

FEATURES

- High-Bandwidth Data Paths – Up to 800 MHz
- Specified Break-Before-Make Switching
- Control Inputs Reference to V_{IO}
- Low Charge Injection
- Excellent ON-State Resistance Matching
- Low Total Harmonic Distortion (THD)
- 2.3-V to 3.6-V Power Supply (V_+)
- 1.65-V to 1.95-V Logic Supply (V_{IO})
- Latch-Up Performance Exceeds 100 mA Per JESD 78, Class II
- ESD Performance Tested Per JESD 22
 - 4000-V Human-Body Model (A114-B, Class II)
 - 1000-V Charged-Device Model (C101)
 - 200-V Machine Model (A115-A)

APPLICATIONS

- Cell Phones
- PDAs
- Portable Instrumentation
- Low-Voltage Differential Signal Routing

DESCRIPTION/ORDERING INFORMATION

The TS3DS26227 is a dual single-pole double-throw (SPDT) analog switch that is designed to operate from 2.3 V to 3.6 V. The device offers high-bandwidth data paths, and a break-before-make feature to prevent signal distortion during the transferring of a signal from one path to another. The device has excellent total harmonic distortion (THD) performance and consumes very low power. These features make this device suitable for portable applications.

The TS3DS26227 has a separate logic supply pin (V_{IO}) that operates from 1.65 V to 1.95 V. V_{IO} powers the control circuitry, which allows the TS3DS26227 to be controlled by 1.8-V signals.

ORDERING INFORMATION

T_A	PACKAGE ⁽¹⁾⁽²⁾		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 85°C	NanoFree™ – WCSP (DSBGA) 0.23-mm Large Bump – YZT (Pb-free) 0625-mm max height	Tape and reel	TS3DS26227YZTR	267

(1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

(2) YZT: The actual top-side marking has three preceding characters to denote year, month, and sequence code, and one following character to designate the assembly/test site. Pin 1 identifier indicates solder-bump composition (1 = SnPb, • = Pb-free).

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

NanoFree is a trademark of Texas Instruments.

TS3DS26227

HIGH-BANDWIDTH DUAL-SPDT DIFFERENTIAL SIGNAL SWITCH WITH INPUT LOGIC TRANSLATION

SCDS234–SEPTEMBER 2006

SUMMARY OF CHARACTERISTICS⁽¹⁾

Configuration	Dual 2:1 Multiplexer/Demultiplexer (2 × SPDT)
Number of channels	2
ON-state resistance (r_{on})	5 Ω max
ON-state resistance match (Δr_{on})	0.1 Ω max
ON-state resistance flatness [$r_{on(Flat)}$]	3 Ω max
Turn-on/turn-off time (t_{ON}/t_{OFF})	9 ns/4 ns
Break-before-make time (t_{BBM})	8 ns
Charge injection (Q_C)	5.5 pC
Bandwidth (BW)	800 MHz
OFF isolation (O_{ISO})	–40 dB
Crosstalk (X_{TALK})	–39 dB
Leakage current [$I_{NO(OFF)}/I_{NC(OFF)}$]	± 5 nA
Power-supply current (I_+)	± 20 nA
Package options	12-bump WCSP

(1) $V_+ = 2.7$ V, $T_A = 25^\circ\text{C}$

FUNCTION TABLE

IN	NC TO COM, COM TO NC	NO TO COM, COM TO NO
L	ON	OFF
H	OFF	ON

Absolute Maximum Ratings⁽¹⁾⁽²⁾

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
V_+ V_{IO}	Supply voltage range ⁽³⁾	−0.5	4.6	V
V_{NC} V_{NO} V_{COM}	Analog voltage range ⁽³⁾⁽⁴⁾⁽⁵⁾	−0.5	$V_+ + 0.5$	V
I_K	Analog port diode current	$V_{NC}, V_{NO}, V_{COM} < 0$, or $V_{NC}, V_{NO}, V_{COM} > V_+ + 0.5$		−50 50 mA
I_{NC} I_{NO} I_{COM}	On-state switch current	$V_{NC}, V_{NO}, V_{COM} = 0$ to V_+		−64 64 mA
	On-state peak switch current ⁽⁶⁾	−100 100		
V_I	Digital input voltage range	−0.5	$V_{IO} + 0.5$	V
I_{IK}	Digital input clamp current ⁽³⁾⁽⁴⁾	$V_I < 0$, or $V_I > V_{IO} + 0.5$		−50 50 mA
I_+ I_{GND}	Continuous current through V_+ or GND	−100	100	mA
θ_{JA}	Package thermal impedance ⁽⁷⁾⁽⁸⁾		TBD	°C/W
T_{stg}	Storage temperature range	−65	150	°C

- (1) Stresses above these ratings may cause permanent damage. Exposure to absolute maximum conditions for extended periods may degrade device reliability. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those specified is not implied.
- (2) The algebraic convention, whereby the most negative value is a minimum and the most positive value is a maximum
- (3) All voltages are with respect to ground, unless otherwise specified.
- (4) The input and output voltage ratings may be exceeded if the input and output clamp-current ratings are observed.
- (5) This value is limited to 5.5 V maximum.
- (6) Requires clamp diodes on analog port to V_+
- (7) Pulse at 1-ms duration <10% duty cycle
- (8) The package thermal impedance is calculated in accordance with JESD 51-7.

PACKAGING INFORMATION

Orderable Device	Status ⁽¹⁾	Package Type	Package Drawing	Pins	Package Qty	Eco Plan ⁽²⁾	Lead/Ball Finish	MSL Peak Temp ⁽³⁾
TS3DS26227YZTR	ACTIVE	DSBGA	YZT	12	3000	Green (RoHS & no Sb/Br)	SNAGCU	Level-1-260C-UNLIM

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
