- Wide Operating Voltage Range of 2 V to 6 V
- Typical t_{pd} = 14 ns
- Low Power Consumption, 20-μA Max
 ICC
- Low Input Current of 1 μA Max
- Operation From Very Slow Input Transitions
- Temperature-Compensated Threshold Levels
- High Noise Immunity

description/ordering information

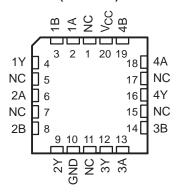

In these devices, each circuit functions as a quadruple NOR gate. They perform the Boolean function $Y = \overline{A} \bullet \overline{B}$ or $Y = \overline{A} + \overline{B}$ in positive logic. However, because of the Schmitt action, the inputs have different input threshold levels for positive- and negative-going signals.

These circuits are temperature compensated and can be triggered from the slowest of input ramps and still give clean jitter-free output signals.

ORDERING INFORMATION

TA	PACKAGE [†]		ORDERABLE PART NUMBER	TOP-SIDE MARKING
	PDIP – N	Tube of 25	SN74HC7002N	SN74HC7002N
		Tube of 50	SN74HC7002D	
	SOIC - D	Reel of 2500	SN74HC7002DR	HC7002
–40°C to 85°C		Reel of 250	SN74HC7002DT	
	SOP - NS	Reel of 2000	SN74HC7002NSR	HC7002
		Tube of 90	SN74HC7002PW	
	TSSOP – PW	Reel of 2000	SN74HC7002PWR	HC7002
		Reel of 250	SN74HC7002PWT	
	CDIP – J	Tube of 25	SNJ54HC7002J	SNJ54HC7002J
–55°C to 125°C	CFP – W	Tube of 150	SNJ54HC7002W	SNJ54HC7002W
	LCCC - FK	Tube of 55	SNJ54HC7002FK	SNJ54HC7002FK

[†] Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

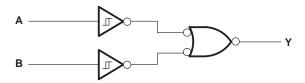

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

FUNCTION TABLE (each gate)

INP	UTS	OUTPUT
Α	В	Υ
Н	Χ	L
X	Н	L
L	L	Н

logic diagram (positive logic)

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

Supply voltage range, V _{CC}		-0.5	$V \ to \ 7 \ V$
Input clamp current, I_{IK} ($V_I < 0$ or $V_I > V_{CC}$) (se	ee Note 1)		$\pm 20 \ mA$
Output clamp current, I _{OK} (V _O < 0 or V _O > V _{CO}	c) (see Note 1)		$\pm 20 \ mA$
Continuous output current, I_O ($V_O = 0$ to V_{CC})	·		$\pm 25~\text{mA}$
Continuous current through V _{CC} or GND			$\pm 50 \ mA$
Package thermal impedance, θ _{JA} (see Note 2):	D package		86°C/W
	N package		80°C/W
	NS package		76°C/W
	PW package	1	113°C/W
Storage temperature range, T _{stq}		65°C t	:o 150°C

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

recommended operating conditions (see Note 3)

			SN	SN54HC7002			SN74HC7002		
			MIN	NOM	MAX	MIN	NOM	MAX	UNIT
Vcc	Supply voltage		2	5	6	2	5	6	V
		V _{CC} = 2 V	1.5			1.5

PARAMETER MEASUREMENT INFORMATION

- NOTES: A. C_L includes probe and test-fixture capacitance.
 - B. Phase relationships between waveforms were chosen arbitrarily. All input pulses are supplied by generators having the following characteristics: PRR \leq 1 MHz, $Z_O = 50 \ \Omega$, $t_f = 6 \ ns$, $t_f = 6 \ ns$.
 - C. The outputs are measured one at a time with one input transition per measurement.
 - D. tpLH and tpHL are the same as tpd.

C. Body dimensions do not include mold flash or protrusion not to exceed 0,15.

D. Falls within JEDEC MO-153

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
