Gate Valve Lockout Devices

Gate Valve Lockouts

The easy and ideal way for locking out gate valves. Available in five sizes for handwheels with a diameter from 2,5 up to 32 cm and in four colours. Use red and green devices to indicate if a valve is locked or open. These lockouts are made from a durable polypropylene which is resistant to chemicals, heat and cold.

Our advice:

Use these gate valve lockouts in different colours to indicate the risk levels (e.g. red = high risk, blue = low risk) or the substances flowing through a valve (e.g. yellow = gas, green = water etc.) You could also use the colours by allocating them to different maintenance teams, for instance red for electricians, blue for the mechanics etc.
