ABUS GRANIT 37CS

Insurance Close Shackle Padlock

The tough, strong and reliable 37CS GRANIT close shackle Padlock, is constructed and tested to meet the very stringent requirements of the Swedish Theft Prevention Association, Class 3 specification. It also complies with the relevant C.E.N. Draft Standard.

ABUS-PLUS 7 DISC MECHANISM.

- Highest security mechanism in the ABUS range.
- Over 250,000 genuine key differs.
- False notches on all discs prevent picking and manipulation.
- Reversible key for ease of operation, even in the dark.
- All corrosion free components.
- Hardened cylinder retaining cover protects against drilling and pulling.

Solid High Security

The 37CS GRANIT Insurance close shackle Padlock is, as its name implies, constructed from a solid block of hardened special steel alloy to resist the fiercest of attacks.

- Resistant to sawing, levering, hammering, twisting and cutting.
- Through hardened shackle for maximum strength.
- Double ball bearing locking ensures high tensile and torsion strength.
- Impact resistant shackle guard.
- Detachable shackle for ease of handling.
- Freeze tested.
- Re-keyable version and component parts also available.
- Thermoplastic sheath to protect paint work.
