30KP33 thru 30KP220A

DESCRIPTION

This data sheet defines a series of 30 kW Transient Voltage Suppressor (TVS) series designed for use in applications where large voltage transients can damage sensitive components. This series is available from 33 to 220 volts with a selection of either 5% or 10% tolerance of the Breakdown Voltage (V_{BR}).

The 30 kW TVS series provides a peak pulse rating of 30,000 watts for one millisecond and is designed for use in applications where induced lighting presents a hazard to electronic circuitry.

FEATURES

- 30,000 Watts Peak Power dissipation at 25° C for 10/1000 micro second pulse
- Available in voltage range from 33 to 220 Volts
- UL 94V-0 Flammability classification

MAXIMUM RATINGS

- 30,000 W @ 10/1000 μ s of peak power dissipation at 25° C
- Operating Temperatures: -55° C to +150° C
- Storage Temperature: -55° C to +150° C
- Forward surge rating: 250 Amps, 1/120 second (one half sine wave) at 25° C
- Steady state power dissipation: 7.0 watts @ $T_A = 25^\circ\text{C}$
- Pulse Repetition Rate: <.05%

FIGURE 1
PEAK PULSE POWER vs PULSE TIME

MECHANICAL

- Void free molded case
- Weight 1.5 grams (approximate)
- Body Marked with logo, device marking code
- Positive terminal cathode marked with band or dot. Bidirectional not marked for polarity

N

“Stand Off Voltage” V_{WM} which should be equal to or greater than the dc continuous peak operating voltage level.

Note 2: For bidirectional construction, indicate a C or CA suffix after the part number.
