Notes:

1. all parameters NOT specifically mentioned are measured at 230Vac input, rated load, 25°C ambient
2. ripple & noise are measured at 20MHz by using a 12" twisted pair terminated with a 0.1μF & 47 μF capacitor
3. tolerance includes set up tolerance, line regulation, load regulation
4. please refer to OLP characteristics.
5. derating may be needed under low input voltage. Please check the derating curve for more details
6. output voltage can be adjusted through the SVR1 on the PCB; limit of output constant current level can be adjusted through the SVR2 on the PCB
