

Audio I/O LSI for digital still camera

BH6415KN

BH6415KN are an audio I/O LSI for DSC. MIC AMP, ALC, LINE AMP, LPF, EVR, BTL monaural SP AMP to compose Analog signal I/O interface are incorporated into a single chip. Each mode (pass setting, ALC, LPF fc, EVR, BEEP etc.) can be controlled by 3-wire serial control. Integration into a single chip of small QFN28V package enables to reduce space and cost.

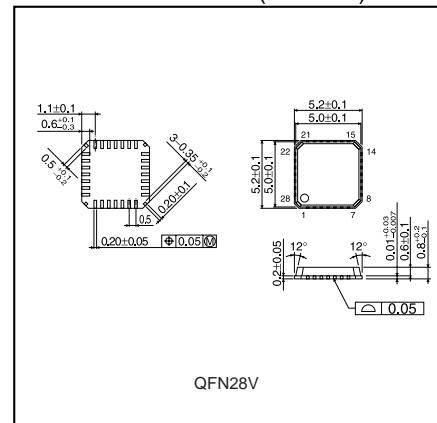

●Applications

Digital still camera

●Features

- 1) 4-order + 1 trap LPF of REC and PB are incorporated into a single chip. →Cut-off frequency can be switched in 2 steps. (fc=8kHz, 16kHz)
- 2) 13step EVR. (0 to -44dB, MUTE)
- 3) With MUTE function SPAMP. (BTL)
- 4) 6step BEEP. (-12.5 to -27.5dB)
- 5) 3-wire serial control.
- 6) Unnecessary current consumption can be reduced by standby control in every block.
- 7) Low current consumption, Space reduction, Cost reduction.

●External dimensions (Unit : mm)

QFN28V

●Absolute maximum ratings (Ta=25°C)

| Parameter | Symbol | Limits | Unit |
|-----------------------------|--------|------------|------|
| Supply voltage | Vcc | 4.5 | V |
| Power dissipation | Pd | 580 * | mW |
| Operating temperature range | Topr | -20 to 70 | °C |
| Storage temperature range | Tstg | -50 to 125 | °C |

*Copper foil thickness, when glass epoxy board mounted 35μm.

●Recommended operating conditions (Ta=25°C)

| Parameter | Symbol | Min. | Typ. | Max. | Unit |
