Lap Screened and Braid Screened Audio Cables

Your Part No.

Description

140-460

1 x 7/0.1 Plain copper insulated in Red PVC, Lap screened

and Grey PVC sheathed

Nom O.D 2.0 mm

Capacitance 360 pF/M Core to Screen

140-461

 $2 \times 7/0.1$ Red and Blue PVC insulated Plain copper conductors

laid side-by-side, overall Lap screened, and Grey PVC sheathed

Nom Dims 2.8 mm x 2.0 mm

Capacitance

330 pF/M Core to Screen

180 pF/M Core to Core

140-462

1 x 7/0.2 Plain copper insulated in Blue PVC, Lap screened and

Grey PVC sheathed

Nom O.D 3.1 mm

Capacitance 320 pF/M Core to Screen

140-463

 $2 \times 7/0.2$ Red and Blue PVC insulated Plain copper conductors laid side-by-side, overall Lap screened, and Grey PVC sheathed

Nom Dims $4.7 \text{ mm } \times 3.1 \text{ mm}$

Capacitance

310 pF/M Core to Screen

170 pF/M Core to Core

140-464

2 x 7/0.2 Red and Black PVC insulated Tinned copper conductors

twisted together, overall Lap screened, and Grey PVC sheathed

Nom O.D. 4.8 mm

Capacitance

215 pF/M Core to Screen

120 pF/M Core to Core

- IVV - IV

140-465 2 x 10/0.1 Blue and Red PVC insulated Plain copper conductors, individually lap screened, laid side-by-side and sheathed in Grey

PVC to give a flat "figure of 8 " section.

Nom Dims 4.3 mm x 2.1 mm

Capacitance 350 pl/M Core to Screen

140-466 2 x 7/0.2 Yellow and Red PVC insulated Tinned copper

conductors, individually lap screened, laid side-by-side and

in Grey PVC to give a flat "figure of 8" section.

Nom Dims $5.9 \text{ mm } \times 2.8 \text{ mm}$

Capacitance 320 pl/M Core to Screen

140-467 4 x 7/0.1 Red, Yellow, Blue, White Polyethylene insulated Plain

copper conductors, individually lap screened, Laid together, and

Grey PVC sheathed Nom O.D 4.7 mm

sheathed

Capacitance 95 pl/M Core to Screen
