

RHF43B

RAD-hardened precision bipolar single operational amplifier

Features

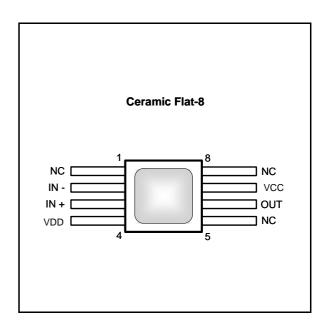

- High immunity to radiations, 300kRad TID; SEL immune at 68MeV/cm²/mg LET ions.
- Rail-to-rail input/output
- 8MHz gain bandwidth at 16V
- Stable for gain ≥ 5
- Low input offset voltage: 100µV typ
- Supply current: 2.2mA typ
- Operating from 3V to 16V
- Input bias current: 30nA typ
- ESD internal protection ≥ 2kV
- Latch-up immunity: 200mA
- Soon RHA QML-V qualified with smd n° 5962-062xx

Description

The RHF43B is a precision bipolar operational amplifier available in hermetic 8-pin flat package and in die form. In addition to its low offset voltage, rail-to-rail feature, wide supply voltage, the RHF43B is designed for increased tolerance to radiation. Its intrinsic ELDRS-free rad-hard design allows this product to be used in space environment and in applications operating in harsh environments.

Applications

- Space probes and satellites
- Defense systems
- Scientific instrumentation
- Nuclear systems

1

Absolute maximum ratings and operating conditions

| Symbol | Parameter | Value | Unit | |
|-------------------|---|----------------------------|--------------------------|--|
| V _{CC} | Supply voltage ⁽¹⁾ | 18 ±9 | V | |
| V _{id} | Differential input voltage (2) | ±1.2 | V | |
| V _{in} | Input voltage range ⁽³⁾ | V _{DD} -0.3 to 16 | V | |
| I _{IN} | Input current | 45 | mA | |
| T _{stg} | Storage temperature | -65 to +150 | °C | |
| R _{thja} | Thermal resistance junction to ambient ⁽⁴⁾⁽⁵⁾ | 125 | °C/W | |
| R _{thjc} | Thermal resistance junction to case ⁽⁴⁾⁽⁵⁾ | 80 | °C/W | |
| Тj | Maximum junction temperature | 150 | °C | |
| ESD | HBM: human body model ⁽⁶⁾ | 2 | kV | |
| | Latch-up immunity | 200 | mA | |
| | Lead temperature (soldering, 10 sec) | 260 | °C | |
| Radiation | related parameters | | | |
| | Low dose rate of 0.01 rad.sec ⁻¹ | 300 | kRad | |
| | High dose rate of 50-300 rad.sec ⁻¹ | 300 | kRad | |
| | Heavy ion latch-up (SEL) immune with heavy ions characterized by: | 68 | MeV.cm ⁻² .mg | |
| | Neutron immunity | 2 ⁺¹⁴ | n.cm ⁻² | |

Table 1. Absolute maximum ratings (AMR)

1. All values, except differential voltage are with respect to network terminal.

2. Differential voltages are the non-inverting input terminal with respect to the inverting input terminal.

3. The magnitude of input and output terminal must never exceed V_{CC}+0.3V.

4. Short-circuits can cause excessive heating and destructive dissipation.

5. R_{th} are typical values.

6. Human body model: 100pF discharged through a $1.5 k\Omega$ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.

Table 2.Operating conditions

| Symbol | Parameter | Value | Unit |
|-------------------|--------------------------------------|----------------------|------|
| V _{CC} | Supply voltage | 3 to 16 | V |
| V _{icm} | Common mode input voltage range | V_{DD} to V_{CC} | V |
| T _{oper} | Operating free air temperature range | -55 to +125 | °C |

2 Electrical characteristics

Table 3. $V_{CC} = +16V$, $V_{DD} = 0V$, $V_{icm} = V_{CC}/2$, $T_{amb} = 25^{\circ}C$, R_L connected to $V_{CC}/2$ (unless
otherwise specified)

5 Revision history

Table 6.Document revision history

| Date | Revision | Changes |
|-------------|----------|---|
| 21-May-2007 | 1 | First public release. |
| 10-Dec-2007 | 2 | Changed name of pins on pinout diagram on cover page. Modified supply current values over temperature range in electrical characteristics. Power dissipation removed from AMR table. |
| 29-Jan-2008 | 3 | Added ELRS-free rad-hard design in description on cover page. Modified description of heavy ion latch-up (SEL) immunity parameter in <i>Table 1</i> on page 2. |
