Regulating Pulse Width Modulators

7-58-11-31

Section 2 - Pulse Width Modulators
 IP35060A, IP33060A, IP34060A,
 IP35060, IP33060, IP34060

Description

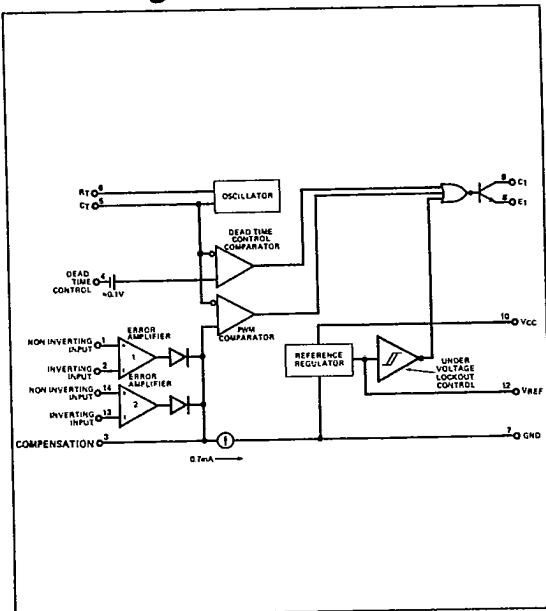

The IP35060A series of switching regulator control circuits contain all the functions required to implement single-ended switching regulators. Included are voltage reference, two error amplifiers, oscillator, PWM comparator, uncommitted output driver, dead-time control and under voltage lockout circuitry.

Although pin-compatible with the industry standard MC35060 and MC34060, Integrated Power has incorporated several improvements in the IP35060A and IP34060A allowing tighter and more complete specification of electrical performance.

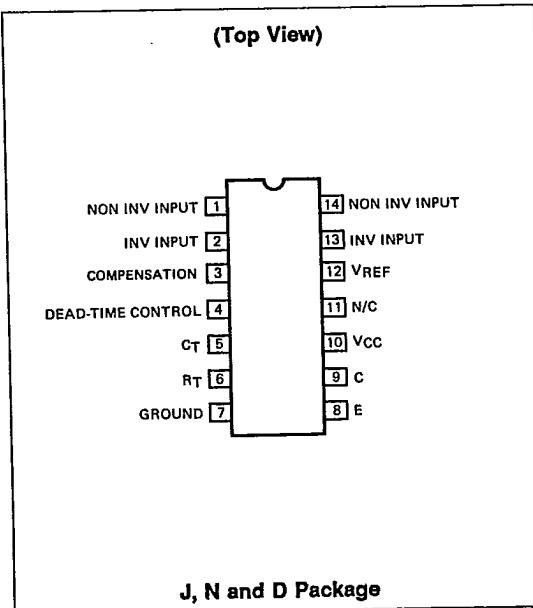

Features

- Guaranteed $\pm 1\%$ reference voltage tolerance (A series)
- Guaranteed 10% frequency tolerance
- Undervoltage lockout with hysteresis
- Fully specified temperature performance
- Interchangeable with MC35060 and MC34060 for improved performance

Absolute Maximum Ratings

Supply Voltage (+V_{CC})	+45V	Power Dissipation at	
Amplifier Input Voltage	V _{CC} +0.3V	T _A = +25°C (Note 1)	1000mW
Collector Output Voltage	+45V	T _C = +25°C (Note 2)	2000mW
Output Current	250mA	Storage Temperature Range	-65°C to +150°C

Absolute maximum ratings are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the device should be operated at these limits. The electrical characteristics provide conditions for actual device operation.

Recommended Operating Conditions (Note 3)

Supply Voltage (+V_{CC})	7 to 40V	Reference Output Current	0 to 10 mA
Error Amplifier Input Voltage	-0.3 to V _{CC} -2V	Oscillator Frequency	1kHz to 300kHz
Collector Output Voltage	0 to 40V	Oscillator Timing Capacitor	0.47nF to 10μF
Collector Output Current	0 to 200 mA	Oscillator Timing Resistor	1.8kΩ to 500kΩ
Current into Feedback Terminal	0 to 0.3 mA	Operating Ambient Temperature Range:	
		IP35060A, IP35060	-55°C to +125°C
		IP33060A, IP33060	-40°C to +85°C
		IP34060A, IP34060	0°C to +70°C

Note 1. Derate at 10mW/°C for ambient temperatures above +50°C.

Note 2. Derate at 16mW/°C for case temperatures above +25°C.

Note 3. Range over which the device is functional and parameter limits are guaranteed.

Electrical CharacteristicsV_{CC} = 15V, f = 10kHz unless otherwise specified.
