Notes: For extensive technical information on the theory of solid state lighting see Lumex Lites catalog 84-1.

PROFILE OF LUMEX OPTO/COMPONENTS, INC.

Lumex, Inc., is a fully integrated international manufacturer and distributor of solid state, incandescent and gas tube opto/components.

Corporate Headquarters along with marketing, R&D, engineering, sales and warehousing are located in Palatine, Illinois (40 miles N.W. of Chicago). Plant locations are in Hsin Tchu Taiwan, Guang Dong China, Palatine IL, and licensees in Japan. LED indicator assembly and part selection are also performed in Palatine.

Each factory site specializes in a family of products unique in technology and manufacturing processes.

State of the art equipment and high levels of research generate a constant flow of new and exciting products.

Character Size and Order of Listing in Catalog

Products are listed in ascending order based on digit character size. Character size is measured from top to bottom of the lighted segments or the center of the top and bottom dots of matrix displays

Colors: Emitted, Viewed, Face and Segment

The colors of the display are best determined by design to offer the best contrast ratio between the lighted and unlit area for the face of the display gray. It is also available in red, orange, yellow, and green colors. The off color of the active segments or dots is determined by the color of the epoxy color used to fill the segment reflector cavities. Segments colors are milky white, yellow, red or orange. They can also be green or water clear. The color of the segment or dot when display is powered is determined by the emission wave length of the led chip used. Chips are available in Green (565nm), Yellow (585nm), Orange/Red(625nm) and Super Bright Red (660nm). The lighted segment reflector cavity epoxy must either be neutral or complimentary in color in order for the emitted light to come through the epoxy. These chips when not activated exhibit no color and resemble minute pieces of broken mirror glass.

Manufacturing Methods and Process

The components that enter into the assembly of numeric, alpha numeric or dot matrix displays are similar. They include a P.C. Board with pins or edge connector traces, a molded reflector that sits on top of the P.C. Board and the epoxy that fills the reflector cavities. These cavities represent the light-pipes for the emitted photons from the chips to travel to the surface. The epoxy with the aid of diffusion pastes and the light pipe cavities captures and bounces all the light to provide segments or dots of uniform brightness. In some cases epoxy is not used. Instead a piece of diffusion tape is placed over the open light-pipe cavities of the reflector and a cover lens is used over it. The color of the cover lens must be neutral or complimentary to the color of the light emitted by the led chip.

Brightness and color Uniformity

To assure uniformity of color and brightness the chips utilized in the assembly are preselected for intensity and color. As an additional step, Green and Yellow displays are grouped by color wave length in nine categories. See Page (5)

Intensity Selections

All units are 100 percent tested and graded for brightness, color and uniformity to assure that all segments meet a 1:1.5 intensity ratio so that variations are not detectable by human eye. Bin letter designations from C to Q categorize displays of all colors by light intensity @ 10 mA If in microcandellas. See Page(5)

Part Numbering System

The numbering system for Lumex Digilites is designed to be self-explanatory and to allow for the composition of part numbers for Semi Custom or Custom Devices. The standard Face and Segment Colors in the light-off condition are Grey and White diffused segments. Optional colors are available to match existing suppliers or your design requirements. See Page (3)

Custom C.O.B. Assemblies

Our core competence is to handle die effectively and place it precisely as close as 0.4mm pitch. We can use any commonly available carriers such as PCB or ceramic, flex boards and lead frames. We package light to suit your needs. See pages (27) and (28) for examples of such items.

LDM-24688MI	660	8000	SUP-RED	(+)	Grey White	41
LDM-24688NI	660	8000	SUP-RED	(-)	Grey White	41
LDM-24288MI	565	3000	GREEN	(+)	Grey White	41
LDM-24288NI	565	3000	GREEN	(-)	Grey White	41

FIG. 41

FEATURES

Right Angle Displays eliminate the need for very expensive sockets while assisting in easy installation right angle to the board

APPLICATIONS

- Instrument Panels
- Medical Diagnostics
- Test Equipment
- Control Panels

PRODUCT SELECTION TABLE

.30" QUAD DIGIT RIGHT ANGLE NUMERIC DISPLAY, MULTIPLEX								
LUMEX PART NUMBER	λ Pk nm	Iv (μ CD) @ 20 mA (Typ)	Emitted Color	Common P/N	Vf @20 mA	Power off colors		Fig. Nbr
						Face	Segment	
LDQ-M3404RI-RA	625	8000	Red	(+)	2.1	Grey	White	1
LDQ-N3404RI-RA	625	8000	Red	(-)	2.1	Grey	White	1
LDQ-M3406RI-RA	660	14000	Sup-Red	(+)	1.9	Grey	White	1
LDQ-N3406RI-RA	660	14000	Sup-Red	(-)	1.9	Grey	White	1
LDQ-M3402RI-RA	565	4800	Green	(+)	2.2	Grey	White	1
LDQ-N3402RI-RA	565	4800	Green	(-)	2.2	Grey	White	1
LDQ-M3403RI-RA	585	4800	Yellow	(+)	2.1	Grey	White	1
LDQ-N3403RI-RA	585	4800	Yellow	(-)	2.1	Grey	White	1
LOW CURRENT LED (RATED AT 2 mA If)								
LDQ-M3406LRI-RA	660	2800	Sup-Red	(+)	1.6	Grey	White	1
LDQ-N3406LRI-RA	660	2800	Sup-Red	(-)	1.6	Grey	White	1

.30" DUAL DIGIT RIGHT ANGLE NUMERIC DISPLAY, DUPLEX DRIVE								
LUMEX PART NUMBER	λ Pk nm	Iv (μ CD) @ 20 mA (Typ)	Emitted Color	Common P/N	Vf @20 mA	Power off colors		Fig. Nbr
						Face	Segment	
LDD-E304NI-RA	625	8000	Red	(+)	2.1	Grey	White	2
LDD-F304NI-RA	625	8000	Red	(-)	2.1	Grey	White	2
LDD-E306NI-RA	660	14000	Sup-Red	(+)	1.9	Grey	White	2
LDD-F306NI-RA	660	14000	Sup-Red	(-)	1.9	Grey	White	2
LDD-E302NI-RA	565	4800	Green	(+)	2.2	Grey	White	2
LDD-F302NI-RA	565	4800	Green	(-)	2.2	Grey	White	2
LDD-E303NI-RA	585	4800	Yellow	(+)	2.1	Grey	White	2
LDD-F303NI-RA	585	4800	Yellow	(-)	2.1	Grey	White	2
LOW CURRENT LED (RATED AT 2 mA If)								
LDD-E306LNI-RA	660	2800	Sup-Red	(+)	1.6	Grey	White	2
LDD-F306LNI-RA	660	2800	Sup-Red	(-)	1.6	Grey	White	2

.56" SINGLE DIGIT RIGHT ANGLE NUMERIC DISPLAY, MULTIPLEX DRIVE								
LUMEX PART NUMBER	λ Pk nm	Iv (μ CD) @ 20 mA (Typ)	Emitted Color	Common P/N	Vf @20 mA	Power off colors		Fig. Nbr
						Face	Segment	
LDS-M514RI-RA	625	8000	Red	(+)	2.1	Grey	White	3
LDS-N514RI-RA	625	8000	Red	(-)	2.1	Grey	White	3
LDS-M516RI-RA	660	14000	Sup-Red	(+)	1.9	Grey	White	3
LDS-N516RI-RA	660	14000	Sup-Red	(-)	1.9	Grey	White	3
LDS-M512RI-RA	565	4800	Green	(+)	2.2	Grey	White	3
LDS-N512RI-RA	565	4800	Green	(-)	2.2	Grey	White	3
LDS-M513RI-RA	585	4800	Yellow	(+)	2.1	Grey	White	3
LDS-N513RI-RA	585	4800	Yellow	(-)	2.1	Grey	White	3
LOW CURRENT LED (RATED AT 2 mA If)								
LDS-M516LRI-RA	660	2800	Sup-Red	(+)	1.6	Grey	White	3
LDS-M516LRI-RA	660	2800	Sup-Red	(-)	1.6	Grey	White	3
