INSTRUMENTS

## FEATURES

- Specified Break-Before-Make Switching
- Low ON-State Resistance ( $0.75 \Omega$ Max)
- Control Inputs Referenced to $\mathrm{V}_{10}$
- Low Charge Injection
- Excellent ON-State Resistance Matching
- Low Total Harmonic Distortion (THD)
- 2.25-V to $5.5-\mathrm{V}$ Power Supply ( $\mathrm{V}_{+}$)
- $1.65-\mathrm{V}$ to $1.95-\mathrm{V}$ Logic Supply ( $\mathrm{V}_{10}$ )
- Latch-Up Performance Exceeds 100 mA Per JESD 78, Class II
- ESD Performance Tested Per JESD 22
- 4000-V Human-Body Model (A114-B, Class II)
- 1000-V Charged-Device Model (C101)
- 400-V Machine Model (A115-A)
- COM Port to GND
- 8000-V Human-Body Model
(A114-B, Class II)
- $\pm 15-\mathrm{kV}$ Contact Discharge (IEC 61000-4-2)

## APPLICATIONS

- Cell Phones
- PDAs
- Portable Instrumentation

YZT PACKAGE (BOTTOM VIEW)

## DESCRIPTION/ORDERING INFORMATION

The TS5A6542 is a single-pole double-throw (SPDT) analog switch that is designed to operate from 2.25 V to 5.5 V . The device offers a low ON-state resistance with an excellent channel-to-channel ON-state resistance matching, and the break-before-make feature to prevent signal distorion during the transferring of a signal from one path to another. The device has excellent total harmonic distortion (THD) performance and consumes very low power. These features make this device suitable for portable audio applications.

The TS5A6542 has a separate logic supply pin $\left(\mathrm{V}_{10}\right)$ operates from 1.65 V to 1.95 V . $\mathrm{V}_{\text {IO }}$ powers the control circuitry, which allows the TS5A6542 to be controlled by $1.8-\mathrm{V}$ signals.

ORDERING INFORMATION

| TA | PACKAGE ${ }^{(1)}$ |  | ORDERABLE PART NUMBER | TOP-SIDE MARKING ${ }^{(2)}$ |
| :---: | :---: | :---: | :---: | :---: |
| $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$ | NanoFree ${ }^{\text {TM }}$ - WCSP (DSBGA) 0.23-mm Large Bump - YZT (Pb-free) $0.625-\mathrm{mm}$ max height | Tape and reel | TS5A6542YZTR | _ _ _ JH7 |

(1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.
(2) YZT: The actual top-side marking has three preceding characters to denote year, month, and sequence code, and one following character to designate the assembly/test site. Pin 1 identifier indicates solder-bump composition ( $1=\mathrm{SnPb}, \bullet=\mathrm{Pb}$-free).

| SUMMARY OF CHARACTERISTICS ${ }^{(1)}$ |  |
| :---: | :---: |
| Configuration | 2:1 Multiplexer/Demultiplexer $(1 \times \text { SPDT })$ |
| Number of channels | 1 |
| ON-state resistance ( $\mathrm{r}_{\text {on }}$ ) | $0.75 \Omega$ max |
| ON-state resistance match ( $\Delta \mathrm{r}_{\text {on }}$ ) | $0.1 \Omega$ max |
| ON-state resistance flatness [( $\left.\mathrm{ron}_{\text {oflat }}\right)$ ] | $0.1 \Omega$ max |
| Turn-on/turn-off time ( $\mathrm{t}_{\text {on }} / \mathrm{toFF}^{\text {) }}$ | $25 \mathrm{~ns} / 20 \mathrm{~ns}$ |
| Charge injection $\left(\mathrm{Q}_{\mathrm{C}}\right)$ | 15 pC |
| Bandwidth (BW) | 43 MHz |
| OFF isolation ( $\mathrm{O}_{\text {ISO }}$ ) | -63 dB at 1 MHz |
| Crosstalk ( $\mathrm{X}_{\text {TALK }}$ ) | -63 dB at 1 MHz |
| Total harmonic distortion (THD) | 0.004\% |
| Leakage current [ ${ }_{\text {NO(OFF) }} / l_{\text {NC(OFF) }}$ ] | 20 nA |
| Package option | 8-pin WCSP |

(1) $\mathrm{V}_{+}=5 \mathrm{~V}, \mathrm{~T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) The algebraic convention, whereby the most negative value is a minimum and the most positive value is a maximum
(3) All voltages are with respect to ground, unless otherwise specified.
(4) The input and output voltage ratings may be exceeded if the input and output clamp-current ratings are observed.
(5) This value is limited to 5.5 V maximum.
(6) Requires clamp diodes on analog port to $\mathrm{V}_{+}$
(7) Pulse at 1 -ms duration $<10 \%$ duty cycle
(8) The package thermal impedance is calculated in accordance with JESD 51-7.

## PACKAGING INFORMATION

| Orderable Device | Status $^{(1)}$ | Package <br> Type | Package <br> Drawing | Pins Package <br> Qty | Eco Plan ${ }^{(2)}$ | Lead/Ball Finish | MSL Peak Temp ${ }^{(3)}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TS5A6542YZPR | ACTIVE | WCSP | YZP | 8 | 3000 |  <br> no Sb/Br) | SNAGCU | Level-1-260C-UNLIM |

${ }^{(1)}$ The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.
${ }^{(2)}$ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS \& no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The $\mathrm{Pb}-\mathrm{Free} / \mathrm{Green}$ conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed $0.1 \%$ by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb -Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb -Free (RoHS compatible) as defined above.
Green (RoHS \& no $\mathbf{S b} / \mathbf{B r}$ ): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants ( Br or Sb do not exceed $0.1 \%$ by weight in homogeneous material)
${ }^{(3)}$ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer:The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

NOTES: A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
B. This drawing is subject to change without notice.
C. NanoFree ${ }^{\text {TM }}$ package configuration.
D. This package is lead-free. Refer to the 8 YEP package (drawing 4204725) for tin-lead (SnPb).

NanoFree is a trademark of Texas Instruments.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to Tl's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with Tl's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI .

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. Tl is not responsible or liable for such altered documentation.

Resale of Tl products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. Tl is not responsible or liable for any such statements.
