Description

The RA26 RF amplifier is a discrete hybrid design, which uses thin film manufacturing processes for consistent performance and high reliability. This 3 stage bipolar transistor feedback amplifier design displays impressive performance over a broadband frequency range. An active DC biasing network insures temperature-stable performance. The TO-8B package is hermetically sealed, and MIL-STD-883 environmental screening is available. The device is also available in an SMA connectorized housing assembly, which can be purchased as a self assembly kit.
