

0.3" Subminiature 7 Segment Displays**6000 Series**

These 0.3" character displays are fitted into the smallest possible package geometry - being only 7mm wide and 11mm high! The small segment size creates a high intensity readout suitable for applications where size restraints would otherwise preclude the use of a 0.3" device, typical brightness at 10mA is 3.2mcd for Red and 5.0mcd for Green. The matching overflow stacks are on the same digit pitch.

Dimensions**Overflow**

Pin	Segment
1	DP1
2	a/b anode
3	a cathode
4	b cathode
5	DP2
6	DP3
7	c
8	common
9	d
10	common

Single digit

Pin	Segment
1	a
2	f
3	g
4	e
5	d
6	DP cathode
7	DP anode
8	c
9	common
10	b
