

UM91310 Series TONE/PULSE DIALER

Features

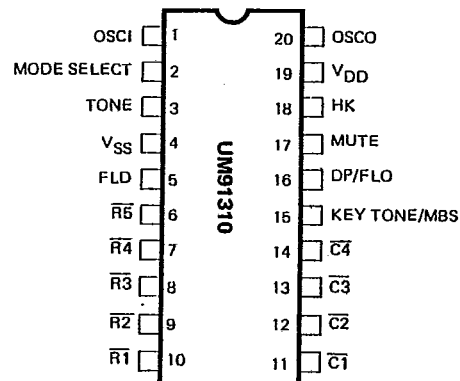

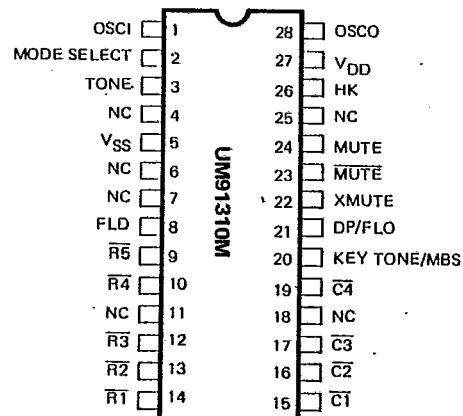

- Pulse and DTMF dialing
- Memory clear function
- Four extra function keys: pause, flash, redial, and pulse to DTMF dialing (mixed mode)
- DTMF dialing:
 - Manual dialing — minimum duration for bursts and pauses
 - Redialing — calibrated timing
- On-chip oscillator uses low-cost 3.579545 MHz crystal
- Keyboard entry fully debounced
- 23 digits for redial operation
- Special function for flash operation
- On-chip voltage reference for supply and temperature independent tone output
- On-chip filtering for low output distortion
- Uses standard 5 x 4 keyboard
- Flash (register recall) output

Keyboard Assignments

P : Pause
 FL : Flash
 R : Redial
 > : Pulse to DTMF

Pin Configurations

Note: The function of KEY TONE/MBS is determined by bond pad selection.
