- 24Vd.c. or 230Va.c. Operating Voltages
- Axial Forces ranging from 140 to 3500N
- Special Voltages/Forces/Mountings available on request
- High Quality, Cost effective package

Technical Specification

Voltage	24Vd.c. or 240Va.c. (+/-10%)
Duty Cycle	100% ED
Ambient Temp.	0-65 °C
Protection	IP51
Standard Finish	Bright Zinc
Insulation	Class B

General Information

- Force is measured with an armature in 220 M07 material with a finish of 0.38 µm max. and minimum thickness 't'.
- All magnets can be supplied with mounting flanges to suit any particular mounting requirements.
- Pole faces can be supplied electro-plated, however this will result in approx. 10% reduction in Axial force.
- All magnets can be supplied with flying leads, and the size 50 and above can be fitted with a 3-pole plug and free socket.
