### ■ General Description

The XC74UL04AA is a CMOS Inverter, manufactured using silicon gate CMOS fabrication.

CMOS low power circuit operation makes high speed LS-TTL operations achievable.

The internal non-buffered, single-step composition makes the XC74UL04AA suitable to use with crystal oscillators.

As the XC74UL04AA is integrated into mini molded, SSOT-25 and SOT-25 packages, high density mounting is possible.
