

Multi-layer ceramic chip capacitors

MCH03 (0603 (0201) size, chip capacitor)

●Features

- 1) Ultra miniature (0.6mm×0.3mm×0.3mm), Ultra light weight (0.3mg)
- 2) Suitable for mobile devices
- 3) Lead-free plating terminal
- 4) No polarity

●Quick Reference

The design and specifications are subject to change without prior notice. Please check the most recent technical specifications prior to placing orders or using the product. For more detail information regarding packaging style code, please check product designation.

Thermal compensation

Part No.	Size code	Temperature characteristics		Operating temp. range (°C)	Rated voltage (V)	Capacitance (pF)	Capacitance tolerance	Thickness (mm)

Ceramic capacitors

No.	Items		Performance		Test Method (As per JIS C 5101-1, JIS C 5101-10)	
6	Temperature characteristic		A, AN	Capacitance $C \leq 2\text{pF}$ $0+/-250\text{ppm}/^{\circ}\text{C}$ Capacitance $C=3\text{pF}$ $0+/-120\text{ppm}/^{\circ}\text{C}$ Capacitance $C \geq 4\text{pF}$ $0+/-60\text{ppm}/^{\circ}\text{C}$ (-55°C to $+125^{\circ}\text{C}$)	As per 4.24 of JIS C 5101-1. As per 4.7 of JIS C 5101-10 Temperature coefficient shall be calculated at 20°C and 85°C .	
			C N	X7R R	$+/-15\%$ (-55°C to $+125^{\circ}\text{C}$)	As per 4.24 of JIS C 5101-1. As per 4.7 of JIS C 5101-10 If required, measurements shall be made at a given temperature.
				B	$+/-10\%$ (-25°C to $+85^{\circ}\text{C}$)	
				X5R	$+/-15\%$ (-55°C to $+85^{\circ}\text{C}$)	
F N	$+30\%, -80\%$ (-25°C to $+85^{\circ}\text{C}$) ----- $+22\%, -82\%$ (-30°C to $+85^{\circ}\text{C}$)					
7	Solderability		More than 3/4 of each end termination shall be covered with new solder.		As per 4.15.2 of JIS C 5101-1. As per 4.11 of JIS C 5101-10 The solder specified in JIS Z 3282 H63A shall be used. Ans the flux containing 25% rosin and ethanol solution shall be used. The specimens shall be immersed into the solder at $235+/-5^{\circ}\text{C}$ for $2+/-0.5\text{s}$ So that both end terminations are completely under solder.	
8	Resistance to solderin heat	Appearance	Without mechanical damage.		As per 4.14 of JIS C 5101-1. As per 4.10 of JIS C 5101-10 The solder specified in JIS Z 3282. H63A shall be used. The specimens shall be immersed into the solder at $260+/-5^{\circ}\text{C}$ for $5+/-0.5\text{s}$ so that both end terminations are completely under the solder. Pre-heating at $150+/-10^{\circ}\text{C}$ for 1 to 2min Initial measurements prior to test shall be performed after the thermal Pre-conditioning specified in Remarks (1). Final measurements shall be made after the specimens have been left at room temperature as per Table3.	
		Change rate from initial value	A, AN	Within $+/-2.5\%$ or $+/-0.25\text{pF}$ whichever is larger.		
			C N	Within $+/-7.5\%$		
			F N	Within $+/-20\%$		
		Dielectric loss tangent	Within specified initial value.			
		Insulation resistance	Within specified initial value.			
		Withstanding voltage	No defects shall be allowed.			
9	End termination adherence		Without peeling or sign of peeling shall be allowed on the end terminations.		As per 4.13 of JIS C 5101-1. As per 4.8 ofJIS C 5101-10 A 2N weight for $10+/-1\text{s}$ shall be applied to the soldered specimens as shown by the arrow mark in the below sketch.

[Remarks]

Pre-conditioning

If specified in test method of as per 3(Performance and test method), capacitors of CN, FN characteristics shall be pre-conditioned as follows.

(1) Thermal pre-conditioning

Prior to initial measurements, specimens shall be conditioned at a temperature of $150 \pm 10^{\circ}\text{C}$ for a period of 1hr., and shall be allowed to stabilize at room temperature for 48+/-4h

(2) Voltage pre-conditioning

Prior to initial measurements, voltage specified as a test condition shall be applied to specimens for a period of 1hr., and the specimens shall be allowed to stabilize at room temperature for 48+/-4h

Ceramic capacitors

●Packaging specifications

Taping dimensions

Diagram of a carrier tape showing dimensions C, D, E, F, G, H, J, d, t, and t₁. The tape has a wavy left edge and a straight right edge. The dimensions are defined as follows:

- C: Distance between the center of the first and second components.
- D: Distance between the center of the first and second components.
- E: Distance between the center of the first and second components.
- F: Distance between the center of the first and second components.
- G: Distance between the center of the first and second components.
- H: Distance between the center of the first and second components.
- J: Distance between the center of the first and second components.
- d: Distance between the center of the first and second components.
- t: Thickness of the tape.
- t₁: Thickness of the tape.

Dimensions (Unit : mm)

Symbol	C	D	E	F	G	H	J	d	t	t ₁
Dimensions	8.0 +/-0.2	3.5 +/-0.05	1.75 +/-0.1	2.0 +/-0.05	2.0 +/-0.05	4.0 +/-0.1	φ1.5 +0.1/-0	0.37 +/-0.02	0.42 +/-0.02	0.5 MAX.

Symbol Style	A	B
MCH03	0.37 +/-0.03	0.67 +/-0.03

(Unit : mm)

Reel dimensions

Diagram of a reel showing dimensions φ13.0±0.2, 9.0±1.0, φ60.0±1.0, and φ180±1.5. The reel has a central hub and four spokes. The dimensions are defined as follows:

- φ13.0±0.2: Inner diameter of the reel.
- 9.0±1.0: Width of the reel.
- φ60.0±1.0: Diameter of the reel.
- φ180±1.5: Diameter of the reel.

Pulling direction

Label pasting

As per EIAJ ET-7200A

(Unit : mm)

- (1) The quantity for one reel is as bellows.

Kind of reel	Series	Paper tape	
		Quantity	Symbol
φ180 reel	MCH03	15,000 pcs.	K

- (2) When the tape is pulled out towards the operator with the cover tape facing upward, the feeding holes shall be found on the right portion of the tape.
- (3) Specification of beginning and ending of the tape are as follows.
- Ending(reel's center) : Approx. 300mm (no chips)
- Beginning(reel's round) : Approx. 270mm (no chips)
- : Approx. 30mm (no pasted tape)
- : Approx. 260mm (cover tape only)
- (4) No juncture of tape shall be allowed.
- (5) The share strength of tape shall be more than 5N at the break down strength.
- (6) The peel strength of the cover tape shall be 0.1 to 0.7(N) when the cover tape are peeled 0 to 15° degree from the surface.
- (7) The number of missing components shall not exceed 0.1% of the total number of components (marked number) or one whichever is the larger, and no consecutive missing exceeding two is allowed.
- (8) The reels made from resin shall be used, as per EIAJ ET-7200A.

●Marking

No marking shall be performed on the chip.

Trademark, parts number, quantity, lot No. , and country of origin shall be labeled on each reel, bulk case.

●Numbering system for LOT No.

Example	<u>03</u>	<u>01</u>	<u>A0001</u>	<u>J</u>
	(1)	(2)	(3)	(4)

- (1) The end of the Christian Era <two digits> of production finish.
- (2) Week in completing part of production finish.
- (3) Manufacture continuity number.
- (4) The symbol of manufacturing plant.

The Figure below is label expression

< Label Example > Part Number : MCH032A470JK

The diagram shows a rectangular label with the following content and callouts:

- ① Points to the top part of the label containing the part number **MCH032A470JK**.
- ② Points to a small square box to the left of the text **15,000pcs 0501 00001F**.
- ③ Points to the text **15,000pcs 0501 00001F**.
- ④ Points to a QR code in the top right corner.

Ceramic capacitors

●Packing method

1) ϕ 180mm Reel

< Packaging unit >

Symbol	K
Quantity of reel in interior box	5
Quantity of reel in box of R-26	20

Dimensions	Packaging	
	R-26	interior box of R-26
A (A')	195	185
B (B')	255	60
C (C')	190	185

(Unit : mm)

< Appearance >

Carton

< Accumulation >

You must do accumulation by ten boxes

< Packaging slip >

1. Customer
2. Parts number
3. Quantity
4. Box quantity
5. Trade mark

●Weight / Piece

(Unit : mg)

Size	Item	Thickness	Characteristic	Weight / Piece
0603 (0201)	MCH03	0.3mm	A, AN	0.3
			CN	0.3
			FN	0.3

(Note) The measured values in the table are for reference only.
Actual weight of these chips may vary slightly lot by lot.

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
