4-STAGE SYNCHRONOUS BIDIRECTIONAL COUNTERS

General Description

The F169 is a fully synchronous 4-stage up/down counter. The F169 is a modulo- 16 binary counter. It features a preset capability for programmable operation, carry lookahead for easy cascading and a U/D input to control the direction of counting. All state changes, whether in counting or parallel loading, are initiated by the LOW-to-HIGH transition of the clock.
