HAND TOOLS

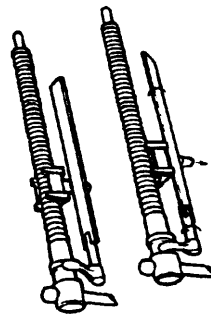

Fact Finder on: FITTERS VICES

RECORD
FITTERS VICES ARE SIMILAR
TO THE MECHANICS BUT
FEATURE A QUICK RELEASE
MECHANISM.
THEY ARE DESIGNED FOR
FITTING, FILING AND
LARGE ASSEMBLY WORK
AND ARE STANDARD
EQUIPMENT FOR
MANY INDUSTRIAL &
TRAINING
WORKSHOPS.

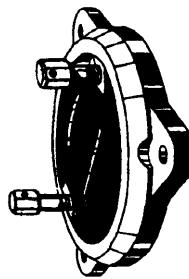

'Fused' steel
handle will
bend before
the vice
can be
overstressed.

CNC machined steel
mainscrew with
buttress thread.

This trigger controls
the Quick Release
Mechanism which
disengages the
mainscrew, allowing
the jaws to be
opened and closed
freely.

Optional 360 degree
Swivel Bases rotate &
lock the vice at the
best working angle.
They are available for
both the 23 and 25.

Fully machined on all load
bearing surfaces.

Replaceable Hardened
Steel jaws.

Batch Tested body &
slide castings
produced in Record's
own foundry.

Safety stop
prevents the
slide from
being
accidentally
separated
from the
body.

Internal,
Unbreakable
Nut takes the
load, secures &
aligns the
mainscrew and
can be replaced
when worn -
saving the cost
of replacing the
whole vice body.
