

The BA17805 and BA178M05 are 3-pin voltage regulators with a rated output voltage of +5V.

When an unregulated dc voltage exceeding 7 V is applied to the input, the devices provide a regulated dc voltage of 5 V at the output. Featuring excellent ripple regulation characteristics, the devices provide a stable dc voltage supply.

Features

1. Internal overcurrent protection and thermal protection circuits.
2. Excellent ripple regulation.
3. Provides stable +5 V voltage supply with no external components required.
4. Both the 1 A (AB17805) and 0.5 A (BA178M05) voltage regulators are available in the TO-220 package to ensure a wide application range.
5. Pin-compatible with equivalent regulators.

Applications

Regulated 5 V power supply
