## DESICCANT

For use in conjunction with moisture barrier bags whenever moisture control is a critical factor in the backaging of your electronic products.

Desi-Pak™ uses a naturally occurring mineral and it will protect the contents of a properly sealed barrier bag against damage by humidity

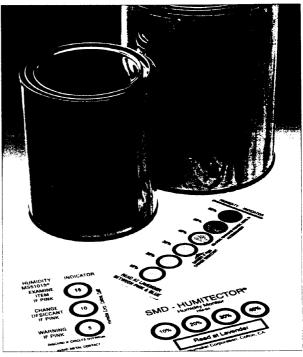

- Absorbent is activated clay: it is inert and environmentally sound. Preferable to silica gel.
- At 50% rH and 25°C it will absorb 27% water by weight
- Packed in woven, non-leaching HDPE sachets: very tough, resist splitting, non-dusting, better than paper, similar to Tyvek®
- Meets Mil D-3464E, DIN 55473A & B and Afnor 00321 requirements
- Available in three sizes: 1/2 unit, 1 unit and 2 units
- Formula to calculate required weight of absorbent in gram: W=11ARM where A = area in m² of bag. R=MVTR of the barrier film in m² /24h (at rH and temperature pertinent to your application) and M is maximum transit and storage time in months. Applies in temperate climates only.

| SIZE CODE - IV UNIT        |       |               |  |  |  |
|----------------------------|-------|---------------|--|--|--|
| <sup>1</sup> /2 unit (10g) | BW910 | Carton of 500 |  |  |  |
| 1 unit (25g)               | BW911 | Carton of 300 |  |  |  |
| 2 units (50g)              | BW912 | Carton of 200 |  |  |  |

## **HUMIDITY INDICATOR CARDS**

A low cost method of verifying the effectiveness of moisture barrier packaging. Moisture sensitive spots change colour in function of the humidity present.

- Allows quick visual inspection of the relative humidity levels in the package.
- Colour changes quickly and clearly from pink to blue as rH levels are exceeded
- Each package requires one card
- Three types: 10 60% 6-spot is most used, meets EIA-583 specification, 4-spot has comparison stripe and 5 – 15% 3-spot meets IPC/JEDEC J-STD-033 specification issued May 1999
- Packed in air-tight tins, use quickly once open or re-close the tin immediately

| CARD TYPE AND SIZE CODE UNIT |       |            |  |  |  |
|------------------------------|-------|------------|--|--|--|
| 6 spot, 40 x 120mm           | BW906 | Tin of 200 |  |  |  |
| 4 spot, 51 x 76mm            | BW904 | Tin of 100 |  |  |  |
| 3 spot, 51 x 76mm            | BW903 | Tin of 125 |  |  |  |
