

NJM79L00

The NJM79L00 series of 3-Terminal Negative Voltage Regulators is constructed using the New JRC Planar epitaxial process. These regulators employ internal current-limiting and thermal-shutdown, making them essentially indestructible. If adequate heat sinking is provided, they can deliver up to 100mA output current. They are intended as fixed voltage regulators in a wide range of applications including local or on-card regulation for elimination of noise and distribution problems associated with single-point regulation. In addition, they can be used with power pass elements to make high-current voltage regulators. The NJM79L00 used as a Zener diode/resistor combination replacement, offers an effective output impedance improvement of typically two orders of magnitude, along with lower quiescent current and lower noise.

■ Absolute Maximum Ratings

Input Voltage	V_{IN} (79L03A~79L09A)	-30V
	(79L12A~79L15A)	-35V
	(79L18A~79L24A)	-40V
Output Current	I_o	100mA
Power Dissipation	P_D (TO-92)	500mW
	(SOT-89)	350mW
Operating Temperature Range	T_{opr}	-30~+75°C
Storage Temperature Range	T_{stg}	-40~+125°C
