

## 8-CHANNEL ANALOGUE MULTIPLEXER/DEMULTIPLEXER

The HEF4051B is an 8-channel analogue multiplexer/demultiplexer with three address inputs ( $A_0$  to  $A_2$ ), an active LOW enable input ( $\bar{E}$ ), eight independent inputs/outputs ( $Y_0$  to  $Y_7$ ) and a common input/output ( $Z$ ).

The device contains eight bidirectional analogue switches, each with one side connected to an independent input/output ( $Y_0$  to  $Y_7$ ) and the other side connected to a common input/output ( $Z$ ).

With  $\bar{E}$  LOW, one of the eight switches is selected (low impedance ON-state) by  $A_0$  to  $A_2$ . With  $\bar{E}$  HIGH, all switches are in the high impedance OFF-state, independent of  $A_0$  to  $A_2$ .

$V_{DD}$  and  $V_{SS}$  are the supply voltage connections for the digital control inputs ( $A_0$  to  $A_2$ , and  $\bar{E}$ ). The  $V_{DD}$  to  $V_{SS}$  range is 3 to 15 V. The analogue inputs/outputs ( $Y_0$  to  $Y_7$ , and  $Z$ ) can swing between  $V_{DD}$  as a positive limit and  $V_{EE}$  as a negative limit.  $V_{DD} - V_{EE}$  may not exceed 15 V.

For operation as a digital multiplexer/demultiplexer,  $V_{EE}$  is connected to  $V_{SS}$  (typically ground).

## RATINGS

Limiting values in accordance with the Absolute Maximum System (IEC 134)

Supply voltage (with reference to V<sub>DD</sub>)V<sub>EE</sub> -18 to +0,5 V

## NOTE

To avoid drawing V<sub>DD</sub> current out of terminal Z, when switch current flows into terminals Y, the voltage drop across the bidirectional switch must not exceed 0,4 V. If the switch current flows into terminal Z, no V<sub>DD</sub> current will flow out of terminals Y, in this case there is no limit for the voltage drop across the switch, but the voltages at Y and Z may not exceed V<sub>DD</sub> or V<sub>EE</sub>.

**APPLICATION INFORMATION**

Some examples of applications for the HEF4051B are:

- Analogue multiplexing and demultiplexing.
- Digital multiplexing and demultiplexing.
- Signal gating.

**NOTE**

If break before make is needed, then it is necessary to use the enable input.
