

- **Excellent Size-to-Performance Ratio**
- **Hermetic 13.3 x 6.5 mm Surface-mount Case**
- **Complies with Directive 2002/95/EC (RoHS)**

SF2066B

176.00 MHz SAW Filter

SMP-53

Absolute Maximum Ratings

Rating	Value	Units
Maximum Incident Power in Passband	+10	dBm
Max. DC voltage between any 2 terminals	30	VDC
Storage Temperature Range	-40 to +85	°C
Suitable for lead-free soldering - Max. Soldering Profile	260°C for 30 s	

Electrical Characteristics

Characteristic	Sym	Notes	Min	Typ	Max	Units
Nominal Center Frequency	f_c	1	176.00			MHz
Passband Insertion Loss at f_c	IL	1, 2		8	11	dB
1 db Bandwidth	BW ₁		3.3	4.0		MHz
3 db Bandwidth	BW ₃			4.7	5.0	
20 db Bandwidth	BW ₂₀			5.9	6.2	
30 db Bandwidth	BW ₃₀			6.2	6.5	
40 db Bandwidth	BW ₄₀			6.5	6.8	
Passband Variation CF±1.7 MHz				0.4	1.0	dB
Group Delay Variation				55	150	nsec
Ultimate Rejection at CF±3.5 MHz			35	43		dB
at CF±7 MHz			45	51		
at CF±30 MHz			40	49		
12 MHz			70	81		
100 MHz			60	70		
376 MHz			60	70		
Operating Temperature Range	T _A		-40		80	°C
Frequency Temperature Coefficient	FTC	1		0.32		ppm/°C ²

Impedance Matching to 50Ω Unbalanced	External L-C
Case Style	SMP-53 13.3 x 6.5 mm Nominal Footprint
Lid Symbolization (YY = year, WW = week)	RFM SF2066B YYWW

Notes:

1. Unless noted otherwise, all specifications apply over the operating temperature range with filter soldered to the specified demonstration board with impedance matching to 50 Ω and measured with 50 Ω network analyzer.
2. Unless noted otherwise, all frequency specifications are referenced to the nominal center frequency, f_c .
3. The design, manufacturing process, and specifications of this filter are subject to change.
4. The turnover temperature, T_O, is the temperature of maximum (or turnover) frequency, f_o . The nominal frequency at any case temperature, T_C, may be calculated from: $f=f_o[1-FTC(T_o-T_C)^2]$.
5. US and international patents may apply.
6. Electrostatic Sensitive Device. Observe precautions for handling.

Symbol	A	N	C	D	B	W ₁	W ₂
Dimension	330 ⁺⁰ ₋₄	100 ^{±2}	13 ^{+0.5} _{-0.2}	20.2 ^{+1.5} ₋₀	2 ^{±0.5}	24.4 ⁺² ₋₀	30.4 MAX

Dimensional drawing of the reel

Additional items**(1) Cover tape peeling strength**

The cover tape shall be adhered evenly to the carrier tape along both sides in the pulling direction.

The cover tape peeling strength shall be as follows for an angle between the cover tape and the pulling direction of 165° to 180° (see the figure) and a peeling speed of 300mm/min. ± 10 mm/min.

[EIA-481] 0.1N to 1.3N for a tape width of 12 to 56mm

**Fixing method**

1. Insert the tip of the carrier tape into the groove.
2. Fix the tip of the cover tape with adhesive tape.

Tape material

- (1) Carrier tape [anti-charging treatment: carbon used] Surface resistivity: 1×10^8 or less

Material: Polystyrene or Polycarbonate

- (2) Cover tape material: Polyester (anti-charging treated) Surface resistivity: 1×10^{12} or less

t = 50 to 100μm width = 13.3mm

Warranty periods

Cover tape peeling strength and mounting performance of stored components.

2-1. Cover tape peeling strength: One year after delivery (Peeling strength: 0.1N to 1.3N)

Number of missing components

There shall not be two or more consecutive missing components. Also, the maximum number of missing components shall be the larger of one piece or 0.1%.

Storage environment

Keep the product on which taping has been performed to a temperature below 40°C and a humidity within 80% RH. Do not subject in the direct sun.

Labeling

The following items are labeled on the surface of a reel.

Product Part Number, Date Code, Quantity

Reel labels shall follow the format shown below. The long side of the label must measure between 2.75 and 4.0 inches (68 to 100 mm). The short side of the label must measure between 1.5 and 2 inches (38 to 80 mm). Bar codes must conform to AIAG standard B10.

Information that is on the label:

Device Type: RFM part number

Code: RFM designated part ID or part date code

Reel ID: Manufacturing reel identification

Reel Qty: Quantity of parts on the reel

Work Order: Manufacturing work order number

Date: Date product was loaded on tape and reel.

Company Identification: R. F. Monolithics, Inc.

*Q. C.: Area for QA stamps, other information is required

Country of assembly

Examples of acceptable reel labels

Location of label on reel is shown below. Reel labels must be placed entirely on plastic, without covering open sections of the reel. Design of reel must satisfy this requirement. Pin #1 must be located on the side opposite the reel label.

Package for Shipment
