HALL-EFFECT SWITCHES

Dwg. No. PH-003A

Pinning is shown viewed from branded side.

ABSOLUTE MAXIMUM RATINGS

Supply Voltage, V_{CC}	25 V
Magnetic Flux Density, B	Unlimited
Output OFF Voltage, V_{OUT}	25 V
Continuous Output Current, I_{OUT}	25 mA
Operating Temperature Range, T_A	
Prefix UGN	-20°C to +85°C
Prefix UGS	-40°C to +125°C
Storage Temperature Range, T_S	-65°C to +150°C*

* Devices can be stored at +200°C for short periods of time.

These Hall-effect switches are highly temperature stable and stress-resistant sensors best utilized in applications that provide steep magnetic slopes and low residual levels of magnetic flux density.

Each device includes a voltage regulator, quadratic Hall voltage generator, temperature stability circuit, signal amplifier, Schmitt trigger and open-collector output on a single silicon chip. The on-board regulator permits operation with supply voltages of 4.5 to 24 volts. The switch output can sink up to 20 mA. With suitable output pull up, they can be used directly with bipolar or MOS logic circuits.

The four package styles available provide a magnetically optimized package for most applications. Suffix LT is a surface-mount SOT-89 (TO-243AA) package; suffixes LL, U, and UA feature wire leads for through-hole mounting.

FEATURES

- 4.5 V to 24 V Operation
- Activate With Small, Commercially Available Permanent Magnets
- Solid-State Reliability ... No Moving Parts
- Small Size
- Constant Output Amplitude
- Superior Temperature Stability
- Resistant to Physical Stress
- Directly Replace Series UGN and UGS3000T/U Switches

Always order by complete part number, e.g., **UGN3113UA**.

See Magnetic Characteristics table for differences between devices.

NOTE: As used here, negative flux densities are defined as less than zero (algebraic convention).

* Complete part number includes a prefix denoting operating temperature range (UGN or UGS) and a suffix denoting package type (LL, LT, U, or UA).

† Applicable to prefix UGS devices only (available with all devices except 3113).
