

# HA1389/R

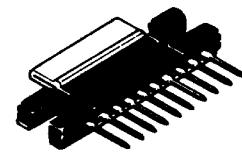

## 4 to 7W Audio Power Amplifier

Hitachi HA1389/HA1389R is a class-B power amplifier designed especially for home type stereo amplifiers encapsulated in a 10-lead single-in-line plastic package.

The HA1389/HA1389R provides an output power of 5 watts at 19 volts, and also 7 watts at 22 volts to 8 ohm load with 10 percent distortion.

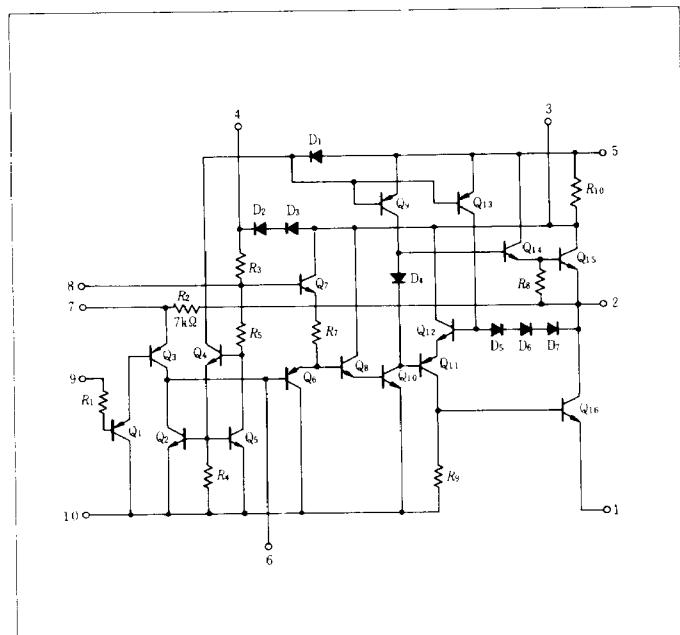

### ■ FEATURES

- Two kinds of pin configuration are available: normal (HA1389) and reverse (HA1389R) for easier layout design of pc - board when used in stereo application.
- Easy to mount a chassis by heat-sink, due to the single-in-line package with no electrical isolation
- High Output power:  
7W typ. ( $V_{CC}=22V$ ,  $R_L=8\Omega$ , THD = 10%)
- Wide Range of Supply Voltage:from 5 to 30V
- Very Low Harmonic and Crossover Distortion.
- Thermal shut-down circuit provided.
