

Amphenol Coax Europe

RF/Microwave
Coaxial Connectors

Amphenol Connecting People and Technology

The Company

Amphenol Corporation is one of the largest manufacturers of interconnect products of the world. The company designs, manufactures and markets RF/microwave connectors; flat ribbon cable and interconnect systems; CATV cable and connectors; electronic connectors; and fiber-optic connectors.

The primary end markets for Amphenol products are communications and information processing, including cable television, cellular telephone, data communications and instrumentation; aerospace and military electronics; automotive, rail and other transportation; and industrial applications.

Amphenol Corporation is a world leader in providing integrated interconnect solutions to the telecommunications industry. Recognized worldwide as a technology leader in the wireless market, Amphenol offers a full complement of RF coaxial products from MMCX connectors used on cellular subscriber units to low intermodulation 7-16 DIN connectors used on cellular base stations. Today, Amphenol is a major player in this global arena; a position founded on the combined strengths of a broad product line and a leadership role in product innovation.

As the information super highway expands, the demand for interconnect solutions continues to grow into new and exciting areas. Amphenol is a leading producer of broadband coaxial cable, connectors and fiber optic interconnect components. Amphenol is uniquely capable of supplying the complete Hybrid Fiber/Coaxial (HFC) interconnect systems which form the backbone of the information super highway.

Amphenol

As a result, every household, business, private and government institution is a potential customer and will depend on Amphenol's commitment to quality and product innovation.

In the area of computers and electronic data interchange, Amphenol continues to concentrate on the fastest growing segments; such as cable assemblies and line terminators which bring reliable, miniaturized solutions to LANS and other interactive communications networks, to high density connectors utilized in next generation global telecommunications switching systems.

Amphenol's ability to provide fully integrated solutions even extends into the arena of smart card technology, where microchips and sophisticated chip card acceptor devices are being combined for a growing number of applications from banking, to security, to medicine, to voice recognition systems.

Maintaining this position as a leader in the field of communications requires close interaction with a worldwide customer base through international management teams, distributed manufacturing, global quality assurance programs and sophisticated distribution networks. By remaining totally committed to the customer, Amphenol provides the very highest levels of quality and responsive service, anywhere in the world.

Amphenol RF Divisions

Amphenol is the world's largest manufacturer of RF connectors with experience extending over half a century. Our complete range of RF interconnect products are used in the cellular/ PCS, telecommunications, computer networking and instrumentation industries. These include Standard/ Miniature connectors (UHF, Mini-UHF, N, 50 & 75 ohm BNC, and RP-BNC, Twinaxial, DIN 1.6/5.6, TNC and RP-TNC); Subminiature connectors (SMA and RP-SMA, SMB, SMC, DIN 1.0/2.3, and size 8 contacts); MicroMate™ Microminiature connectors; DIN 7-16 and corrugated cable connectors. Amphenol offers a full line of semiflex and drop cable connectors to meet the demanding requirements of HFC broadband infrastructure being developed by CATV MSOs and telephone companies worldwide.

Complementing the RF connector product line is a comprehensive collection of low frequency connectors used in telecommunications, computer, and instrumentation markets. These include mass-terminated IDC connectors, D-Subminiature connectors, SCSI 2&3 connectors, Micro-Ribbon connectors, MeMs, Mini-DIN, Flexprint connectors and DIN 41612.

Commitment to Customer Service

For over 60 years, leading manufacturers of communications, consumer, industrial and aerospace products have relied on Amphenol to provide total interconnect solutions.

Maintaining this high level of customer trust requires a total concern for complete customer satisfaction at all levels - from engineering, to manufacturing, to quality assurance. Since many products are custom designed to individual customer specifications, often for the harshest environments, it's critical that a teamwork approach be taken, involving the customer at all levels. It starts with the design engineers who listen closely to customer needs, combining solid analytic skills with the latest CAE and CAD tools to quickly solve problems.

Amphenol also employs multifunctional teams to ensure that all products are designed for manufacturability. Serving the needs of our customers also requires a strong worldwide manufacturing presence. That's why we operate advanced production and assembly facilities strategically located across three continents. Yet, our quality remains exceptionally uniform and internationally standardized, from raw materials testing, through design engineering, to automated manufacturing and sub-assembly, to fully documented and traceable test procedures developed in accordance with customer specifications.

Amphenol also employs Statistical Process Control and has obtained ISO 9000 Certification for all its production facilities worldwide. As a result, we offer precisely what every customer is looking for - world class quality at the lowest possible cost.

Did you know?

- **UHF** - Invented in the 1930's by an Amphenol engineer, E. Clark Quackenbush, for use in the radio industry.
- **N** - Was the first coaxial connector capable of microwave performance and was invented by and named for Paul Neill of Bell Labs.
- **C** - Invented by and named for Amphenol engineer Carl Concelman. Type C has quick connect/disconnect bayonet coupling features.
- **BNC** - A miniature version of the Type C. The name stands for Bayonet Neill Concelman.
- **TNC** - The name stands for Threaded Neill Concelman. This series features threaded screws for mating.

COAX CABLE ASSEMBLIES

Amphenol cable assemblies

Amphenol Coax Europe is dedicated to providing high quality RF microwave cable assemblies to meet any application. We can work with any coax, twinax or triax cable currently being manufactured, semi-rigid or flexible, with cable length to any customer specification. With our recent acquisition of Connexus, a leading Swedish RF cable assembly producer, we are now in the position of supplying you with cost competitive Coax assemblies.

The Amphenol MMCX series is the next generation of micro-miniature connectors.

Offering a reliable broadband performance from DC to 6 GHz.

These 50 ohm connectors incorporate the industry-approved MMCX interface, assuring reliable snap-on/quick-disconnect mating and proven electrical performance.

It's low-profile PCB receptacles make this series ideal for high-volume cellular, GPS and wireless base station applications.

Electrical Specifications

Impedance	50 ohm
Frequency range	0-6 GHz
Working voltage	170 VRMS max. at sea level
Dielectric withstanding voltage	500 VRMS min. at sea level
VSWR	Straight 1.3 max. Right angle 1.5 max.
Contact Resistance	Center contact 5 milliohms max. Outer conductor 2.5 milliohms max.
Insulator resistance	1000 Megohms min.

Material Specifications

Parts Name	Material	Finish
Body, Metal parts	Brass per QQ-B-626	Nickel or gold per requirement
Center	Male	Brass per QQ-B-626
Contacts	Female	Beryllium copper, per QQ-C-530
Insulators	PTFE	Gold plated
Crimp ferrules	Annealed copper	None
		Nickel or gold per requirement

Mechanical Specifications

Engagement force	3.4 lbs max.
Disengagement force	1.4 lbs - 4.4 lbs
Contact retention	2.3 lbs. Min.
Durability (matings)	500 cycles min.

Amphenol MCX Series connectors are ideal for applications and designs where weight and space savings are critical. This series has a 50 ohm impedance structure which operates in a frequency range of up to 6 GHz. It's push-on/pull-off mating design facilitates a quick connect/disconnect capability.

Amphenol MCX connectors are popularly used in the cellular telephone, information systems and communications market.

MCX connectors are available in 75 ohm version by replacing the last two digits (50) of the part number into 75.

Electrical Specifications

Impedance	50 ohm and 75 ohm
Frequency Range	0-6 GHz
Working Voltage	335 VRMS
Dielectric Withstanding Voltage	1000 Volts
VSWR	Straight: 1.3 max. 6 GHz Right angle: 1.5 max. 6 GHz
Contact Resistance	Center contact 5.0 milliohm max. Outer contact 1.0 milliohm max.
Insulation Resistance	5000 megohms
Insertion Loss	0.1 dB Max./1 GHz

Material Specifications

Parts Name		Material	Finish
Center Contact	Male	Brass per QQ-B-626	30 μ"Gold

The Amphenol SMA connectors are semi-precision, sub-miniature, high-frequency connectors which offer reliable broadband performance DC to 18GHz with low reflection and constant 50 ohm impedance.

The main features are high mechanical strength, high durability and low VSWR. Matured design principles, careful manufacturing at all stages and thorough quality assurance organization are the bases for the well-known quality of Amphenol SMA connectors.

Electrical Specifications

Impedance	50 ohm
Frequency range	*semi-rigid cable for .141" or .085" O.D. copper jacket: 0-18 GHz *Flexible cable: 0-12.4 GHz
Voltage rating	*RG-58, 141, 142, 233: 500v peak *RG-174, 188, 316: 375V peak
Dielectric withstanding voltage	*.141" & RG-58 cable group: 1000V RMS *.085" & RG-316 cable group: 750V RMS
VSWR-straight Connectors *f in GHz	*.141" semi-rigid cable group: 1.05 + .005f *RG-58 cable group: 1.15 + .01f *RG-174 cable group: 1.15 + .02f *RG-178 cable group: 1.20 + .025f
Contact resistance	Center: 2.0 milliohms Body: 2.0 milliohms Braid tot body: 0.5 milliohms
Insulation resistance	5000 Megohms
RF leakage	-90 db min. At 2-3 GHz
Insertion loss	db max. $\approx .06 \sqrt{\text{freq. GHz}}$ Test frequency @6.0 GHz

Military Specifications MIL-C-39012 & MIL-C-83517 SMA

Material Specifications

Parts Name		Mil standard	Economic type
Body, coupling nut, other metal parts		Non-magnetic stainless steel per QQ-S-764 #303 finish: passivated	Brass per QQ-B-626 finish: nickel or gold per requirement
Contacts	Male	Brass per QQ-B-626	Brass per QQ-B-626
	Female	Beryllium copper per QQ-C-530 heat treated per MIL-H-7199 Finish: .00005" min gold plated per MIL-G-45204 type 1, Grade C.	Beryllium copper per QQ-C-530 heat treated per MIL-H-7199 Finish: .00005" min gold plated per MIL-G-45204 type 1, Grade C.
Insulator		PTFE	PTFE
Gasket		Silicone rubber	Silicone rubber
Crimp ferrule		Seamless copper tubing alloy	Seamless copper tubing alloy
Selection Guide		*Suitable for direct mounting on aluminium panels *Lowest cost	*For commercial applications only *Lower cost

All connectors listed, unless otherwise noted, are Commercial Grade construction, gold-plated brass bodies, with 50μ” gold contacts.

All insulators are Teflon.

All other parameters are equal to Mil Standard construction.

Mil Standard connectors, i.e. Stainless Steel body, available upon request as per material specifications listed in Material section on preceding page.

All dimensions are in millimeters and [inches].

The Amphenol SMB/SMC subminiature coaxial connectors with 50 ohm impedance are for applications to 4 GHz (SMB) or 10 GHz (SMC). Generally less expensive than SMA, these connectors are used primarily in applications for microwave telephone and other nondefense telecommunications requirements.

SMB connectors feature quick connect/disconnect snap-on mating and operate to 4 GHz with low reflection.

SMC connectors have #10-32UNF-threaded screw-on couplings and operate reliably to 10 GHz.

SMZ connectors are matched-impedance SMB connectors to be used with 75 ohm miniature coax cables. The connectors are the same size as, and intermateable with, standard 50 ohm SMB connectors.

Electrical Specifications

Electrical data		SMB		SMC	
Impedance		50 ohm		50 ohm	
Frequency range		0-4 GHz		0-10 GHz	
VSWR *f in GHz	Cable dielectric dimensions	0.87 mm [.034"]	1.5 mm [.059"]	0.87 mm [.034"]	1.5 mm [.059"]
	Straight connector DC-1000 MHz	1.3 + 0.04f	1.25 + 0.04f	1.25 + 0.04f	1.15 + 0.04f
	Right angle connector DC-1000 MHz	1.4 + 0.08f	1.3 + 0.04f	1.4 + 0.06f	1.25 + 0.04f
Dielectric withstanding Voltage 50 Hz rms		750V 1000V		750V 1000V	
Working voltage 50 Hz rms		250V 335V		250V 335V	
Working voltage DC		350V 450V		350V 450V	
Insulation resistance		1000 Megohms min		1000 Megohms min	
Contact	Inner conductor	≤ 3 Megohms		≤ 3 Megohms	
Resistance	Outer conductor	≤ 0.5 Megohms		≤ 0.5 Megohms	
Insertion loss (db max.)	Straight connectors	.30 db max. at 1.5 GHz		.25 db max. at 4 GHz	
	Right angle connectors	.60 db max. at 1.5 GHz		.50 db max. at 4 GHz

Coaxial terminators are a low-cost solution to connect directly to your P.C. board, or where a signal needs to be continued within the equipment while the braid is terminated to the panel. Amphenol offers a large selection of cable types and connector styles. Fits MCX, SMA, SMB and SMC mounting-hole spacing.

The Amphenol BNC connectors are made to high quality level. Medium size coaxial connectors with bayonet lock. 50 ohm impedance for applications up to 4 GHz and 75 ohm impedance up to 2 GHz.

75 Ohm Series

Within the internationally standardized BNC mating face dimensions, a perfect 75 ohm characteristic impedance cannot be realized. However, at frequencies up to 1000 MHz, the small impedance deviation is negligible for practical applications. Amphenol true 75 ohm connectors with a typical VSWR reading of 1.06:1 at 2000 MHz are identified by an asterisk following the part number.

All 75 ohm BNC connectors and 50 ohm BNC connectors are intermateable without restrictions.

Electrical Specifications

Impedance	50 ohm	75 ohm
Frequency Range	0-4 GHz	0-1 GHz
Working Voltage	500 Volts rms.	500 Volts rms.
Dielectric Withstanding Voltage	1500 Volts rms.	1500 Volts rms.
VSWR	1.3 max. 0-4 GHz	1.05+0.1f(GHz) DC to 1 GHz
Contact Resistance	Center contact 1.5 milliohm Outer contact 1.0 milliohm	Center contact 1.5 milliohm Outer contact 1.0 milliohm
Insulation Resistance	5000 megohm (min)	5000 megohm (min)

Material Specifications

Parts Name		Material	Finish
Center Contact	Male	Brass	Gold or Silver plated
	Female	Phosphor Bronze (nominal) or Beryllium Copper	Gold or Silver plated
Metal parts		Brass	Nickel
Insulators		Teflon, Delrin, PBT polyester	None
Clamp gaskets		Silicone rubber, Synthetic rubber	None
Crimp ferrule		Annealed copper	Nickel

All connector bodies, unless otherwise noted, are nickel plated. Center contacts are 3μ" gold plated. Insulators are Delrin, unless otherwise noted. Silver plating and Teflon insulators are available on virtually all BNC connectors. Please contact Amphenol for samples and quotes. All dimensions in millimeters and [inches].

Technical drawing of a mechanical part showing two views: a front view (left) and a side view (right). The front view shows a square flange with a central hole, four mounting holes, and a central hole with a diameter of 1.00 (±0.039). The side view shows the profile of the part with a total width of 12.45 (±0.491) and a mounting hole diameter of 4.75 (±0.187). Dimensions are given in inches and millimeters.

Technical drawing of a shaft-hub assembly showing cross-sectional views with dimensions and tolerances.

Left View (Cross-section of the shaft):

- Outer diameter: $\varnothing 8.69 \text{ } [0.015]$
- Inner diameter: $\varnothing 7.6 \text{ } [0.030]$
- Radius: $R1.57 \text{ } [0.02]$
- Distance from center to the start of the radius: $1.65 \text{ } [0.05]$
- Distance from center to the end of the radius: $1.38 \text{ } [0.015]$

Right View (Cross-section of the hub):

- Outer diameter: $\varnothing 11.02 \text{ } [0.04]$
- Inner diameter: $\varnothing 4.57 \text{ } [0.180]$
- Distance from center to the start of the radius: $1.52 \text{ } [0.060]$
- Distance from center to the end of the radius: $1.67 \text{ } [0.060]$

The Amphenol TNC connectors are made to a high quality level. Medium size coaxial connectors with thread coupling. 50 ohm impedance for applications up to 11 GHz and 75 ohm impedance up to 1 GHz. Cable enters full crimp or clamp type with soldered or crimp center contact.

75 Ohm Series

Within the internationally standardized TNC mating face dimensions, a perfect 75 ohm characteristic impedance cannot be realized. However, at frequencies up to 1 GHz, the small impedance deviation is negligible for practical applications. A typical SWR of 1.15:1 at 1 GHz is achieved.

All 75 ohm TNC connectors and 50 ohm TNC connectors are intermateable.

Electrical Specifications

Impedance	50 ohm	75 ohm
Frequency Range	0-11 GHz	0-1 GHz
Working Voltage	500 Volts rms.	500 Volts rms.
Dielectric Withstanding Voltage	1500 Volts rms.	1500 Volts rms.
VSWR	1.3 max. 0-11 GHz	1.05 + 0.1f (GHz) DC to 1 GHz
Contact Resistance	Center contact 1.5 milliohm Outer contact 0.2 milliohm	Center contact 1.5 milliohm Outer contact 0.2 milliohm
Insulation Resistance	5000 megohm (min)	5000 megohm (min)

Material Specifications

All connector bodies, unless otherwise noted, are nickel plated. Center contacts are 3μ" gold plated. Insulators are Delrin, unless otherwise noted. Silver plating and Teflon insulators are available on virtually all TNC connectors. Please contact Amphenol for samples and quotes. All dimensions in millimeters and [inches].

N Coaxial Connectors

The Amphenol N connectors with screw coupling are fully interchangeable with N connectors made to the MIL-C-39012 specification. Designed for use in all systems where very good R.F. and mechanical performance is critical, whether it be at low or high frequencies.

Plating for intermodulation problems

Intermodulation problems have long been a serious concern for the telecommunications market. The elimination of all nickel plating on N series connectors has gone a long way to solve this problem. Amphenol offers both silver-plated (no nickel undercoat on body or under 30 μ " gold center contact) and Nexcote-plated connectors. Nexcote is our trade name for the popular white bronze plating, and is fully compatible with all other commercial tri-alloy platings on the market.

Electrical Specifications

Impedance	50 ohm nominal
Frequency	0-11 GHz
Voltage Rating	1500 Volts peak
Dielectric Withstanding Voltage	2500 Volts rms
VSWR	1.3 max. 0-11 GHz
Contact Resistance	Center contact 1.0 milliohm Outer contact 0.2 milliohm
Insulation Resistance	5000 megohms (min)

Note: 75 ohm series connectors are not intermateable with the 50 ohm series.

Material Specifications

Parts Name		Material	Finish
Center Contact	Male	Brass	Gold or Silver plated
	Female	Phosphor Bronze (nominal) or Beryllium Copper	Gold or Silver plated
Metal parts		Brass	Nickel*
Insulators		Teflon	None
Clamp gaskets		Silicone rubber, Synthetic rubber	None
Crimp ferrules		Annealed copper	Nickel*

N Coaxial Connectors

Amphenol 7/16 series connectors provide superior performance for both return loss and intermodulation distortion. These connectors are ideal for those applications where vibration resistance and environmental protection is important, such as radio base stations and broadcast communication applications.

Connectors are 50 ohm impedance with standard M 29 x 1.5 metric threaded coupling. Designed to conform to the DIN standards, featuring excellent power-handling capability and low VSWR up to 7.5 GHz.

Electrical Specifications

Impedance	50 ohm
Frequency range	0-7,5 GHz
Working Voltage	2700 VRMS maximum at sea level
Dielectric Withstanding Voltage	4000 VRSM minimum at sea level
VSWR	Straight: 1.3 maximum Right Angel: 1.5 maximum
Contact resistance	Center Contact: 0.4 milliohms maximum Outer Contact: 0.2 milliohms maximum
Insulation resistance	5000 Megohms minimum

Material Specifications

Parts Name	Material	Finish
Body metal parts	Brass per QQ-B-626	Silver
Contacts	Male	Brass per QQ-B-626
	Female	Beryllium copper per QQ-C-530
Insulator	PTFE	None
Gasket	Silicone rubber	None
Crimp ferrule	Annealed copper	Silver

Note: Other materials/finishes are available on request.

Mechanical Specifications

Coupling nut retention	225 lbs. maximum
Coupling proof torque	310 in-lbs. maximum
Contact retention	45 lbs. minimum
Durability (mating)	500 cyles minimum (for beryllium copper female contact only)

7/16 Coaxial Connectors

The Amphenol UHF/MINI-UHF connectors are popular and economical, used when impedance mating is not required. General purpose units are designed to operate satisfactorily up to 500 MHz. They have a peak voltage rating of 500 volts.

Electrical Specifications

MINI-UHF Series

Impedance	50 ohm nominal
Frequency Range	0-2.5 GHz
Working Voltage	335 volts rms
Dielectric Withstanding Voltage	1000 volts rms
VSWR	1.25 max. 0-2.5 GHz
Insulation Resistance	5000 megohms (min)

UHF Series

Impedance	None-constant
Frequency Range	0-500 MHz
Voltage Rating	500 volts peak

Material Specifications

Parts Name		Material	Finish
Center Contact	Male	Brass	Gold or Silver plated
	Female	Brass or Phosphor Bronze	Gold or Silver plated
Metal parts		Brass or Zinc diecast	Nickel or Silver plated
Insulators		Teflon, PBT polyester, Phenolic	None
Crimp ferrule		Annealed Copper	Nickel or Silver plated

All connector bodies, unless otherwise noted, are nickel plated.

All contacts are silver plated 100μ"; gold contacts 3μ" or tin lead plate contacts are also available.

All insulators, unless otherwise noted, are phenolic. Silver plating is available for all bodies.

Please contact Amphenol for samples and quotes.

All dimensions are shown in millimeters [inches].

The Connex TWINAX connectors are designed for use on IBM systems 34 and 38 installations. They can interface IBM host-compatible network communications where minimum cross-talk and balanced circuits are necessary in interconnecting work stations.

TWINAX-polarized key and keyway construction, threaded coupling, 0-200 MHz range, 500 V peak voltage rating.

Twin-BNC-polarized contact design (one female, one male), 2 stud bayonet coupling, captivated contacts, 0-100 MHz range, 100 V peak voltage rating.

Electrical Specifications

Impedance	Used with 78 ohm/95 ohm twin conductor cable
Frequency Range	Keyway polarization and non-polarized: 0-200 MHz, 0-500 MHz with caution Contact polarization: 0-100 MHz
Voltage Rating	Keyway polarization and non-polarization: 500 volts peak Contact polarization: 100 volts peak

*TWINAX connectors keyway construction meet applicable sections MIL-C-3655.

Material Specifications

Parts Name		Material	Finish
Center Contact	Male	Brass	Gold or Silver plated
	Female	Phosphor Bronze (nominal) or Beryllium Copper	Gold or Silver plated
Metal parts		Brass	Nickel
Insulators		PBT polyester or noryl	None
Clamp gaskets		Silicone rubber or Synthetic rubber	None

Twin Coaxial Connectors

All connector bodies are nickel plated.

Insulators are PBT polyester and contacts are gold plated, 3μ".

Silver-plated contacts are available upon request. Please contact Amphenol for samples and quotes.

All dimensions are shown in millimeters [inches].

1.0/2.3 Coaxial Connectors

The Amphenol 1.0/2.3 connectors are sub-miniature, high frequency connectors which offer reliable broadband performance.

The main features are high mechanical strength, high durability and the slide on/screw on coupling latch to prevent accidental disconnection.

These connectors, owing to their smaller size, are popularly used in telecommunication systems where space saving is critical.

Electrical Specifications

Impedance	50 ohm
Frequency range	0-4GHz
Working voltage	250 VRMS max. at sea level
Dielectric withstanding voltage	750 VRMS min. at sea level
VSWR	Straight: 1.3 max. Right angle: 1.5 max.
Contact resistance	Center: 6.0 milliohms max. Outer contact: 3 milliohms max.
Insulation resistance	1000 Megaohms

Material Specifications

Parts Name	Material	Finish
Body & other metal parts	Brass per QQ-B-626	Nickel or gold per requirement
Male (plug)	Outer contacts: Phosfor Bronze per QQ-B-750 Center contacts: Brass per QQ-B-626	Gold Gold
Female (jack)	Center contacts: Beryllium Copper per QQ-C-530	Gold
Insulator	PTFE	None
Crimp ferrules	Annealed copper	Nickel or gold per requirement

Note: Other material / finish is available on request.

Mechanical Specifications

Engagement force	2.3 lbs. Max.
Disengagement force	2.3 lbs. Max
Contact retention	4.0 lbs. Min.
Durability (mating)	500 cycles min. (for Beryllium Copper female contact only)

The Amphenol 1.6/5.6 connectors feature a snap-on mating face, which allows easy connection and disconnection.

This 75 ohm miniature connector series is ideal for use in the telecommunication industry.

Electrical Specifications

Impedance	75 ohm
Frequency range	0 -1 GHz
Working voltage	335VRMS max. at sea level
Dielectric withstanding voltage	1000 VRMS min. at sea level
VSWR	Straight: 1.3 max. Right angle: 1.5 max.
Contact resistance	Center contact: 4 milliohms max. Outer contact: 2 milliohms max.
Insulation resistance	1000 Megaohms min.

Amphenol's 456 Series of RF connectors provides capacitive decoupling between the connector body and the mounting panel. EMI on the coaxial shield is shunted to the chassis ground through capacitors, while not affecting the DC and power supply frequencies. This reduces ground loop problems and provides a mechanism to harmlessly dissipate ESD to chassis ground. The RF parameters of these connectors are the same as their non-filtered counterparts. Filtering does not affect the signal contact, but only the shell-to-ground connection. Capacitively decoupled RF-connectors are intermateable and interchangeable with standard non-filtered versions

Electrical Specifications

Capacitance	10.000 pF	
Volting rating	200VDC	
Dielectric withstanding voltage	600 VDC (1000 VDC for rear Mount)	
Filter insurtion loss (dB) (per Mil-STD-220 @25 C and no load)	1 MHZ	4
	5 MHZ	16
	10 MHZ	18
	30 MHZ	25
	50 MHZ	30
	1000 MHZ	30
Other capacitance values are available. Consult Amphenol.

Amphenol SSMB Serie is a 4 Ghz interconnect family for high frequency devices.

The connectors use a snap-on connection and when plugged held together by a groove and tongue arrangement.

The design permits quick connection and disconnection in small spaces.

Electrical Specifications

Impedance	50 ohm
Frequency Range	0-4 GHz
Working Voltage	RG- 178, RG- 316, .85": 250 VRMS max. at sea level
Dielectric Withstanding Voltage	RG-178, RG-316, .85": 500 VRMS min. at sea level
VSWR	Straight 1.3 max. Right Angle 1.5 max.
Contact Resistance	Center Contact: 6 Milliohms max. Outer Contact: 2.5 Milliohms max.
Insulator Resistance	1000 Megohms min.

Material Specifications

Parts Name		Material	Finish
Body, Metal Parts		Brass per QQ-B-626	Nickel or Gold per requirement
Outer Contact Of Plug		Beryllium copper, per QQ-C-530	Gold plated
Center Contacts	Male	Brass per QQ-B-626	Gold plated
	Female	Beryllium copper, per QQ-C-530	Gold plated
Insulators		PTFE	None
Crimp Ferrules		Annealed copper	Nickel or Gold per requirement

Mechanical Specifications

Engagement Force	6 lbs. Max.
Disengagement Force	2 lbs. min.
Contact Retention	2 lbs. min.
Durability (Mating)	500 cycles min.

Amphenol

BNC 75 Ω RECEPTACLES

Amphenol Australia have introduced a new line of BNC 75 Ω receptacle connectors to complement their existing AC series XLR connector range. The BNC jack connector is offered in a rugged die-cast aluminum shell that provides protection for the flush mounted jack connector.

**New
Product**

FEATURES

- 75 Ω connector designed for broadcast, video and other applications which require impedance matched performance.
- Industry standard housing in Nickel or Black finish.
- Suitable for front or rear mounting.
- Bayonet lock or Push - Pull connection.
- Completely isolated from ground.

Amphenol offers full range of termination tooling to meet your special production requirements. All tools meet the Amphenol stringent design and quality requirements.

Amphenol ACE series are sold as a handle with the die set included. Amphenol's tools provide a consistent and reliable crimp each and every time, thereby insuring the integrity of the connector termination.

The ACE tools are easy to operate, with low force and with one hand. The handles are ergonomical formed to insure comfortable crimping also with higher volumes.

STEP 3.

STEP 4.

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Insert inner conductor into the CONTACT PIN and solder it as shown.
- STEP 4.** Solder the MAIN BODY to cable as shown.
(Avoid excessive heat which may distort dielectric).
Then press the INSULATOR into the MAIN BODY until it stops.

Solder (.047 Semi-Rigid)

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip cable as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Insert SOLDER BARREL, BODY INSULATOR and center CONTACT PIN onto cable.
- STEP 4.** Assemble cable into connector body and solder barrel onto main connector body.
(Avoid excessive heat which may distort dielectric).

Cable Assembly Instruction D

Solder (Semi-Rigid)

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Solder inner conductor to the contact pin of MAIN BODY, and solder cable jacket to the MAIN BODY as shown.
- STEP 4.** Screw the NUT into the MAIN BODY until it stops.

STEP 1.

STEP 2.

STEP 3.

STEP 4.

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Insert inner conductor into the CONTACT PIN and solder it as shown.
- STEP 4.** Solder the MAIN BODY to cable as shown.

Cable Assembly Instruction F

Solder (Semi-Rigid)

STEP 1.

STEP 2.

STEP 3.

STEP 4.

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Solder inner conductor to the contact pin of MAIN BODY, and solder cable jacket to the MAIN BODY as shown.
- STEP 4.** Press the COVER into the MAIN BODY until it is flat with the MAIN BODY.

STEP 1.

STEP 2.

STEP 3.

STEP 4.

STEP 5.

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Slide the INSULATOR onto inner conductor against the jacket. Then insert inner conductor into the CONTACT PIN and solder it as shown.
- STEP 4.** Slide the SOLDER NUT onto cable.
- STEP 5.** Insert cable and parts into MAIN BODY, then screw the SOLDER NUT until it is tight and solder it as shown.

Cable Assembly Instruction H

Solder-crimp

STEP 1. All parts of the connector are shown.

STEP 2. Strip the cable inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.

STEP 3. Slide the HEX NUT and FERRULE onto cable. Then insert the BARREL into braid and dielectric, and slide the FERRULE over braid and crimp it as shown.

STEP 4. Slide the REAR INSULATOR against the BARREL. Then insert inner conductor into the CONTACT PIN and solder it as shown.

STEP 5. Slide the FRONT INSULATOR against the REAR INSULATOR.

STEP 6. Insert cable and parts into the MAIN BODY, then screw the HEX NUT until it is tight.

Solder-crimp

- STEP 1.** All parts of the connector are shown. A crimp tool is necessary to complete the termination.
- STEP 2.** Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Slide the FERRULE onto cable. Solder inner conductor to the contact pin of MAIN BODY. And insert the MAIN BODY into braid and dielectric.
- STEP 4.** Slide the FERRULE over braid and crimp it with the crimp tool as shown. Screw NUT onto MAIN BODY.

Cable Assembly Instruction J

Crimp-crimp

- STEP 1.** All parts of the connector are shown.
A crimp tool is necessary to complete the connection.
- STEP 2.** Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Insert inner conductor into the CONTACT PIN and solder on the cable. Then slide the FERRULE onto cable.
- STEP 4.** Insert the MAIN BODY into braid and dielectric.
- STEP 5.** Slide the FERRULE over braid, crimp it with the crimp tool as shown.

- STEP 1.** All parts of the connector are shown.
A crimp tool is necessary to complete the connection.
- STEP 2.** Strip the inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Slide the FERRULE onto cable, then fold back braid wire and slide the INSULATOR onto dielectric as shown.
- STEP 4.** Insert inner conductor into the CONTACT PIN, crimp it with crimp tool as shown.
- STEP 5.** Push cable and parts into the MAIN BODY until it stops.
Then slide the FERRULE over braid wire and against the MAIN BODY, crimp it with the crimp tool as shown.

Cable Assembly Instruction L

Crimp-crimp

STEP 1,

STEP 2,

STEP 3,

STEP 4,

STEP 5,

- STEP 1.** All parts of the connector are shown.
A crimp tool is necessary to complete the connection.
- STEP 2.** Strip the inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Slide the FERRULE onto cable, then fold back braid wire and slide the SPACER and INSULATOR onto dielectric as shown.
- STEP 4.** Insert inner conductor into the CONTACT PIN, crimp it with crimp tool as shown.
- STEP 5.** Push cable and parts into the MAIN BODY until it stops. Then slide the FERRULE over braid wire and against the MAIN BODY, crimp it with the crimp tool as shown.

STEP 2.

STEP 3.

STEP 4.

STEP 5.

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the cable inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Insert inner conductor into the CONTACT PIN and solder it as shown. Then slide the HEX NUT, WASHER, and GASKET onto cable one by one.
- STEP 4.** Place the TOP HAT over braid and push back against cable jacket. Fold back braid wire as shown.
- STEP 5.** Insert cable and parts into the MAIN BODY, then screw the HEX NUT until it is tightened.

Cable Assembly Instruction N

Clamp-solder

STEP 1. All parts of the connector are shown.

STEP 2. Strip the inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.

STEP 3. Slide the HEX NUT, WASHER, and GASKET onto cable one by one.

STEP 4. Place the BRAID CLAMP over braid and push back against cable jacket. Fold back braid wire as shown, and slide the RING and REAR INSULATOR against the BRAID CLAMP. Then insert inner conductor into the CONTACT PIN and solder it.

STEP 5. Insert cable and parts into the MAIN BODY, then screw the HEX NUT until it is tightened.

Twist-on

STEP 1.

STEP 2.

STEP 3.

STEP 4.

STEP 5.

- STEP 1.** The connector is shown.
- STEP 2.** Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Twist braid in a clockwise direction so that at least 0,8mm of dielectric is bared, and braid is left flat.
- STEP 4.** Insert inner conductor into back end of connector gently, and feed it into the guide hole.
- STEP 5.** Push and screw connector onto cable in a clockwise direction until it stops.

Cable Assembly Instruction P

Solder-wedge compression

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the cable inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Slide the HEX NUT onto cable, then insert the CONTACT ASSEMBLY under braid and jacket.
- STEP 4.** Insert cable and parts into the MAIN BODY, then screw the HEX NUT until it is tight.

Clamp

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the inner conductor, dielectric, outer conductor, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Thread the GASKET onto the cable until it is against the cable jacket.
- STEP 4.** Thread the CLAMP NUT onto the cable until the A dimension is 1-1.5 mm, then push the TOP HAT onto the outer conductor of cable inside as shown.
- STEP 5.** Thread the MAIN BODY onto the CLAMP NUT and tighten the connection with wrenches, hold the CLAMP NUT and turn only the MAIN BODY.

Cable Assembly Instruction R

Twin Solder-clamp

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the cable inner conductor, dielectric, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog. Then slide the NUT, WASHER, and GASKET onto cable.
- STEP 3.** Place the BRAID CLAMP over braid and push back against cable jacket. Fold back braid wire as shown.
- STEP 4.** Slide the TOP HAT against the BRAID CLAMP. Then insert inner conductor into the CONTACT PINs and solder them.
- STEP 5.** Insert the CONTACT PINs into the INSULATOR until the INSULATOR is against the TOP HAT.
- STEP 6.** Insert cable and parts into the MAIN BODY, aligning slot of the INSULATOR with key in the MAIN BODY. Then screw the NUT until it is tight.

Crimp-crimp

- STEP 1.** All parts of the connector are shown. A crimp tool is necessary to complete the termination.
- STEP 2.** Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Insert inner conductor into the CONTACT PIN and crimp it with the crimp tool as shown. Then slide the FERRULE onto cable.
- STEP 4.** Insert the MAIN BODY into braid and dielectric.
- STEP 5.** Slide the FERRULE over braid and crimp it with the crimp tool as shown.

Cable Assembly Instruction T

Solder (with reducer)

- STEP 1.** All parts of the connector are shown.
- STEP 2.** Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Slide the **SHELL** and **REDUCER** onto cable, then fold back braid wire over the **REDUCER** as shown.
- STEP 4.** Screw the **MAIN BODY** onto the **REDUCER** and solder it as shown.
- STEP 5.** Slide the **SHELL** forward and screw in place on the **MAIN BODY**.

FCP

STEP 1. All parts of the connector are shown.

STEP 2. Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.

STEP 3. Slide the FERRULE and SHELL onto cable one by one, and insert the MAIN BODY into braid and dielectric until it is against cable jacket. Then crimp the CONTACT PIN as shown.

STEP 4. Slide the SHELL onto the MAIN BODY, and push the FERRULE until it is against the MAIN BODY. If inner conductor sticks out beyond the CONTACT PIN, trim it.

Cable Assembly Instruction V

Crimp-crimp

- STEP 1.** All parts of the connector are shown. A crimp tool is necessary to complete the connection.
- STEP 2.** Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Insert inner conductor into the CONTACT PIN, crimp it with the crimp tool as shown. Then slide the FERRULE and SHELL onto cable one by one.
- STEP 4.** Insert the MAIN BODY under braid and dielectric.
- STEP 5.** Slide the SHELL until it is against the MAIN BODY, then slide the FERRULE over braid, crimp it with the crimp tool as shown.

Crimp

STEP 1.

STEP 2.

STEP 3.

STEP 4.

STEP 1. All parts of the connector are shown. A crimp tool is necessary to complete the connection.

STEP 2. Strip the inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.

STEP 3. Insert cable into the back end of MAIN BODY gently, and feed it into the guide hole.

STEP 4. Crimp it with the crimp tool as shown.

Cable Assembly Instruction X

Solder-crimp

STEP 1.

STEP 2.

STEP 3.

STEP 4.

STEP 5.

- STEP 1.** All parts of the connector are shown. A crimp tool is necessary to complete the connection.
- STEP 2.** Strip the inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.
- STEP 3.** Slide the FERRULE onto cable.
- STEP 4.** Solder inner conductor to contact pin of the MAIN BODY as shown.
- STEP 5.** Slide the FERRULE over braid; crimp it with the crimp tool as shown.

Solder-clamp

STEP 1. All parts of the connector are shown.

STEP 2. Strip the cable inner conductor, dielectric, braid, and jacket as per "RECOMMENDED CABLE STRIPPING DIM'S" in catalog.

STEP 3. Slide the NUT onto cable, then insert inner conductor into the CONTACT PIN and solder it, fold back braid wire as shown.

STEP 4. Place the BRAID CLAMP over braid and push back against cable jacket.

STEP 5. Insert cable and parts into the MAIN BODY, then screw the NUT until it is tightened.

235
