

5 AMP, 3-TERMINAL, FIXED NEGATIVE VOLTAGE REGULATORS

IP1R19A, IP3R19A, IP1R19, IP3R19

T-58-11-13

DESCRIPTION

4

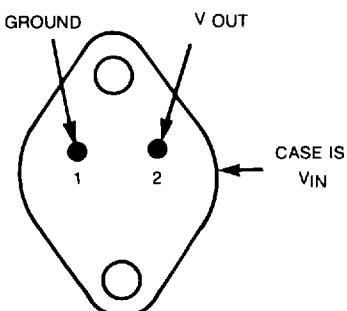

The IP1R19A/IP3R19A and IP1R19/IP3R19 series of fixed three terminal negative regulators are capable of delivering 5 amps of load current, and are available with several convenient output voltages. The A-suffix devices provide 0.01%/V line regulation, 0.5% load regulation, and a $\pm 1\%$ output voltage tolerance at room temperature. Over all specified operating conditions (load, line, power, and temperature), the output voltage is guaranteed not to vary by more than $\pm 3\%$. Protection features include safe operating area current limiting for the output power transistor, and thermal shutdown. The entire series of regulators is available in a TO-3 package, and the commercial version is also available in a convenient, low cost plastic TO-218 package.

FEATURES

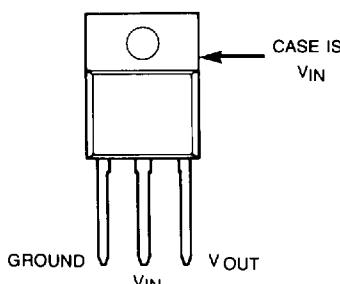

- 5 Amp output current capability
- $\pm 1\%$ Output tolerance at room temperature (A suffix)
- 0.01%/V Line regulation
- 0.5% Load regulation
- -5, -5.2, -12, -15 Volt fixed output voltages available
- Short circuit current limit protection
- Safe operating area protection
- Thermal shutdown protection
- Available in convenient, low cost plastic TO-218 package

IP1R19A, IP3R19A, IP1R19, IP3R19

5 AMP, 3-Terminal, Fixed Negative Voltage Regulators

ABSOLUTE MAXIMUM RATINGS

T-58-11-13

Input Voltage (V_{OUT} = -5, -5.2, -12, or -15V)

35V

Operating Junction Temperature Range

IP1R19A/IP1R19

-55°C to + 150°C

IP3R19A/IP3R19

0°C to + 125°C

Power Dissipation

Internally Limited

Storage Temperature Range

-65°C to + 150°C

Lead Temperature (Soldering, 10 sec)

300°C

Absolute maximum ratings are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the device should be operated at these limits. The electrical characteristics provide conditions for actual device operation.

ELECTRICAL CHARACTERISTICS

		V Package			1.0	1.5		1.0	$^{\circ}C/W$
									$^{\circ}C/W$

The ● denotes specifications which apply over the full operating junction temperature range. All others apply at $T_{CASE} = 25^{\circ}C$ unless otherwise specified.

Note 1: Unless otherwise specified, $V_{IN} = -10V$, $I_{OUT} = -2.5A$. Although power dissipation is internally limited, these specifications apply for dissipations up to 50W.

Note 2: Load and line regulation are electrically independent and are measured using pulse testing techniques at low duty cycle in order to maintain constant junction temperature. To determine the effects on the output voltage due to device heating refer to the thermal regulation specification.
