

SN74CBT162292

12-BIT 1-OF-2 FET MULTIPLEXER/DEMULTIPLEXER WITH INTERNAL PULLDOWN RESISTORS

SCDS052E – MARCH 1998 – REVISED OCTOBER 2000

- Member of Texas Instruments' Widebus™ Family
- TTL-Compatible Control Input Levels
- Isolation Under Power-Off Conditions
- Make-Before-Break Feature
- Internal 500-Ω Pulldown Resistors to Ground
- A-Port Inputs/Outputs Have Equivalent 25-Ω Series Resistors, So No External Resistors Are Required
- Latch-Up Performance Exceeds 250 mA Per JESD 17

description

The SN74CBT162292 is a 12-bit 1-of-2 high-speed TTL-compatible FET multiplexer/demultiplexer. The low on-state resistance of the switch allows connections to be made with minimal propagation delay.

When the select (S) input is low, port A is connected to port B1, and R_{INT} is connected to port B2. When S is high, port A is connected to port B2, and R_{INT} is connected to port B1.

The A-port inputs/outputs include equivalent 25-Ω series resistors to reduce overshoot and undershoot.

DGG, DGV, OR DL PACKAGE (TOP VIEW)

NC – No internal connection

ORDERING INFORMATION

T _A	PACKAGE†		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 85°C	SSOP – DL	Tube	SN74CBT162292DL	CBT162292
		Tape and reel	SN74CBT162292DLR	
	TSSOP – DGG	Tape and reel	SN74CBT162292DGGR	CBT162292
	TVSOP – DGV	Tape and reel	SN74CBT162292DGVR	CY2292

† Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Widebus is a trademark of Texas Instruments.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

switching characteristics over recommended operating free-air temperature range, $C_L = 50$ pF, (unless otherwise noted) (see Figure 1)

PARAMETER	FROM (INPUT)	TO (OUTPUT)	$V_{CC} = 4$ V		$V_{CC} = 5$ V ± 0.5 V		UNIT
			MIN	MAX	MIN	MAX	
t_{pd}^\dagger	A or B	B or A		1.9		1.85	ns
t_{en}	S	A or B	1	10.7	1	9.5	ns
t_{dis}	S	A or B	1	10.9	1	9.7	ns

† The propagation delay is the calculated RC time constant of the typical on-state resistance of the switch and the specified load capacitance, when driven by an ideal voltage source (zero output impedance).

switching characteristics over recommended operating free-air temperature range, $C_L = 50$ pF, (unless otherwise noted) (see Figure 1)

PARAMETER	DESCRIPTION	$V_{CC} = 4$ V		$V_{CC} = 5$ V ± 0.5 V		UNIT
		MIN	MAX	MIN	MAX	
t_{mbb}^\ddagger	Make-before-break time	0	2	0	2	ns

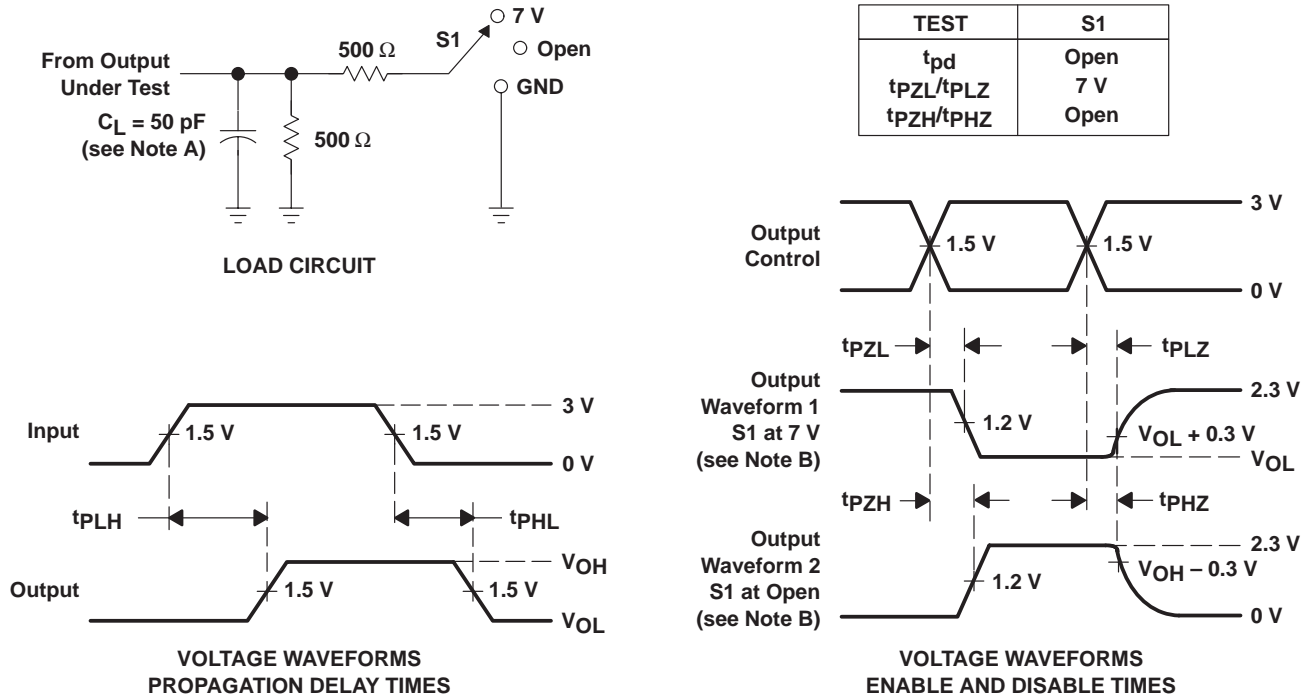

‡ The make-before-break time is the time interval between make and break, during the transition from one selected port to the other.

12-BIT 1-OF-2 FET MULTIPLEXER/DEMULTIPLEXER WITH INTERNAL PULLDOWN RESISTORS

SCDS052E – MARCH 1998 – REVISED OCTOBER 2000

PARAMETER MEASUREMENT INFORMATION

- NOTES:
- C_L includes probe and jig capacitance.
 - Waveform 1 is for an output with internal conditions such that the output is low except when connected to the internal 500- Ω pulldown resistor. Waveform 2 is for an output with internal conditions such that the output is high except when connected to the internal 500- Ω pulldown resistor.
 - All pulse inputs and DC inputs are supplied by generators having the following characteristics: $PRR \leq 10 \text{ MHz}$, $Z_O = 50 \Omega$, $t_r \leq 2.5 \text{ ns}$, $t_f \leq 2.5 \text{ ns}$.
 - The outputs are measured one at a time with one transition per measurement.
 - t_{PLZ} and t_{PHZ} are the same as t_{dis} . $Z = R_{INT} = 500 \Omega$.
 - t_{PZL} and t_{PZH} are the same as t_{en} . $Z = R_{INT} = 500 \Omega$.
 - t_{PLH} and t_{PHL} are the same as t_{pd} .

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Customers are responsible for their applications using TI components.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
