE (International Commission on Illumination) eye-response curve.
 3. Clean only by pure water, isopropanol, ethanol, Freon TF (or equivalent).
