

DUAL 2-WIDE 2-INPUT AND-OR-INVERT GATE

The HEF4085B is a dual 2-wide 2-input AND-OR-invert gate, each with an additional input (A_4 or B_4) which can be used as either an expander input or an inhibit input. A HIGH on A_4 or B_4 forces the output (O_A or O_B) LOW independent of the other inputs (A_0 to A_3 or B_0 to B_3). The outputs O_A and O_B are fully buffered for highest noise immunity and pattern insensitivity of output impedance.

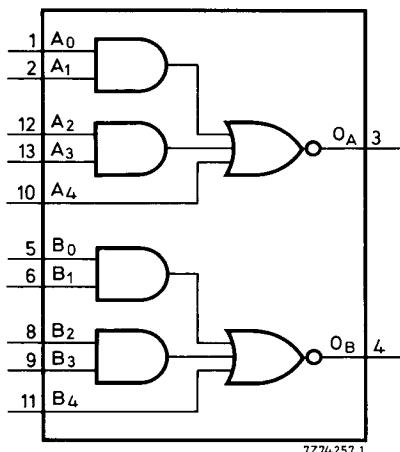

Fig. 1 Functional diagram.

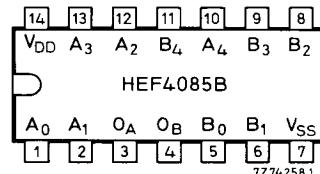

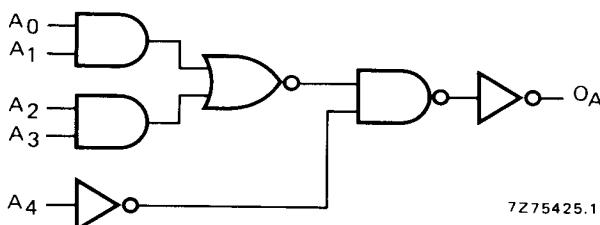

Fig. 2 Pinning diagram.

HEF4085BP : 14-lead DIL; plastic (SOT-27).
 HEF4085BD: 14-lead DIL; ceramic (cerdip) (SOT-73).
 HEF4085BT: 14-lead mini-pack; plastic (SO-14; SOT-108A).

LOGIC FUNCTION

$$O_A = \overline{A_0 \cdot A_1 + A_2 \cdot A_3 + A_4}$$

$$O_B = \overline{B_0 \cdot B_1 + B_2 \cdot B_3 + B_4}$$
