

EMIF09-SD01F3

IPAD™

9 line EMI filter and ESD protection

Main application

- Secure digital memory card in mobile phones and communication systems

Description

The EMIF09-SD01F3 is a highly integrated array designed to suppress EMI/RFI noise for secure digital memory cards. The EMIF09-SD01F3 is in a flip chip package to offer space saving and high RF performance.

This low-pass filter includes ESD protection circuitry, which prevents damage to the protected device when subjected to ESD surges up to 15 kV. This filter also has a low line capacitance to be compatible with high data rate signals.

Benefits

- 9 line EMI low-pass filter and ESD protection
- High efficiency in EMI filtering
- Lead free package
- 400 µm pitch
- Very low PCB space consumption: < 4 mm²
- Very thin package: 0.6 mm
- High reliability offered by monolithic integration
- Reduction of parasitic elements thanks to CSP integration.

Pin Configuration (bump side)

Complies with the following standards:

IEC 61000-4-2:

- Level 4 on external pins 15 kV (air discharge)
8 kV (contact discharge)
- Level 2 on internal pins 2 kV (air discharge)
2 kV (contact discharge)

MIL STD 883F - Method 3015.7 Class 3

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect . The category of second level interconnect is marked on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.
