

PWR71 SERIES
3 WATTS
UNREGULATED

DC/DC CONVERTERS

FOUR ISOLATED CHANNELS

FEATURES

- TESTED IN COMPLIANCE WITH UL544
- OUTPUT POWER TO 3W
- HIGH ISOLATION VOLTAGE: 1000VDC
- SIX-SIDED SHIELDING
- INPUT AND OUTPUT FILTERING
- LOW PROFILE PACKAGE: 0.4" HIGH

APPLICATIONS

- POWER FOR DATA ACQUISITION, OP AMPS, ETC.
- PROCESS CONTROL
- PORTABLE EQUIPMENT
- TEST EQUIPMENT

DESCRIPTION

The PWR71 is a four-channel, dual-output unregulated DC/DC converter designed for general purpose power conversion applications where high efficiency is more important than load regulation.

The PWR71 has four isolated plus and minus output voltages approximately equal to the magnitude of the input voltage. It operates over an input voltage range of 10VDC to 18VDC. Rated output current for the PWR71 is 25mA per output or a total of 200mA for all outputs.

Isolation voltage between the input and any of the four output circuits is 1000VDC continuous. This same isolation specification applies between any of the four channels.

A continuous connection between an output and its common will not damage the PWR71. Short circuit protection is accomplished by using power MOSFETs in the PWR71 input circuitry.

Six-sided shielding suppresses electromagnetic radiation which could disturb sensitive analog measurements or interfere with system timing signals. Filtering the PWR71 input and outputs minimizes the effects of electrical noise on the source and loads of the converter.

Each PWR71 is tested in compliance with UL544, VDE750, and CSA C22.2 dielectric withstand specifications. In addition, barrier leakage current is 100% tested.

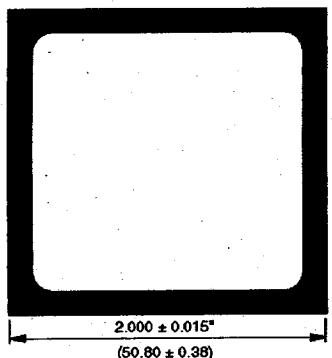

ELECTRICAL SPECIFICATIONS

At $T_A = +25^\circ\text{C}$, $+V_N = 15\text{VDC}$, and $I_{\text{OUT}} = \pm 25\text{mA}$ unless otherwise noted.

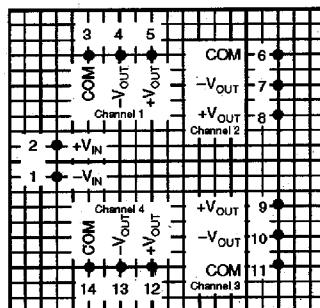

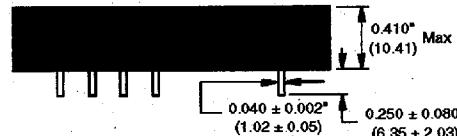

PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS

NOTES: All dimensions are in inches (millimeters).

GRID: 0.100 inches (2.54 millimeters)

Marked with: specific model ordered, date code, job code.

MATERIAL: Units are encapsulated in a low thermal resistance molding compound which has excellent chemical resistance, wide operating temperature range, and good electrical properties under high humidity environments. Lead material is brass with a solder plated surface to allow ease of solderability.

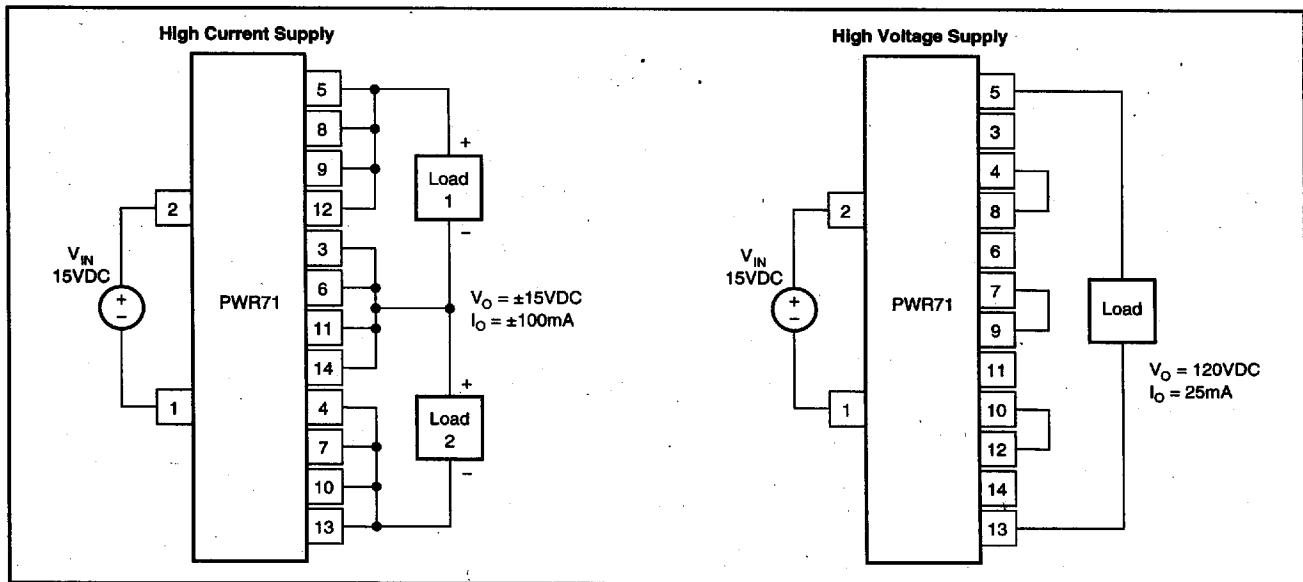

ABSOLUTE MAXIMUM RATINGS

Input Voltage	18VDC
Output Current500mA
Output Short-Circuit Duration	Continuous

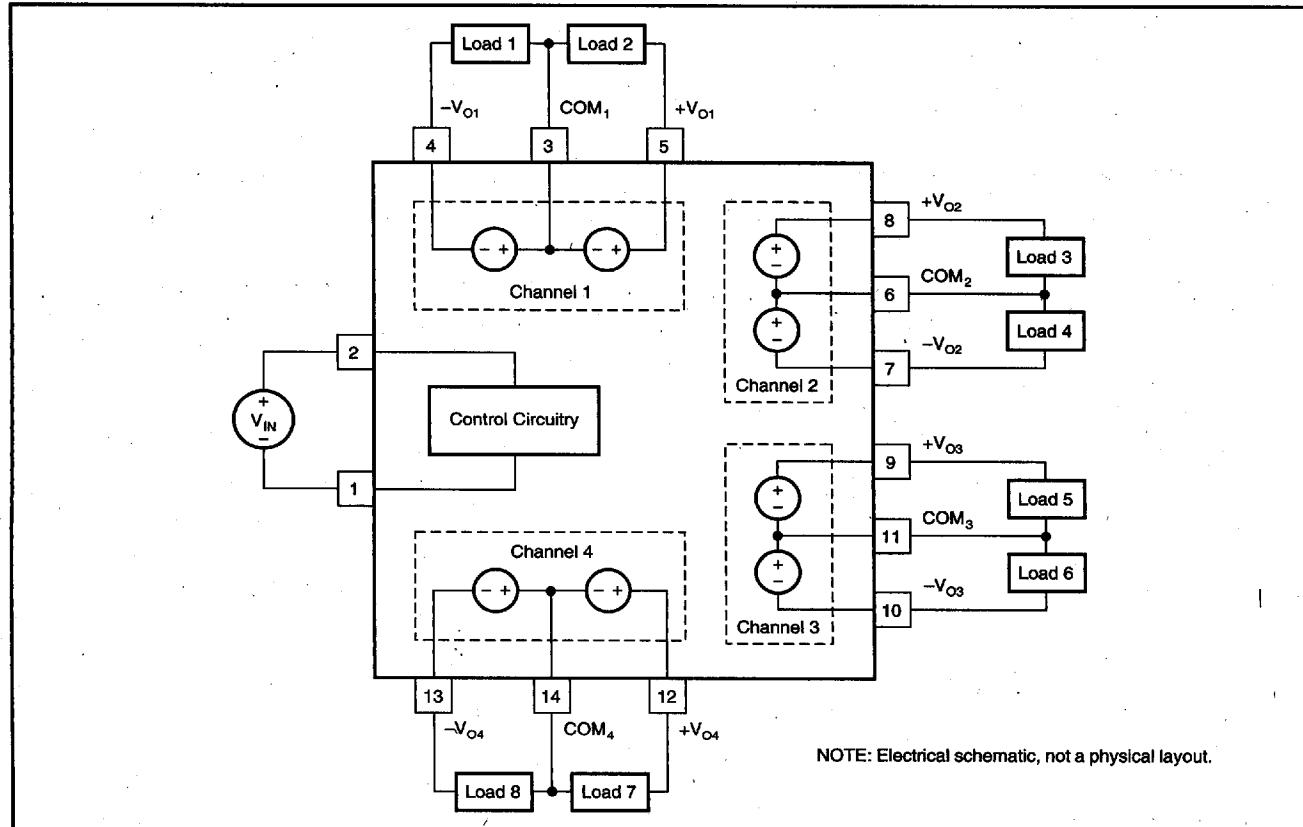

ORDERING INFORMATION

PWR 71 /H
Device Family _____
PWR indicates DC/DC converter
Model Number _____
Reliability Screening _____
No designator indicates standard manufacturing processing
