F SERIES

Single Output

- Less than 1.0 mV RMS Ripple
- Linear Regulation
- Triple Fault Protection
- Low Profile 0.38 Inch High
- High Isolation
- Six-Sided Continuous Shield

The F Series consists of 16 single output DC/DC converters. All models in this series feature 500 VDC minimum isolation with only 1 mV RMS (40 mV P-P) ripple and noise. All models offer thermal shutdown plus short-circuit protection, with OVP standard on 5 volt outputs. These units are encapsulated in 2.0 \times 2.0 \times 0.38 inch six-sided metal cases for EMI/RFI suppression. A Pi-type input filter is included to reduce reflected ripple. Reliable operation is assured through the use of efficient, design-derated components and by heat-sinking all dissipating elements directly to the metal case. This permits operation from -25°C to +71°C with no derating or additional heat sinking required.
