

CMOS Dual 4-Bit Latch

High-Voltage Types (20-Volt Rating)

■ CD4508B dual 4-bit latch contains two identical 4-bit latches with separate STROBE, RESET, and OUTPUT DISABLE controls. With the STROBE line in the high state, the data on the "D" inputs appear at the corresponding "Q" outputs provided the DISABLE line is in the low state. Changing the STROBE line to the low state locks the data into the latch. A high on the reset line forces the outputs to a low level regardless of the state of the STROBE input. The outputs are forced to the high-impedance state for bus line applications by a high level on the DISABLE input.

The CD4508B types are supplied in the 24-lead dual-in-line ceramic packages (D and F suffixes), 24-lead dual-in-line plastic packages (E suffix), 24-lead small-outline package (NSR suffix), and in chip form (H suffix).

The CD4508B is similar to industry type MC14508.

MAXIMUM RATINGS, Absolute-Maximum Values:

DC SUPPLY-VOLTAGE RANGE, (V_{DD})		-0.5V to +20V
Voltages referenced to V_{SS} Terminal		
INPUT VOLTAGE RANGE, ALL INPUTS		-0.5V to V_{DD} +0.5V
DC INPUT CURRENT, ANY ONE INPUT		±10mA
POWER DISSIPATION PER PACKAGE (P_D):		
For $T_A = -55^\circ\text{C}$ to $+100^\circ\text{C}$		500mW
For $T_A = +100^\circ\text{C}$ to $+125^\circ\text{C}$		Derate Linearity at 12mW/ $^\circ\text{C}$ to 200mW
DEVICE DISSIPATION PER OUTPUT TRANSISTOR		
FOR $T_A = \text{FULL PACKAGE-TEMPERATURE RANGE (All Package Types)}$		100mW
OPERATING-TEMPERATURE RANGE (T_A)		-55 $^\circ\text{C}$ to $+125^\circ\text{C}$
STORAGE TEMPERATURE RANGE (T_{stg})		-65 $^\circ\text{C}$ to $+150^\circ\text{C}$
LEAD TEMPERATURE (DURING SOLDERING):		
At distance 1/16 ± 1/32 inch (1.59 ± 0.79mm) from case for 10s max		+265 $^\circ\text{C}$

RECOMMENDED OPERATING CONDITIONS at $T_A = 25^\circ\text{C}$, Except as Noted. For maximum reliability, nominal operating conditions should be selected so that operation is always within the following ranges:

CHARACTERISTIC	V_{DD} (V)	LIMITS		UNITS
		Min.	Max.	
Supply-Voltage Range (For $T_A = \text{Full Package-Temperature Range}$)		3	18	V
Reset Pulse Width, t_{WR}	5 10 15	200 140 100	— — —	ns
Strobe Pulse Width, $t_{W(st)}$	5 10 15	140 80 70	— — —	
Setup Time, t_{SU}	5 10 15	50 30 20	— — —	
Hold Time, t_H	5 10 15	0 0 0	— — —	

Features:

- Two independent 4-bit latches
- Individual master reset for each 4-bit latch
- 3-state outputs with high-impedance state for bus line applications
- Medium-speed operation: $t_{PHL} = t_{PLH} = 70 \text{ ns}$ (typ.) at $V_{DD} = 10 \text{ V}$ and $C_L = 50 \text{ pF}$
- 100% tested for quiescent current at 20 V
- 5-V, 10-V, and 15-V parametric ratings
- Standardized, symmetrical output characteristics
- Maximum input current of 1 μA at 18 V over full package-temperature range; 100 nA at 18 V and 25 $^\circ\text{C}$
- Noise margin (full package-temperature range) =
 - 1 V at $V_{DD} = 5 \text{ V}$
 - 2 V at $V_{DD} = 10 \text{ V}$
 - 2.5 V at $V_{DD} = 15 \text{ V}$
- Meets all requirements of JEDEC Tentative Standard No. 13B, "Standard Specifications for Description of 'B' Series CMOS Devices"

Applications:

- Buffer storage
- Holding registers
- Data storage and multiplexing

TERMINAL ASSIGNMENT

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
