DEVICE MARKING INFORMATION

See specific marking information in the device marking column of the Electrical Characteristics tables starting on page 3 of this data sheet.

MAXIMUM RATINGS

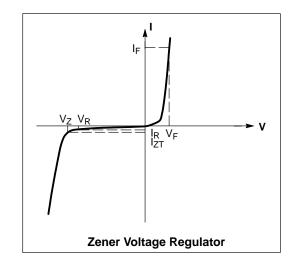

| Rating | Symbol | Max | Unit |
|---|-----------------------------------|----------------|------|
| Total Device Dissipation FR–5 Board, @ $T_A = 25^{\circ}C$ | P _D | 100 | mW |
| Junction and Storage Temperature Range | T _J , T _{stg} | –65 to +150 | °C |

Maximum ratings are those values beyond which device damage can occur. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and are not valid simultaneously. If these limits are exceeded, device functional operation is not implied, damage may occur and reliability may be affected.
