

- Internally Frequency Compensated
- Improved Version of LM108
- Direct Replacement for PMI OP-12A, OP-12B, OP-12C, OP-12E, OP-12F, and OP-12G.

description

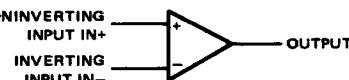

The OP-12 devices are precision low-input-current internally compensated operational amplifiers. The devices are improved versions of the LM108 series. The OP-12 amplifiers exhibit low input bias current and input offset voltage and current to improve the accuracy of high-impedance circuits using these devices. The devices feature short-circuit protection and internal frequency compensation.

The OP-12A, OP-12B, and OP-12C are characterized for operation over the full military temperature range of -55°C to 125°C . The OP-12E, OP-12F, and OP-12G are characterized for operation from 0°C to 70°C .

DEVICE FEATURES

PARAMETER	OP-12A OP-12E	OP-12B OP-12F	OP-12C OP-12G
Input offset voltage (Max)	$150 \mu\text{V}$	$300 \mu\text{V}$	$1000 \mu\text{V}$
Temperature coefficient of input offset voltage (Max)	$2.5 \mu\text{V}/^{\circ}\text{C}$	$3.5 \mu\text{V}/^{\circ}\text{C}$	$10 \mu\text{V}/^{\circ}\text{C}$
Input offset current (Max)	200 pA	200 pA	500 pA
Input bias current (Max)	2 nA	2 nA	5 nA
Common-mode input voltage range	$\pm 13 \text{ V}$	$\pm 13 \text{ V}$	$\pm 13 \text{ V}$
Power dissipation (Max)	6 mW	6 mW	8 mW

PRODUCT PREVIEW

This document contains information on a product under development. Texas Instruments reserves the right to change or discontinue this product without notice.

TYPES OP-12A, OP-12B, OP-12C, OP-12E, OP-12F, OP-12G
PRECISION LOW-INPUT-CURRENT OPERATIONAL AMPLIFIERS

absolute maximum ratings over free-air temperature range (unless otherwise noted)

	OP-12A, OP-12B OP-12C	OP-12E, OP-12F OP-12G	UNIT
Supply voltage, V_{CC+} (see Note 1)	20	18	V
Supply voltage, V_{CC-} (see Note 1)	-20	-18	V
Input voltage (either input, see Note 2)	± 15	± 15	V
Differential input current (see Note 3)	± 10	± 10	mA
Duration of output short circuit (see Note 4)	unlimited	unlimited	
Continuous total dissipation at (or below) 25°C free-air temperature (see Note 5)	500	500	mW
Operating free-air temperature range	-55 to 125	0 to 70	°C
Storage temperature range	-65 to 150	-65 to 150	°C
Lead temperature 1.6 mm (1/16 inch) from case for 60 seconds JG package	300	300	°C
Lead temperature 1.6 mm (1/16 inch) from case for 10 seconds D or P package		280	°C

- NOTES: 1. All voltage values, except otherwise noted, are with respect to the midpoint between V_{CC+} and V_{CC-} .
 2. The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 15 volts, whichever is less.
 3. The inputs are shunted with back-to-back diodes for input overvoltage protection. Therefore, excessive current will flow if a differential voltage in excess of 1 volt is applied between the inputs unless some limiting resistance is provided.
 4. The output may be shorted to ground or to either supply. Temperature and/or supply voltages must be limited to ensure that the dissipation rating is not exceeded.
 5. For operation above 25°C free-air temperature, refer to Dissipation Derating Curves, Section 2. In the JG packages, OP-12A, OP-12B, and OP-12C chips are alloy-mounted; OP-12E, OP-12F, and OP-12G chips are glass-mounted.

TYPES OP-12A, OP-12B, OP-12C
PRECISION LOW-INPUT-CURRENT OPERATIONAL AMPLIFIERS

electrical characteristics at specified free-air temperature, $V_{CC\pm} = \pm 20$ V for OP-12A and OP-12B, ± 15 V for OP-12C
 (unless otherwise noted)
