

FEATURES:

- Designed for older Simpson meters with a reverse lead set such as Simpson Models 260-7/-8.
- Probe body incorporates a two step mold process. First step is Polypropylene for probe rigidity. Second step is Santoprene rubber for handling comfort, added insulation protection and wire strain relief.
- Probe test leads are designed with over-voltage spike protection of up to 6kV.
- Probe body and banana jack are molded directly to the wire for robust pull strength.
- Wire is a high strand count silicone wire for extreme flexibility and high temperature resistance.
