Package Style	A	B	C	D	E	F	G	H

Features:

- AC and DC input versions available
- 3,750 Volt input-to-output isolation
- Small DIP package
- Broad selection includes multiple sensors in a single package
- 100 mA continuous load rating
- UL recognized: File No. E76270
- VDE, CSA compatible
- BABT Approved

Absolute Maximum Ratings

Parameter	Min	Max	Units
Isolation Voltage ¹	2500	—	V_{RMS}

Specifying the correct part number for the proper LDA current sensor requires three parameters—X, Y, Z—which combine to form a part number ("LDAXYZ"):

- X: The desired number of sensors per package (1 or 2)
- Y: Single transistor ("0") or Darlington transistor ("1") output configuration
- Z: Number of input diodes (1=single input diode, 0=two input diodes)
- Add "E" suffix to specify 3,750 Isolation Voltage
- Use the "S" suffix to specify Gull Wing packaging
- Use the "B" suffix to specify Butt End-Cut packaging

As an example, the LDA 2 1 1 specifies:

Z = 1 DC Operation with a single input diode

Y = 1 Darlington transistor output

X = 2 There are two sensors in this package

Note: Special part numbers are available on an application/request basis.
