LCM Number System

GB 20 4 C S Y C Y N D A - V01

- VERSION NUMBER: V00~V99
- IC TYPE:
 - A: BONDING IC, WITH CONTROLLER
 - B: BONDING IC, WITHOUT CONTROLLER
 - C: SMT IC, WITH CONTROLLER
 - D: SMT IC, WITHOUT CONTROLLER
 - O: OTHER TYPE
- VIEWING DIRECTION:
 - U: UPPER(12:00); D: DOWN(6:00)
 - L: LEFT(9:00); R: RIGHT(3:00);
- TEMPERATURE RANGE:
 - N: NORMAL TEMPERATURE RANGE
 - M: MIDDLE TEMPERATURE RANGE
 - W: WIDE TEMPERATURE RANGE
 - S: SUPER WIDE TEMPERATURE RANGE
- BACKLIGHT COLOR:
 - A: AMBER; B: BLUE; Y: YELLOW-GREEN
 - R: RED; W: WHITE; O: THER COLOR
- BACKLIGHT TYPE:
 - A: TRANSFLECTIVE, EL BACKLIGHT
 - B: TRANSMISSIVE, EL BACKLIGHT
 - C: TRANSFLECTIVE, LED BACKLIGHT
 - D: TRANSMISSIVE, LED BACKLIGHT
 - E: TRANSFLECTIVE, CCFL BACKLIGHT
 - F: TRANSMISSIVE, CCFL BACKLIGHT
 - G: REFLECTIVE, NONE BACKLIGHT
- LCD COLOR MODE:
 - G: GRAY; Y: YELLOW-GREEN; B: BLUE;
 - W: BLACK-WHITE; O: OTHER
- LCD TYPE:
 - N: TN; H: HTN; S: STN
 - F: FSTN; X: OTHER
- SERIAL NUMBER: A~Z
- GRAPHIC MODULEs: NUMBER OF COMMONs
CHARACTER MODULEs: NUMBER OF LINE
- GRAPHIC MODULEs:NUMBER OF SEGMENTs
CHARACTER MODULEs:
NUMBER OF CHAR. PER LINE
- COB & SMT LCM

1. GENERAL DESCRIPTION

The GB204C is a 20C x 4L Character LCD module. It has a STN panel composed of 200 segments and 16 commons. The LCM can be easily accessed by micro-controller via parallel and serise interface.

2. FEATURES

Display Mode	Transflective and positive
	STN(Yellow - Green) module
Display Format	Character 20C x4L
Input Data	Serial and parallel data input from MPU
Multiplexing Ratio	1/16 Duty
Bias	1/5 Bias
Viewing Direction	6 O'clock
Backlight	LED

3. MECHANICAL SPECIFICATION

Item	Specifications	Unit
Dimensional outline	146.0(l) x 62.5(W) x 15.5max(H)	mm
Resolution	20Character x 4Line	dots
Active area	118.85 x 38.1	mm
Char. pitch	6.0(W) x 9.65(H)	mm
Char. size	4.85(W) x 9.15(H)	mm
Dots pitch	0.98 (W)×1.15(H)	mm
Dots size	0.93(W)×1.1 (H)	mm

4. MECHANICAL DIMENSION

PIN 1

PIN NO.	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
SYMBOL	VSS	VDD	VO	RS	R/W	E	DB0	DB1	DB2	DB3	DB4	DB5	DB6	DB7	LED+	LED-

PIN 2 (SERIAL TYPE)

PIN NO.	1	2	3	4	5	6	7	8	9
SYMBOL	VDD	VSS	XRESET	DB7	DB6	DB5	RS	LED+	LED-

5. MAXIMUM RATINGS

Item	Symbol	Min	Max	Unit	Note
Supply voltage	$V_{DD} - V_{SS}$	-0.3	7.0	V	
	V_{LCD}	-0.3	13.0	V	
Input Voltage	V_{IN}	-0.3	$V_{DD}+0.3$	V	
Operating temperature	T_{OPR}	-20	+70	°C	
Storage temperature	T_{STR}	-30	+80	°C	
Humidity	---	---	90	%RH	

6. ELECTRICAL CHARACTERISTICS

Item		Symbol	Condition	Min.	Typ.	Max.	Unit
Supply Voltage	Logic	V_{DD}	---	---	5.0	---	V
Input Voltage	H level	V_{IH}	---	$0.8V_{DD}$	---	V_{DD}	V
	L level	V_{IL}		V_{SS}	---	$0.2V_{DD}$	
Current Consumption (LCD DRIVER)		I_{DD}	$V_{DD}=5.0V$; $V_{LCD}=4.7V, T_{amb}=25^{\circ}C$;	---	---	1.0	mA
LCD Driving Voltage		V_{LCD}	Bias=1/5 $V_{LCD}=V_0-V_{SS}$	---	4.7	---	V
Current Consumption (With LED BackLight)		I_{LED}	$V_{DD}=5.0V$; $V_{LED}=4.2V, T_{amb}=25^{\circ}C$;	---	---	300	mA

7. MODULE FUNCTION DESCRIPTION

7.1. PIN DESCRIPTION

7.11 Parallel Interface

Pin No.	Symbol	Description
1	VSS	Power supply for ground(0V)
2	VDD	Power supply for positive(+5V or +3V)
3	VO	LCD driver voltage regulation
4	RS	Data/command signed select input
5	R/W	Read/write signal input
6	E	Read/write enable signal input
7	DB0	8-bit bi-directional data bus
8	DB1	
9	DB2	
10	DB3	
11	DB4	
12	DB5	
13	DB6	
14	DB7	
15	LED+	LED power supply voltage(positive)
16	LED-	LED power supply voltage(negative)

7.12 Serial Interface

Pin No.	Symbol	Description
1	VDD	Power supply for positive(+5V or +3V)
2	VSS	Power supply for Ground(0V)
3	XRESET	Reset signal
4	DB7	Serial data signal input
5	DB6	Serial clock signal input
6	DB5	Chip select signal
7	RS	Data/command select signal
8	LED+	LED power supply voltage(positive)
9	LED-	LED power supply voltage(negative)

7.2 TIMING CHARACTERISTICS

1. SYSTEM BUS READ/WRITE CHARACTERISTIC

- Writing data from MPU to ST7070

- Reading data from ST7070 to MPU

2. DISPLAY CONTROL OUTPUT TIMING

- Interface Timing with External Driver

- Internal Power Supply Reset

Notes:

- tOFF compensates for the power oscillation period caused by momentary power supply oscillations.
- Specified at 4.5V for 5V operation, and at 2.7V for 3V operation.
- For if 4.5V is not reached during 5V operation, the internal reset circuit will not operate normally.

7.3 APPLICATION OF LCM

■Reference circuit

■ THE MPU INTERFACE

The ST7070 Series can be connected to 6800 Series MPUs. Moreover, using the serial interface it is possible to operate the ST7070 series chips with fewer signal lines.

The display area can be enlarged by using multiple ST7070 Series chips. When this is done, the chip select signal can be used to select the individual lcs to access.

(1) 6800 8 bits Series MPUs

(2) 6800 4 bits Series MPUs

(3) Using the Serial Interface—For 4 SPI

(4) Using the Serial Interface—For 3 SPI

■Circuit Block Diagram

7.4 TABLE OF COMMAND

There are four categories of instructions that:

- Designate ST7070 functions, such as display format, data length, etc.
- Set internal RAM addresses
- Perform data transfer with internal RAM
- Others

Instruction Table:

Instruction Table:

Instruction	Instruction Code										Description	Description Time (270KHz)	
	RS	R/W	DB7	DB6	DB5	DB4	DB3	DB2	DB1	DB0			
EXT = 0 or 1													
Clear Display	0	0	0	0	0	0	0	0	0	1	Write "20H" to DDRAM. and set DDRAM address to "00H" from AC	1.52 ms	
Return Home	0	0	0	0	0	0	0	0	0	1	x	Set DDRAM address to "00H" from AC and return cursor to its original position if shifted. The contents of DDRAM are not changed.	1.52 ms
Display ON/OFF	0	0	0	0	0	0	0	1	D	C	P	D=1:entire display on C=1:cursor on P: font table page selection	37 us
Cursor or Display Shift	0	0	0	0	0	0	1	S/C	R/L	x	x	Set cursor moving and display shift control bit, and the direction, without changing DDRAM data.	37 us
Function Set	0	0	0	0	0	1	DL	N	EXT	x	x	DL: interface data is 8/4 bits N: number of line is 2/1	37 us
Read Busy flag and address	0	1	BF	AC6	AC5	AC4	AC3	AC2	AC1	AC0		Whether during internal operation or not can be known by reading BF. The contents of address counter can also be read.	0 us
Write data to RAM	1	0	D7	D6	D5	D4	D3	D2	D1	D0		Write data into internal RAM (DDRAM/CGRAM)	37 us
Read data from RAM	1	1	D7	D6	D5	D4	D3	D2	D1	D0		Read data from internal RAM (DDRAM/CGRAM)	37 us
EXT = 0													
Entry Mode Set	0	0	0	0	0	0	0	0	1	I/D	S	Sets cursor move direction and specifies display shift. These operations are performed during data write and read.	37 us
Set CGRAM address	0	0	0	1	AC5	AC4	AC3	AC2	AC1	AC0		Set CGRAM address in address counter	37 us
Set DDRAM address	0	0	1	AC6	AC5	AC4	AC3	AC2	AC1	AC0		Set DDRAM address in address counter	37 us

EXT = 1												
Bias resistor select	0	0	0	0	0	0	0	1	Rb1	Rb0	Used internal resistor only provide 1/5 bias mode . Rb[1:0]=00→External Resistor Rb[1:0]=01~11→Internal Resistor	37 us
COM、SEG direction select	0	0	0	1	0	0	C1	C2	S1	S2	C1 : com1~8→com8~1 C2 : com9~16→com16~9 S1 : seg1~40→seg40~1 S2 : seg41~80→seg80~41	37 us
Set display data length	0	0	1	L6	L5	L4	L3	L2	L1	L0	To specify the number of data bytes(3SPI mode)	37 us

Note:

Be sure the ST7070 is not in the busy state (BF = 0) before sending an instruction from the MPU to the ST7070. If an instruction is sent without checking the busy flag, the time between the first instruction and next instruction will take much longer than the instruction time itself. Refer to Instruction Table for the list of each instruction execution time.

• **Note 4. Definition of Contrast ratio(CR) :**

$$CR = \frac{\text{Brightness of Non-selected Segment (B2)}}{\text{Brightness of Selected Segment (B1)}}$$

9. RELIABILITY

9.1. MTBF

The LCD module shall be designed to meet a minimum MTBF value of 50000 hours with normal. (25°C in the room without sunlight)

9.2. TESTS

NO.	ITEM	CONDITION	CRITERION
1	High Temperature Operating	70°C 120Hrs	◦ No Defect Of Operational Function In Room Temperature Are Allowable. ◦ IDD of LCM in Pre-and post-test should follow specification
2	Low Temperature Operating	-20°C 120Hrs	
3	High Temperature/ Humidity Non-Operating	70°C ,90%RH ,120 Hrs	
4	High Temperature Non-Operating	80°C 120Hrs	
5	Low Temperature Non-Operating	-30°C 120Hrs	
6	Temperature Cycling Non-Operating	-20°C (30Min)↔ 70°C (30Min) 10 CYCLES	

Notes: Judgments should be made after exposure in room temperature for two hours.

10. PRECAUTIONS FOR USING LCD MODULES

10.1. HANDLING PRECAUTIONS

- (1) The display panel is made of glass. Do not subject it to a mechanical shock or impact by dropping it.
- (2) If the display panel is damaged and the liquid crystal substance leaks out, be sure not to get any in your mouth. If the substance contacts your skin or clothes, wash it off using soap and water.
- (3) Do not apply excessive force to the display surface or the adjoining areas since this may cause the color tone to vary.
- (4) The polarizer covering the display surface of the LCD module is soft and easily scratched. Handle this polarizer carefully.
- (5) If the display surface becomes contaminated, breathe on the surface and gently wipe it with a soft dry cloth. If it is heavily contaminated, moisten a cloth with one of the following solvents:
 - Isopropyl alcohol
 - Ethyl alcohol
- (6) Solvents other than those above mentioned may damage the polarizer.
Especially, do not use the following:
 - Water
 - Ketone
 - Aromatic solvents
- (7) Extra care to minimize corrosion of the electrode. Water droplets, moisture condensation or a current flow in a high-humidity environment accelerates corrosion of the electrode.
- (8) Install the LCD Module by using the mounting holes. When mounting the LCD Module, make sure it is free of twisting, warping and distortion. In particular, do not forcibly pull or bend the I/O cable or the backlight cable.
- (9) Do not attempt to disassemble or process the LCD Module.
- (10) NC terminal should be open. Do not connect anything.
- (11) If the logic circuit power is off, do not apply the input signals.
- (12) To prevent destruction of the elements by static electricity, be careful to maintain an optimum work environment.
 - Be sure to ground the body when handling the LCD Module.
 - Tools required for assembling, such as soldering irons, must be properly grounded.
 - To reduce the amount of static electricity generated, do not conduct assembling and other work under dry conditions.

-The LCD Module is coated with a film to protect the display surface. Exercise care when peeling off this protective film since static electricity may be generated.

10.2. STORAGE CONDITIONS

When storing, avoid the LCD module to be exposed to direct sunlight of fluorescent lamps. For stability, to keep it away from high temperature and high humidity environment (The best condition is : $23\pm5^{\circ}\text{C}$, $45\pm20\%\text{RH}$). ESD protection is necessary for long-term storage also.

10.3. OTHERS

Liquid crystals solidify under low temperature (below the storage temperature range) leading to defective orientation or the generation of air bubbles (black or white). Air bubbles may also be generated if the module is subject to a low temperature.

If the LCD Module have been operating for a long time showing the same display patterns the display patterns may remain on the screen as ghost images and a slight contrast irregularity may also appear. A normal operating status can be recovered by suspending use for some time. It should be noted that this phenomenon does not adversely affect performance reliability.

To minimize the performance degradation of the LCD Module resulting from destruction caused by static electricity etc. exercise care to avoid holding the following sections when handling the modules.

- Exposed area of the printed circuit board.
- Terminal electrode sections.

11. Using LCD modules

11.1 LIQUID CRYSTAL DISPLAY MODULES

LCD is composed of glass and polarizer. Pay attention to the following items when handling.

- (1) Please keep the temperature within specified range for use and storage. Polarization degradation, bubble generation or polarizer peel-off may occur with high temperature and high humidity.
- (2) Do not touch, push or rub the exposed polarizers with anything harder than a HB pencil lead (glass, tweezers, etc).
- (3) N-hexane is recommended for cleaning the adhesives used to attach front/rear polarizers and reflectors made of organic substances, which will be damaged by chemicals such as acetone, toluene, ethanol and isopropyl alcohol.
- (4) When the display surface becomes dusty, wipe gently with absorbent cotton or other soft material like chamois soaked in petroleum ether. Do not scrub hard to avoid damaging the display surface.
- (5) Wipe off saliva or water drops immediately, contact with water over a long period of time may cause deformation or color fading.
- (6) Avoid contacting oil and fats.
- (7) Condensation on the surface and contact with terminals due to cold will damage, stain or polarizers. After products are tested at low temperature they must be warmed up in a container before coming in contact with room temperature air.
- (8) Do not put or attach anything on the display area to avoid leaving marks on.
- (9) Do not touch the display with bare hands. This will stain the display area and degrade insulation between terminals (some cosmetics are determinate to the polarizers).
- (10) As glass is fragile, it tends to become chipped during handling especially on the edges. Please avoid dropping or jarring.

11.2 INSTALLING LCD MODULE

Attend to the following items when installing the LCM.

- (1) Cover the surface with a transparent protective plate to protect the polarizer and LC cell.
- (2) When assembling the LCM into other equipment, the spacer to the bit between the LCM and the fitting plate should have enough height to avoid causing stress to the module surface, refer to the individual specifications for measurements. The measurement tolerance should be $\pm 0.1\text{mm}$.

11.3 ELECTRO-STATIC DISCHARGE CONTROL

Since this module uses a CMOS LSI, the same careful attention should be paid for electrostatic discharge as for an ordinary CMOS IC.

- (1) Make certain that you are grounded when handing LCM.
- (2) Before removing LCM from its packing case or incorporating it into a set, be sure the module and your body have the same electric potential.
- (3) When soldering the terminal of LCM, make certain the AC power source for the soldering iron does not leak.
- (4) When using an electric screwdriver to attach LCM, the screwdriver should be of ground potentiality to minimize as much as possible any transmission of electromagnetic waves produced sparks coming from the commutator of the motor.
- (5) As far as possible, make the electric potential of your work clothes and that of the workbenches to the ground potential.
- (6) To reduce the generation of electro-static discharge, be careful that the air in the work is not too dried. A relative humidity of 50%-60% is recommended.

11.4 PRECAUTIONS FOR OPERATION

- (1) Viewing angle varies with the change of liquid crystal driving voltage (V_o). Adjust V_o to show the best contrast.
- (2) Driving the LCD in the voltage above the limit will shorten its lifetime.
- (3) Response time is greatly delayed at temperature below the operating temperature range. However, this does not mean the LCD will be out of the order. It will recover when it returns to the specified temperature range.
- (4) If the display area is pushed hard during operation, the display will become abnormal. However, it will return to normal if it is turned off and then on.
- (5) Condensation on terminals can cause an electrochemical reaction disrupting the terminal circuit. Therefore, this product must be used and stored within the specified condition of $23\pm5^{\circ}\text{C}$, $45\pm20\%\text{RH}$.
- (6) When turning the power on, input each signal after the positive/negative voltage becomes stable.

11.5 SAFETY

- (1) It is recommended to crush damaged or unnecessary LCDs into pieces and wash them off with solvents such as acetone and ethanol, which should later be burned.
- (2) If any liquid leaks out of a damaged glass cell and comes in contact with the hands, wash off thoroughly with soap and water.

12. REVISION HISTORY

Version	Revise record	Date
1.0	Original version	05-01-01
2.0	Change specification format	05-11-19
