

## PRODUCT BULLETIN

HPM-1502  
50-1500 MHz, 2 WATT  
AMPLIFIER MODULE

(Preliminary 3/20/86)

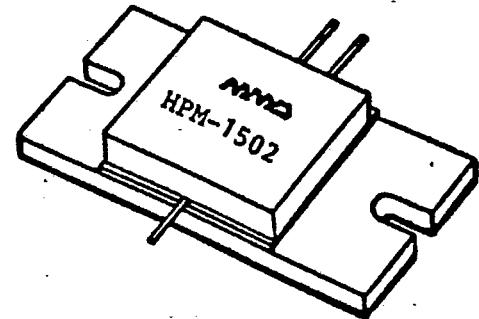

The HPM-1502 is a wideband Ga As FET amplifier which covers the 50-1500MHz frequency range and offers a typical gain of 10dB and typical output power of +34dBm at the 1dB gain compression point. The module incorporates an internal differential matching design which significantly reduces the second order intermodulation products.

Packaging of the HPM-1502 is designed for the users convenience, the "drop-in" flange configuration being ideal for efficient heat transfer and ease of mechanical layout.
