

722-3766

**MOD. BOMBER170 PEL****Internal dimensions: mm. 420x328x165**

Modern and exceptionally strong, this case is studied to resist even in the most extreme use conditions. The double wall construction and the body in shock-proof high density Polyethylene, with great resistance to high and low temperatures and to most of the corrosive chemical substances, grant to this product the highest levels of reliability on the market.

Technical Characteristics:

- Blow molded Polyethylene shell with incorporated feet
- Black ABS handle with soft rubber grip
- 2 metal lid support stays with security spring pawl and double fixing point
- 2 locks with keys.
- Special iron hinge riveted in various points for maximum resistance even in case of intensive use

Internal fittings

- Document wallet
- 2 tool pallets with elastic bands securely fixed by mean of GT's exclusive double blocking system
- Bottom tray with adjustable dividers
- 2 small component boxes
