

- 1-channel
- Input frequency 0.001 Hz ... 5 kHz
- Analogue output 0/4 mA ... 20 mA
- Measuring range parameterizable
- 2 relay outputs
- 1 electronic output, isolated
- Each output can be assigned individual parameters, such as a limiting value (high/low alarm), incrementing, pulse separator or error message output
- Start-up override
- Restart inhibit
- Lead breakage (LB) and short-circuit (SC) monitoring
- Bounce filter
- Parameterization via PC or control panel (optional)

48 ... 253 V AC / 20 ... 90 V DC

KFU8-UFC-Ex1

48 ... 253 V AC / 20 ... 90 V DC

KFU8-UFC-Ex1.D

(with control panel)

Function

The universal frequency converter converts an input frequency into a frequency proportional current and offers at the same time the possibility, to monitor the limit values.

The frequency values for the minimum (0 or 4 mA) and the maximum output current (20 mA) are freely parameterizable.

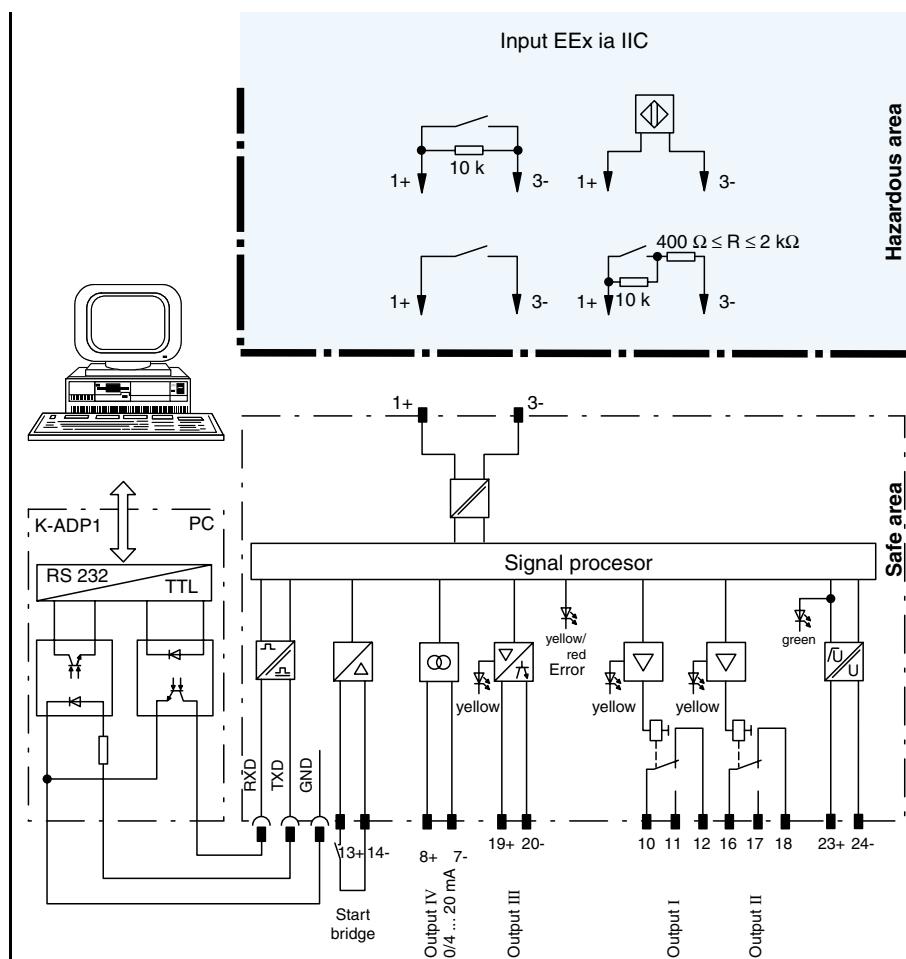

Also the functions of the switch outputs (2 relay and 1 potential free transistor output) are freely adjustable [limit value indication (MAX- or MIN-alarm), serially switched output, pulse separator output, error signal output].

A start-up override that can be activated externally is integrated as well. The maximum input frequency is 5 kHz.

Input and output currents are galvanically isolated.

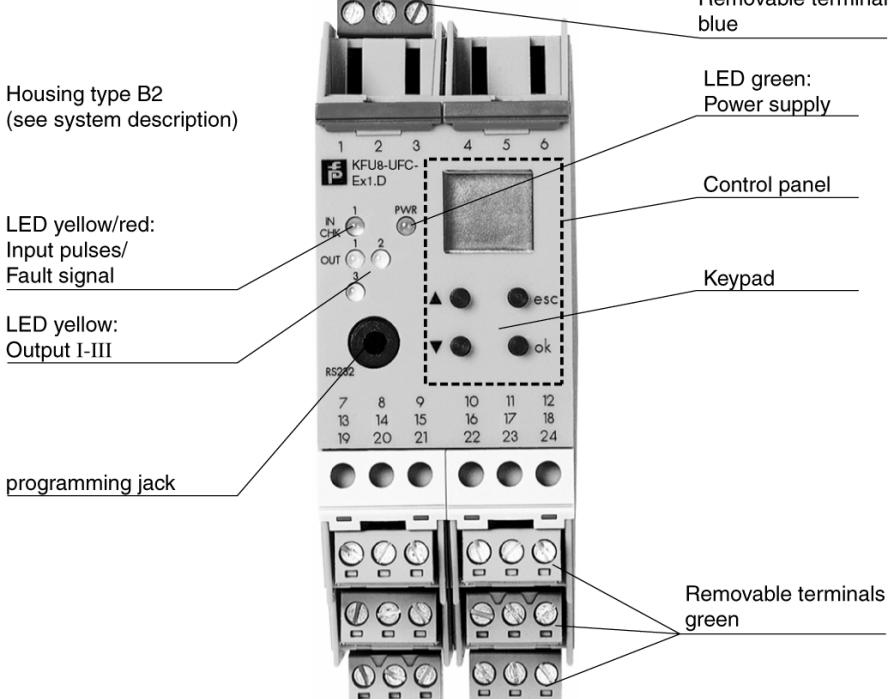

The universal voltage power pack allows the operation of the KFU8-UFC-Ex1... at various supply voltages at the same terminals, without change-over or consideration of the polarity.

The version KFU8-UFC-Ex1.D can be adjusted by means of the control surface and by means of the software, the version KFU8-UFC-Ex1 only by means of the software.

Aufbau

Front View

Power supply

Connection type	terminals 23, 24
Rated operational voltage U_e	20 ... 90 V DC / 48 ... 253 V AC
Safety maximum voltage U_m	253 V AC
Power loss/Power consumption	$\leq 2 \text{ W}$; 2.5 VA / 2.2 W ; 3 VA

Input (not intrinsically safe)

Connection type	terminals 13+, 14-
Function	start-up override; 1 ... 1000 s, adjustable in steps of 1 s
Quiescent voltage/Short-circuit current	18 V / 5 mA
Active/Passive	$I > 4 \text{ mA}$ (for min. 100 ms) / $I < 1.5 \text{ mA}$

Input (intrinsically safe)

Connection type	terminals 1+, 3-
Nominal data	in accordance with IEC 60947-5-6 (NAMUR, DIN 19234); see system description for electrical data
Input pulse length/Input pulse interval	$\geq 50 \mu\text{s}$ / $\geq 50 \mu\text{s}$
Lead monitoring	breakage $I \leq 0.15 \text{ mA}$; short-circuit $I > 6.5 \text{ mA}$

Details of certificate of conformity

Certification number	TÜV 99 ATEX 1471
Group, category, ignition protection method	II (1) G D [EEx ia] IIC
Voltage U_o	10.1 V
Current I_o	13 mA
Power P_o	34 mW

Allowable circuit values**Ignition protection class, category [EEx ia]**

Explosion group	IIA	IIB	IIC
External capacitance	93 μF	19.4 μF	2.87 μF
External inductance	1000 mH	730 mH	195 mH

Category, ignition protection method	II (1) G [EEx ia] IIC
--------------------------------------	-----------------------

Output (not intrinsically safe)

Connection type	output I: terminals 10, 11, 12; output II: terminals 16, 17, 18; output III: terminals 19+, 20-; output IV: terminals 8+, 7-
-----------------	--

Output I and II	signal, relay
-----------------	---------------

Contact loading	250 V AC / 2 A / $\cos \varphi \geq 0.7$; 40 V DC / 2 A
-----------------	--

Mechanical life	5×10^7 switchings
-----------------	----------------------------

Pull-in/Drop-out delay	approx. 20 ms / approx. 20 ms
------------------------	-------------------------------

Output III	electronic output, passive
------------	----------------------------

Safety maximum voltage U_m	40 V DC
------------------------------	---------

Signal level	1-signal: (L+) - 2.5 V (50 mA, short-circuit/overload proof) 0-signal: switched off (off-state current $\leq 10 \mu\text{A}$)
--------------	---

Output IV	analogue
-----------	----------

Current range	0 ... 20 mA or 4 ... 20 mA
---------------	----------------------------

Quiescent voltage	$\leq 24 \text{ V DC}$
-------------------	------------------------

Load	$\leq 650 \text{ Ohm}$
------	------------------------

Fault signal	Power Rail, output IV: downscale $I \leq 3.6 \text{ mA}$, upscale $\geq 22 \text{ mA}$ (accord. to NAMUR NE 43)
--------------	--

Transfer characteristics

Measurement range f_n	0.001 ... 5 kHz
-------------------------	-----------------

Resolution	frequency measurement: 0.1 %; current output: $< 10 \mu\text{A}$
------------	--

Duration of measurement/Response delay	$\geq 100 \text{ ms}$ / $\leq 200 \text{ ms}$
--	---

Deviation	frequency measurement: 0.1 % of final value; current output: $< 10 \mu\text{A}$
-----------	---

Temperature	frequency measurement: 0.003 % / $^{\circ}\text{C}$ (30 ppm); current output: 0.005 % / $^{\circ}\text{C}$ (50 ppm)
-------------	---

Linearization	frequency measurement: 0.025 % current output: 0.006 % / $^{\circ}\text{C}$ (60 ppm)
---------------	--

Galvanic isolation

Input/Other circuits	safe galvanic isolation acc. to DIN EN 50020, voltage peak value 375 V
----------------------	--

Output I/Mains and reset	safely isolated in accordance with DIN VDE 0106 Part 101, design isolation voltage 253 V_{eff}
--------------------------	--

Output I, II/Other circuits	safely isolated in accordance with DIN VDE 0106 Part 101, design isolation voltage 253 V_{eff}
-----------------------------	--

Mutual output I, II, III	safely isolated in accordance with DIN VDE 0106 Part 101, design isolation voltage 253 V_{eff}
--------------------------	--

Output III, IV/Mains	safely isolated in accordance with DIN VDE 0106 Part 101, design isolation voltage 253 V_{eff}
----------------------	--

Output III/IV/Start-up override	function insulation acc. to DIN EN 50178, design isolation voltage 253 V_{eff}
---------------------------------	--

Start-up override/Mains and collective error	safely isolated in accordance with DIN VDE 0106 Part 101, design isolation voltage 253 V_{eff}
--	--

Interface/Mains/Output III	safely isolated in accordance with DIN VDE 0106 Part 101, design isolation voltage 253 V_{eff}
----------------------------	--

Ambient conditions

Ambient temperature	-20 ... 60 $^{\circ}\text{C}$ (253 ... 333 K)
---------------------	---

Standard conformity

Explosion protection	accord. to EN 50014 / EN 50020
Input	according to DIN EN 60947-5-6
Coordination of insulation	accord. to DIN EN 50178
Galvanic isolation	accord. to DIN EN 50178
Climatic conditions	accord. to DIN IEC 721
Electromagnetic compatibility	accord. to EN 50081-2 / EN 50082-2
