

HD74LV161A

Synchronous 4-bit Binary Counter (Direct Clear)

HITACHI

ADE-205-264A (Z)
2nd Edition
June 1999

Description

The HD74LV161A is 4-bit binary counters. All flip flops are clocked simultaneously on the low to high to transition (positive edge) of the clock input waveform. These counters may be preset using the load input. Presetting of all four flip flops is synchronous to the rising edge of clock. When load is held low counting is disabled and the data on the A, B, C and D inputs is loaded into the counter on the rising edge clock. If the load input is taken high before the positive edge of clock the count operation will be unaffected. Low-voltage and high-speed operation is suitable for the battery-powered products (e.g., notebook computers), and the low-power consumption extends the battery life.

Features

- $V_{CC} = 2.0 \text{ V to } 5.5 \text{ V}$ operation
- All inputs V_{IH} (Max.) = 5.5 V (@ $V_{CC} = 0 \text{ V to } 5.5 \text{ V}$)
- All outputs V_O (Max.) = 5.5 V (@ $V_{CC} = 0 \text{ V}$)
- Typical V_{OL} ground bounce < 0.8 V (@ $V_{CC} = 3.3 \text{ V}$, $T_a = 25^\circ\text{C}$)
- Typical V_{OH} undershoot > 2.3 V (@ $V_{CC} = 3.3 \text{ V}$, $T_a = 25^\circ\text{C}$)
- Output current $\pm 6 \text{ mA}$ (@ $V_{CC} = 3.0 \text{ V to } 3.6 \text{ V}$), $\pm 12 \text{ mA}$ (@ $V_{CC} = 4.5 \text{ V to } 5.5 \text{ V}$)

Function Table

| Inputs | | | | | Outputs | | | |
|--------|------|-----|-----|-----|-----------|----|----|----|
| CLR | LOAD | ENP | ENT | CLK | QA | QB | QC | QD |
| L | X | X | X | X | L | L | L | L |
| H | L | X | X | ↑ | A | B | C | D |
| H | H | X | L | ↑ | No change | | | |
| H | H | L | X | ↑ | No change | | | |
| H | H | H | H | ↑ | Count up | | | |
| H | X | X | X | ↓ | No change | | | |

Note: H: High level

L: Low level

X: Immaterial

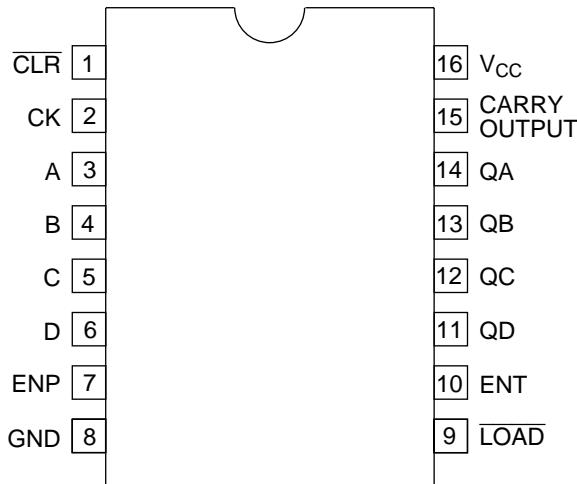

↑: Low to high transition

↓: High to low transition

A, B, C, D: Data input

Carry = ENT • QA • QB • QC • QD

Pin Arrangement

Absolute Maximum Ratings

| Item | Symbol | Ratings | Unit | Conditions |
|---|-----------------------|---------------------------------------|------|----------------------------------|
| Supply voltage range | V_{CC} | –0.5 to 7.0 | V | |
| Input voltage range ^{*1} | V_I | –0.5 to 7.0 | V | H or L |
| Output voltage range ^{*1, 2} | V_O | –0.5 to $V_{CC} + 0.5$ –0.5 to 7.0 | V | Output: H or L V_{CC} : OFF |
| Input clamp current | I_{IK} | –20 | mA | $V_I < 0$ |
| Output clamp current | I_{OK} | ±50 | mA | $V_O < 0$ or $V_O > V_{CC}$ |
| Continuous output current | I_O | ±25 | mA | $V_O = 0$ to V_{CC} |
| Continuous current through V_{CC} or GND | I_{CC} or I_{GND} | ±50 | mA | |
| Maximum power dissipation at $T_a = 25^\circ\text{C}$ (in still air) ^{*3} | P_T | 785 500 | mW | SOP TSSOP |
| Storage temperature | T_{STG} | –65 to 150 | °C | |

Notes: The absolute maximum ratings are values which must not individually be exceeded, and furthermore, no two of which may be realized at the same time.

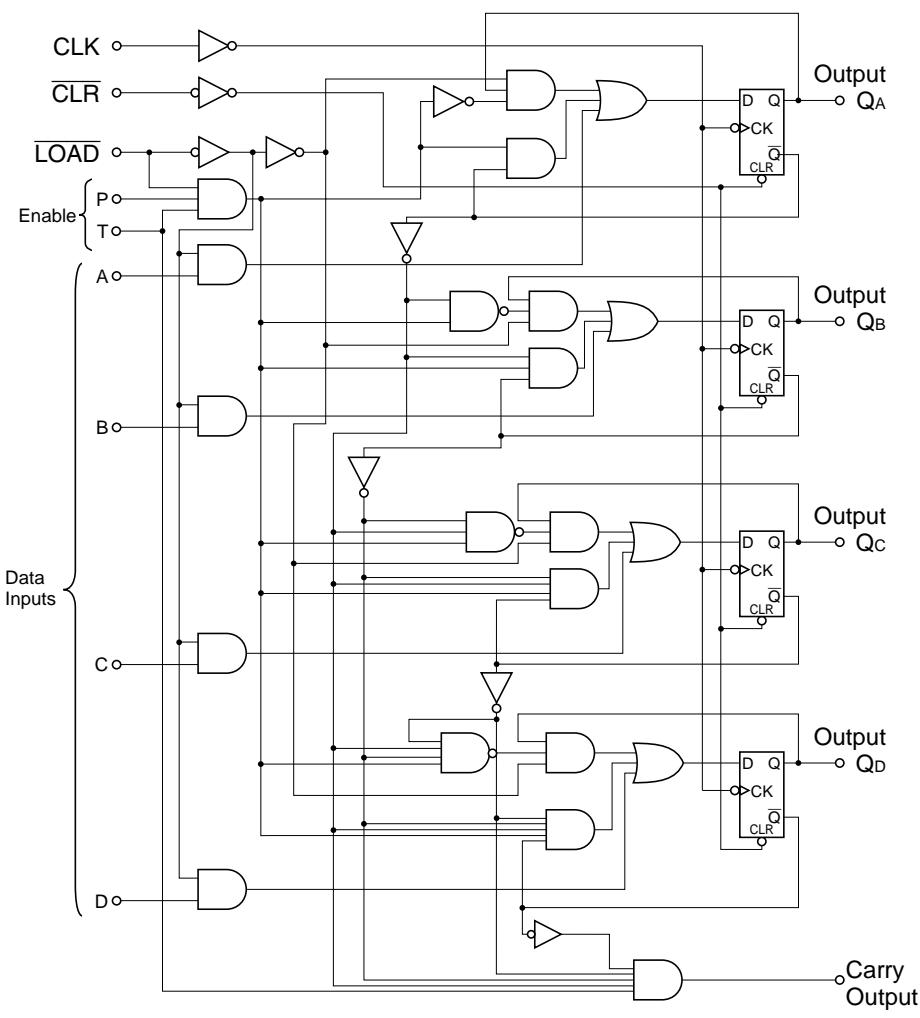

1. The input and output voltage ratings may be exceeded if the input and output clamp-current ratings are observed.
2. This value is limited to 5.5 V maximum.
3. The maximum package power dissipation was calculated using a junction temperature of 150°C.

Recommended Operating Conditions

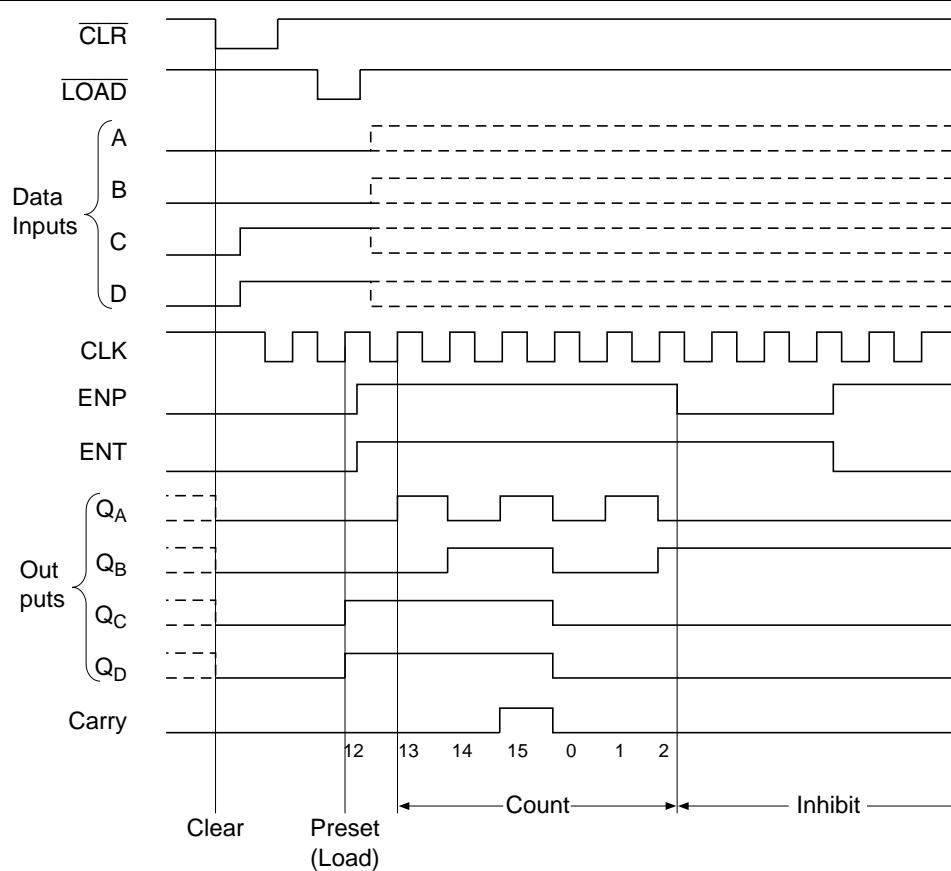

| Item | Symbol | Min | Max | Unit | Conditions |
|------------------------------------|-----------------------|-----|----------|--------------------|---------------------------------------|
| Supply voltage range | V_{cc} | 2.0 | 5.5 | V | |
| Input voltage range | V_i | 0 | 5.5 | V | |
| Output voltage range | V_o | 0 | V_{cc} | V | |
| Output current | I_{OH} | — | -50 | μA | $V_{cc} = 2.0\text{ V}$ |
| | | — | -2 | mA | $V_{cc} = 2.3\text{ to }2.7\text{ V}$ |
| | | — | -6 | | $V_{cc} = 3.0\text{ to }3.6\text{ V}$ |
| | | — | -12 | | $V_{cc} = 4.5\text{ to }5.5\text{ V}$ |
| | I_{OL} | — | 50 | μA | $V_{cc} = 2.0\text{ V}$ |
| | | — | 2 | mA | $V_{cc} = 2.3\text{ to }2.7\text{ V}$ |
| | | — | 6 | | $V_{cc} = 3.0\text{ to }3.6\text{ V}$ |
| | | — | 12 | | $V_{cc} = 4.5\text{ to }5.5\text{ V}$ |
| Input transition rise or fall rate | $\Delta t / \Delta v$ | 0 | 200 | ns/V | $V_{cc} = 2.3\text{ to }2.7\text{ V}$ |
| | | 0 | 100 | | $V_{cc} = 3.0\text{ to }3.6\text{ V}$ |
| | | 0 | 20 | | $V_{cc} = 4.5\text{ to }5.5\text{ V}$ |
| Operating free-air temperature | T_a | -40 | 85 | $^{\circ}\text{C}$ | |

Note: Unused or floating inputs must be held high or low.

Cautions

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
