### Functional Description

The CY7C128A is a high-performance CMOS static RAM organized as 2048 words by 8 bits. Easy memory expansion is

provided by an active LOW Chip Enable ( $\overline{CE}$ ), and active LOW Output Enable ( $\overline{OE}$ ) and three-state drivers. The CY7C128A has an automatic power-down feature, reducing the power consumption by 83% when deselected.

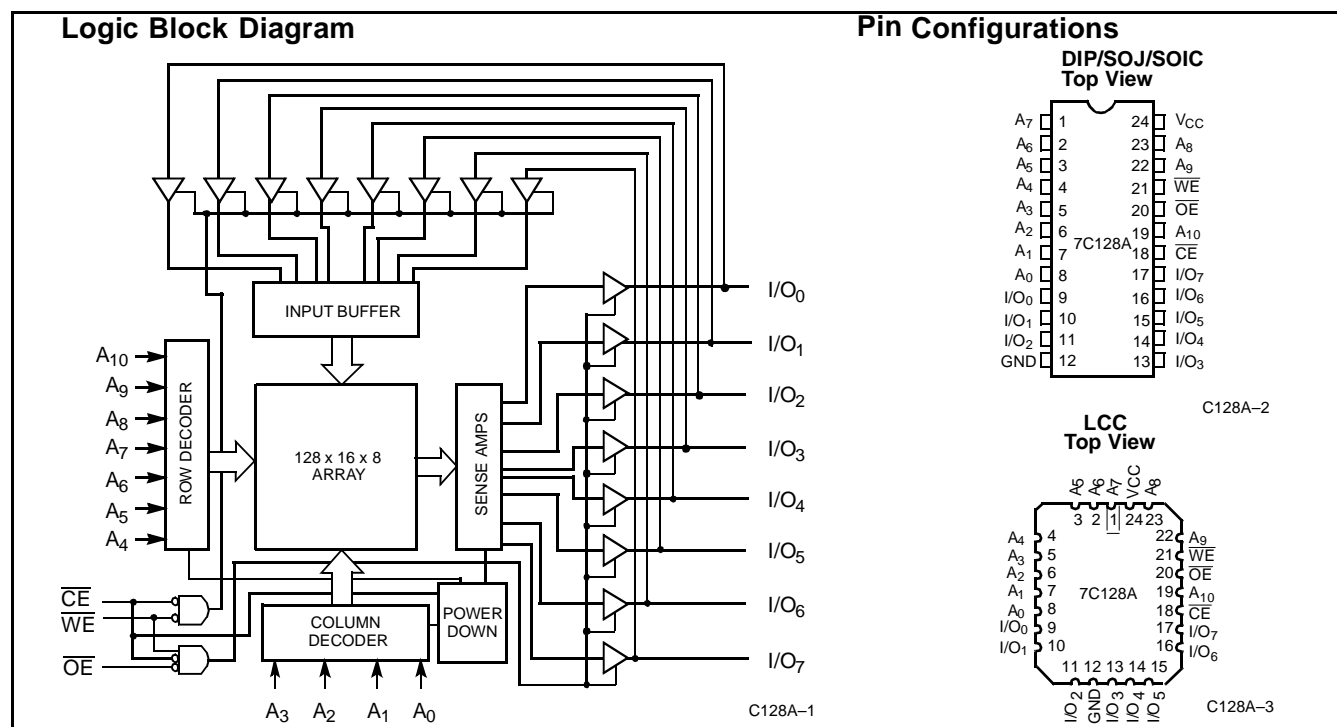

Writing to the device is accomplished when the Chip Enable ( $\overline{CE}$ ) and Write Enable ( $\overline{WE}$ ) inputs are both LOW.

Data on the eight I/O pins ( $I/O_0$  through  $I/O_7$ ) is written into the memory location specified on the address pins ( $A_0$  through  $A_{10}$ ).

Reading the device is accomplished by taking Chip Enable ( $\overline{CE}$ ) and Output Enable ( $\overline{OE}$ ) LOW while Write Enable ( $\overline{WE}$ ) remains HIGH. Under these conditions, the contents of the memory location specified on the address pins will appear on the eight I/O pins.

The I/O pins remain in high-impedance state when Chip Enable ( $\overline{CE}$ ) or Output Enable ( $\overline{OE}$ ) is HIGH or Write Enable ( $\overline{WE}$ ) is LOW.

The CY7C128A utilizes a die coat to insure alpha immunity.

### Notes:

- Test conditions assume signal transition time of 5 ns or less, timing reference levels of 1.5V, input pulse levels of 0 to 3.0V, and output loading of the specified  $I_{OL}/I_{OH}$  and 30-pF load capacitance.
- $t_{HZOE}$ ,  $t_{HZCE}$ , and  $t_{HZWE}$  are specified with  $C_L = 5$  pF as in part (b) of AC Test Loads. Transition is measured  $\pm 500$  mV from steady state voltage.
- At any given temperature and voltage condition,  $t_{HZCE}$  is less than  $t_{LZCE}$  for any given device.
- The internal write time of the memory is defined by the overlap of  $\overline{CE}$  LOW and  $\overline{WE}$  LOW. Both signals must be LOW to initiate a write and either signal can terminate a write by going HIGH. The data input set-up and hold timing should be referenced to the rising edge of the signal that terminates the write.
