

1.5 AMP POSITIVE ADJUSTABLE REGULATORS

IP117A, IP117, LM117, IP117AHV, IP317AHV, IP117HV, LM117HV, IP317HV

DESCRIPTION

The IP117A Series are three terminal positive adjustable voltage regulators capable of supplying in excess of 1.5A over a 1.25V to 60V output range. These regulators are exceptionally easy to use and require only two external resistors to set the output voltage. In addition to improved line and load regulation, a major feature of the "A" series is the initial output voltage tolerance, which is guaranteed to be less than 1%. Over full operating conditions, including load, line, and power dissipation, the reference voltage is guaranteed not to vary more than 2%. These devices exhibit current limit, thermal overload protection, and improved power device safe operating area protection, making them essentially indestructible.

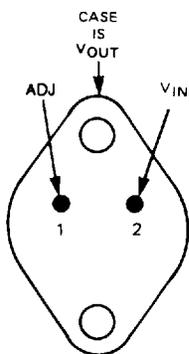

FEATURES

- Guaranteed 1% output voltage tolerance
- Guaranteed 0.3% load regulation
- Guaranteed 0.01%/V line regulation
- Internal current limiting constant with temperature
- Internal thermal overload protection
- Improved output transistor safe operating area compensation
- Output adjustable between 1.25V and 60V

1.5 AMP POSITIVE ADJUSTABLE REGULATORS**ABSOLUTE MAXIMUM RATINGS**

Power Dissipation	Internally Limited	Input to Output Voltage Differential	Non-HV 40V HV Series 60V
Operating Junction Temperature Range	117AHV/117A/117HV/117 317AHV/317HV	Storage Temperature Range	-55°C to +150°C 0°C to +125°C
		Lead Temperature (Soldering, 10 sec.)	+300°C

Absolute maximum ratings are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the device should be operated at these limits. The electrical characteristics provide conditions for actual device operation.

ELECTRICAL CHARACTERISTICS (NOTES 1 and 3)

Parameter	Test Conditions	IP117AHV IP117A			LM117HV IP117HV LM117 IP117			Units

	G Package		3	5		3	5	$^{\circ}C/W$	

The • denotes the specifications which apply over the full operating temperature range, all others apply at $T_j = 25^{\circ}C$ unless otherwise specified.

Note 1: Unless otherwise specified, $(V_{IN} - V_{OUT}) = 5V$, $I_{OUT} = 0.5A$ for the TO-3 (K), TO-257 (G), TO-66 (R) and TO-220 (T) Packages. Although power dissipation is internally limited, these specifications apply for dissipations up to 20W for the TO-3, TO-257, TO-66 and TO-220. $I_{MAX} = 1.5A$ for the TO-3, TO-66, TO-220 and TO-257.

Note 2: Regulation is measured at constant junction temperature, using pulse testing at a low duty cycle. Changes in output voltage due to heating effects are covered under thermal regulation specifications. Load regulation is measured from the bottom of the package for the TO-3, and TO-66, and at the junction of the wide and narrow portion of the output lead for the TO-220, and 1/8" below the base of the package on the output pin of the TO-257.

Note 3: $V_{MAX} = 40V$ for IP117A, IP117, LM117.
 $V_{MAX} = 60V$ for IP117AHV, IP117HV, LM117HV, IP317HV, IP317AHV.
